The IEEE Guide to Writing in the Engineering and Technical Fields David Kmiec, Bernadette Longo, 2017-09-13 Helps both engineers and students improve their writing skills by learning to analyze target audience tone and purpose in order to effectively write technical documents This book introduces students and practicing engineers to all the components of writing in the workplace It teaches readers how considerations of audience and purpose govern the structure of their documents within particular work settings *The IEEE Guide to Writing in the Engineering and Technical Fields* is broken up into two sections Writing in Engineering Organizations and What Can You Do With Writing The first section helps readers approach their writing in a logical and persuasive way as well as analyze their purpose for writing The second section demonstrates how to distinguish rhetorical situations and the generic forms to inform train persuade and collaborate The emergence of the global workplace has brought with it an increasingly important role for effective technical communication Engineers more often need to work in cross functional teams with people in different disciplines in different countries and in different parts of the world Engineers must know how to communicate in a rapidly

evolving global environment as both practitioners of global English and developers of technical documents Effective communication is critical in these settings The IEEE Guide to Writing in the Engineering and Technical Fields Addresses the increasing demand for technical writing courses geared toward engineers Allows readers to perfect their writing skills in order to present knowledge and ideas to clients government and general public Covers topics most important to the working engineer and includes sample documents Includes a companion website that offers engineering documents based on real projects The IEEE Guide to Engineering Communication is a handbook developed specifically for engineers and engineering students Using an argumentation framework the handbook presents information about forms of engineering communication in a clear and accessible format This book introduces both forms that are characteristic of the engineering workplace and principles of logic and rhetoric that underlie these forms As a result students and practicing engineers can improve their writing in any situation they encounter because they can use these principles to analyze audience purpose tone and form

Controlling Language in Industry Stephen Crabbe, 2017-01-30 This book provides an in depth study of controlled languages used in technical documents from both a theoretical and practical perspective It first explores the history of controlled languages employed by the manufacturing industry to shape and constrain the information in technical documents The author then offers a comparative analysis of existing controlled languages and distills the best practice features of those language systems He concludes by offering innovative models that can be used to develop and trial a new controlled language This book will be of interest to linguists working in technical and professional communication as well as writers and practitioners involved in the production of technical documents for companies in multiple industries and geographical locations

Posthuman Praxis in Technical Communication Kristen R. Moore, Daniel P. Richards, 2018-01-19 This collection aimed at scholars teachers and practitioners in technical communication focuses on the praxis based connections between technical communication and theoretical movements that have emerged in the past several decades namely new materialism and posthumanism It provides a much needed link between contemporary theoretical discussions about new materialisms and posthumanism and the practical everyday work of technical communicators The collection insists that where some theoretical perspectives fall flat for practitioners posthumanism and new materialisms have the potential to enable more effective and comprehensive practices methodologies and pedagogies

Rhetorical Theory and Praxis in the Business Communication Classroom Kristen Getchell, Paula Lentz, 2018-09-10 Winner of the Association for Business Communication s 2019 Distinguished Book Award Rhetorical Theory and Praxis in the Business Communication Classroom responds to a significant need in the emerging field of business communication as the first collection of its type to establish a connection between rhetorical theory and practice in the business communication classroom The volume includes topics such as rhetorical grammar genre awareness in business communication theory the role of big data in message strategy social media and memory and the connection between rhetorical theory and entrepreneurship These essays provide the business

communication scholar practitioner and program administrator insight into the rhetorical considerations of the business communication landscape

Communicating Project Management Benjamin Lauren, 2018-03-22 Communicating Project Management argues that the communication practices of project managers have necessarily become participatory made up of complex strategies and processes solidly grounded in rhetorical concepts The book draws on case studies across organizational contexts and combines individual experiences to investigate how project management relies on communication as teams develop products services and internal processes The case studies also provide examples of how project managers can be understood and studied as writers further arguing project managers must approach communication as designed experience that must be intentionally inclusive Author Benjamin Lauren illustrates to readers how teams work together to manage projects through complex coordinative communication practices and highlights how project managers are constantly learning and evolving by analyzing where they succeed and fail He concludes that technical and professional communicators have a pivotal role in supporting and facilitating participative approaches to communicating project management

A History of Management Thought Morgen Witzel, 2016-12-16 Of all the sciences and social sciences management is the one that most deliberately turns its back on the past Yet management as we know it today did not spring into life fully formed Management has more than just a present it also has a past and a future and all three are inextricably linked This book charts the evolution of management as an intellectual discipline from ancient times to the present day Contemporary management challenges including sustainability technology and data and legitimacy are analysed through an historical lens and with the benefit of new case studies The author helps readers understand how the evolution of management ideas has interacted with changes in society By framing management's history as one of challenge and response this new edition is the perfect accompaniment for students and scholars seeking meaningful study in the business school and beyond Essential reading as a core textbook in management history the book is also valuable supplementary reading across the humanities and social sciences

