Sealab Ben Hellwarth,2012-01-10 Sealab is the underwater Right Stuff the compelling story of how a US Navy program sought to develop the marine equivalent of the space station and forever changed man s relationship to the sea While NASA was trying to put a man on the moon the US Navy launched a series of daring experiments to prove that divers could live and work from a sea floor base When the first underwater habitat called Sealab was tested in the early 1960s conventional dives had strict depth limits and lasted for only minutes not the hours and even days that the visionaries behind Sealab wanted to achieve for purposes of exploration scientific research and to recover submarines and aircraft that had sunk along the continental shelf The unlikely father of Sealab George Bond was a colorful former country doctor who joined the Navy later in life and became obsessed with these unanswered questions How long can a diver stay underwater How deep can a diver go Sealab never received the attention it deserved yet the program inspired explorers like Jacques Cousteau broke age old depth barriers and revolutionized deep sea diving by demonstrating that living on the seabed was not science fiction Today divers on commercial oil rigs and Navy divers engaged in classified missions rely on methods pioneered

during Sealab Sealab is a true story of heroism and discovery men unafraid to test the limits of physical endurance to conquer a hostile undersea frontier It is also a story of frustration and a government unwilling to take the same risks underwater that it did in space Ben Hellwarth a veteran journalist interviewed many surviving participants from the three Sealab experiments and conducted extensive documentary research to write the first comprehensive account of one of the most important and least known experiments in US history **Pettingill's Newspaper Directory and Gazetteer** ,1903

John Pina Craven,2002-06-02 The Cold War was the first major conflict between superpowers in which victory and defeat were unambiguously determined without the firing of a shot Without the shield of a strong silent deterrent or the intellectual sword of espionage beneath the sea that war could not have been won John P Craven was a key figure in the Cold War beneath the sea As chief scientist of the Navy's Special Projects Office which supervised the Polaris missile system then later as head of the Deep Submergence Systems Project DSSP and the Deep Submergence Rescue Vehicle program DSRV both of which engaged in a variety of clandestine undersea projects he was intimately involved with planning and executing America's submarine based nuclear deterrence and submarine based espionage activities during the height of the Cold War Craven was considered so important by the Soviets that they assigned a full time KGB agent to spy on him Some of Craven's highly classified activities have been mentioned in such books as Blind Man's Bluff but now he gives us his own insights into the deadly cat and mouse game that U S and Soviet forces played deep in the world's oceans Craven tells riveting stories about the most treacherous years of the Cold War In 1956 Nautilus the world's first nuclear powered submarine and the backbone of the Polaris ballistic missile system was only days or even hours from sinking due to structural damage of unknown origin Craven led a team of experts to diagnose the structural flaw that could have sent the sub to the bottom of the ocean taking the Navy's missile program with it Craven offers insight into the rivalry between the advocates of deterrence with whom he sided and those military men and scientists such as Edward Teller who believed that the United States had to prepare to fight and win a nuclear conflict with the Soviet Union He describes the argument that raged in the Navy over the reasons for the tragic loss of the submarine Thresher and tells the astonishing story of the hunt for the rogue Soviet sub that became the model for The Hunt for Red October including the amazing discovery the Navy made when it eventually found the sunken sub Craven takes readers inside the highly secret DSSP and DSRV programs both of which offered crucial cover for sophisticated intelligence operations Both programs performed important salvage operations in addition to their secret espionage activities notably the recovery of a nuclear bomb off Palomares Spain He describes how the Navy's success at deep sea recovery operations led to the takeover of the entire program by the CIA during the Nixon administration A compelling tale of intrigue both within our own government and between the U S and Soviet navies The Silent War is an enthralling insider's account of how the submarine service kept the peace during the dangerous days of the Cold War **Project Azorian** Norman C

Polmar, Michael White, 2012-09-15 In early August 1974 despite incredible risks and after six years of secret preparations the CIA attempted to salvage the sunken Soviet ballistic missile submarine K 129 from the depths of the North Pacific Ocean The audacious effort was undertaken with the cover of an undersea mining operation sponsored by eccentric billionaire Howard Hughes Azorian incorrectly identified as Project Jennifer by the press was the most ambitious ocean engineering endeavor attempted by man Following the accidental sinking of a Soviet missile submarine in March 1968 U S intelligence agencies were able to determine the precise location and to develop a means of raising the submarine from a depth of 16 400 feet The remarkable salvage effort of the K 129 which contained nuclear armed torpedoes and one nuclear tipped missile as well as crypto equipment was conducted with Soviet naval ships a few hundred yards from the lift ship the Hughes Glomar Explorer The book is based in part on the research for Michael White documentary film Azorian The Raising of the K 129 released in late 2009 The research for the book and the documentary forced the CIA to issue a brief report on Project Azorian in early 2010 with one third of the document redacted
