Recent Library Additions, 1985 **Development and Democracy** Ole Elgström, Goran Hyden, 2003-08-29 Development and Democracy confirms the robust relationship between levels of economic development and democracy but suggests that globalization is a key variable in determining the tenuous nature of this relationship in the periphery of the world economy. It raises new questions about the role of social classes in democratization and points to the importance of including the nature of the state as a factor in the study of democratization. A further important finding is that countries with mixed legal systems correlate less positively with democracy than do countries with more homogenous legal systems. Moreover Development and Democracy shows conclusively that the way researchers design their studies has a major impact on their findings.

Altova® StyleVision® 2005 User & Reference Manual Altova, 2005 **Handbook of Multilevel Analysis** Jan Deleeuw, Erik Meijer, 2007-12-26 Multilevel analysis is the statistical analysis of hierarchically and non hierarchically nested data. The simplest example is clustered data such as a sample of students clustered within schools. Multilevel data are especially prevalent in the social and behavioral sciences and in the bio medical sciences. The models used for this type of data are linear and nonlinear regression models that account for observed and unobserved heterogeneity at the various levels in the data. This book presents the state of the art in multilevel analysis with an emphasis on more advanced topics. These topics are discussed conceptually analyzed mathematically and illustrated by empirical examples. The authors of the chapters are the leading experts in the field. Given the omnipresence of multilevel data in the social behavioral and biomedical sciences this book is useful for empirical researchers in these fields. Prior knowledge of multilevel analysis is not required but a basic knowledge of regression analysis asymptotic statistics and matrix algebra is assumed.