Scientific Communication Han Yu, Kathryn M. Northcut, 2017-09-18 This book addresses the roles and challenges of people who communicate science who work with scientists and who teach STEM majors how to write In terms of practice and theory chapters address themes encountered by scientists and communicators including ethical challenges visual displays and communication with publics as well as changed and changing contexts and genres The pedagogy section covers topics important to instructors everyday teaching as well as longer term curricular development Chapters address delivery of rhetorically informed instruction communication from experts to the publics writing assessment online teaching and communication intensive pedagogies and curricula The Open Access version of this book available at <http://www.tandfebooks.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Design Discourse David Franke, Alex Reid, 2010-10-06 Design Discourse Composing and Revising Programs in Professional and Technical Writing addresses the complexities of developing

professional and technical writing programs The essays in the collection offer reflections on efforts to bridge two cultures what the editors characterize as the art and science of writing often by addressing explicitly the tensions between them Design Discourse offers insights into the high stakes decisions made by program designers as they seek to function at the intersection of the practical and the abstract the human and the technical Critical Power Tools J. Blake Scott ,Bernadette Longo ,Katherine V. Wills,2007-06-01 Winner of the 2007 National Council of Teachers of English NCTE Award for Best Collection of Essays on Technical and Scientific Communication The first book to focus on the intersection of cultural studies and technical communication Critical Power Tools draws on various traditions of cultural studies to develop new or expanded theoretical methodological and pedagogical approaches to technical communication Offered as a sourcebook for the field the book is organized into three parts The first section emphasizing theory building reconceptualizes key concepts or practices such as usability through a cultural studies lens The second section illustrates alternative research methods through several case studies The third section offers critical and productive pedagogical approaches including specific assignments applicable to both undergraduate and graduate courses **Deadly Documents** Mark Ward,2016-12-05 Scholars teachers and practitioners of organizational professional and technical communication and rhetoric are target audiences for a new book that reaches across those disciplines to explore the dynamics of the Holocaust More than a history the book uses the extreme case of the Final Solution to illumine the communicative constitution of organizations and to break new ground on destructive organizational communication and ethics Deadly Documents Technical Communication Organizational Discourse and the Holocaust Lessons from the Rhetorical Work of Everyday Texts starts with a microcosmic look at a single Nazi bureau Through close rhetorical visual and discursive analyses of organizational and technical documents produced by the SS Security Police Technical Matters Group the bureau that managed the Nazi mobile gas van program author Mark Ward shows how everyday texts functioned as boundary objects on which competing organizational interests could project their own interpretations and temporarily negotiate consensus for their parts in the Final Solution The initial chapters of Deadly Documents provide a historical ethnography of the SS technical bureau by closely describing the institutional and organizational cultures in which it operated and relating organizational stories told in postwar testimony by the desk murderers themselves Then through examination of the primary material of their documents Ward demonstrates how this Social Darwinist world of competing Nazi bureaucrats deployed rhetorical and linguistic resources to construct a social reality that normalized genocide Ward goes beyond the usual Weberian bureaucratic paradigm and applies to the problem of the Holocaust both the interpretive view that sees organizations as socially constructed through communication and the postmodern view that denies the notion of a preexisting social object called an organization and instead situates it within larger discourses The concluding chapters trace how contemporary scholars of professional communication have wrestled with the Nazi case and developed a consensus explanation that the desk murderers were amoral technocrats Though the

explanation is dismissed by most historians it nevertheless offers Ward argues a comforting distance between us and them Yet as Ward writes First we will learn more about the dynamic role of everyday texts in organizational processes Second as we see these processes perhaps inherent to all organized communities including our own at work even in the extreme case of the SS Technical Matters Group the comforting distance that we now maintain between them and us is necessarily diminished And third our newfound discomfort may open productive spaces to revisit conventional wisdoms about the ethics of technical and organizational communication

User Localization Strategies in the Face of Technological

Breakdown Isidore Kafui Dorpenyo, 2019-08-20 This book examines Ghana's use of the fingerprint biometric technology in order to further conversations about localization championed by technical communication scholars Localization in this case refers to the extent to which users demonstrate their knowledge of use by subverting and reconfiguring the purpose of technology to solve local problems Dorpenyo argues that the success of a technology depends on how it meets the users' needs and the creative efforts users put into use situations In *User Localization Strategies in the Face of Technological Breakdown* Dorpenyo advocates studying how users of technological systems construct knowledge about the technology and develop local strategies to solve technological breakdowns By analyzing technical documents and interview transcripts the author identifies and advances three user localization strategies linguistic localization subversive localization and user heuristic experience localization and considers how biometric systems can become a tool of marginalization

Digital

Literacy for Technical Communication Rachel Spilka, 2009-12-04 *Digital Literacy for Technical Communication* helps technical communicators make better sense of technology's impact on their work so they can identify new ways to adapt, adjust, and evolve, fulfilling their own professional potential This collection is comprised of three sections, each designed to explore answers to these questions: How has technical communication work changed in response to the current digital writing environment? What is important foundational knowledge in our field that all technical communicators need to learn? How can we revise past theories or develop new ones to better understand how technology has transformed our work? Bringing together highly regarded specialists in digital literacy, this anthology will serve as an indispensable resource for scholars, students, and practitioners It illuminates technology's impact on their work and prepares them to respond to the constant changes and challenges in the new digital universe
