Blackbird James Hamilton-Paterson, 2017-09-05 The fascinating story of the spy plane SR 71 Blackbird the fastest manned aircraft in the history of aviation The SR 71 Blackbird the famed spy jet was deliberately designed to be the world s fastest and highest flying aircraft and its success has never been approached since It was conceived in the late 1950s by Lockheed Martin s highly secret Skunk Works team under one of the most possibly the most brilliant aero designers of all time Clarence Kelly Johnson Once fully developed in 1964 the Blackbird represented the apogee of jet powered flight It could fly at well over three times the speed of sound above 85 000 feet and had an unrefueled range of 3 200 nautical miles It flew with great success until 1999 Despite extensive use over Vietnam and later battlefields not one was ever shot down unlike the U2 in the Gary Powers incident The Blackbird s capabilities seem unlikely ever to be exceeded It was retired because its function can be performed by satellites and in today s steady trend toward unmanned military aircraft it is improbable that another jet aircraft of this speed and caliber will ever again be conceived *Slaughterhouse Creek* M.
