Social Studies for Today's Children William Burk Ragan, John D. McAulay, 1973 *Re-Imagining Citizenship Education* Pablo C. Ramirez, 2023-06-01 In this special edition we call attention to the role of Critical Multicultural Citizenship Education CMCE in schools societies and global contexts The fundamental goal of CMCE is to increase not only the students awareness of and participation in the political aspects of democracy but also students abilities to create and live in an ethnically diverse and just community Global migration and increasing diversity within nations are challenging conceptions of citizenship all over the world The percentage of ethnic minorities in nation states throughout the world has increased significantly within the past 30 years The United States Census for example projects that 50% of the population will consist

of culturally linguistically racially ethnic and religiously diverse groups by 2050 With an increase growth of diversity within national borders issues concerning educational equity equality and civic engagement have not always been well attended to in educational and societal contexts Growing ethnic diversity in schools society has not automatically led to a dismantling of persistent educational barriers or structural inequalities In the past decade culturally ethnically and linguistically diverse populations have faced barriers impacting their rights as citizens in the United States and international contexts Citizenship and the rights that are associated with being a citizen are re framed when culturally ethnically and linguistically students seek equality In 2020 many urban cities in the United States witnessed Latino Black youth demonstrate peacefully guided by social justice and their civic responsibilities Similarly in international contexts students have demonstrated civil disobedience by expressing concerns about their rights as citizens and the disempowerment of communities We emphatically believe that students in K 12 settings must begin to understand their rights as citizens and also advocate for the rights of others in order for communities in the U S and international contexts to achieve democracy

Teaching Culturally and Linguistically Relevant Social Studies for Emergent Bilingual and Multilingual Youth Ashley Taylor Jaffee, Cinthia Salinas, Wayne Journell, 2024 In recent years social studies scholars have pushed to consider critical ways of thinking about curriculum particularly challenging what we teach and how we teach Authors in this book however speak specifically about culturally and linguistically accessing and engaging with social studies and citizenship education curricula and instruction Through this project the notion of inclusiveness and relevance centers on culture and language that emphasize the civic identity agency and membership of communities most often marginalized by social studies and civic instruction public schools and U S democratic society We hope this collection of chapters acts as a resource to address pedagogical sociocultural and civic wonderings by highlighting ways of using language as an asset and means in the social studies classroom This book presents new pedagogical ideas theoretical frameworks and research methodologies on teaching culturally and linguistically relevant social studies with and for emergent bilingual and multilingual EBML youth The compilation of chapters seeks to forefront scholarship and teaching that centers the needs interests and experiences of EBML youth in social studies education Chapter authors draw from multiple intersecting critical and interdisciplinary frameworks that center culture and language to inform and write about social studies taking place inside outside and beyond the classroom that engages youth in varying disciplinary and non disciplinary spaces across social studies education e g community geography family civics history The chapters also challenge oppressive structures policies and practices that marginalize EBML youth The book is intended for Pre K 12 teachers and administrators social studies teacher educators and researchers and pre service social studies teachers to actively read reflect on and strive to enact the work shared by chapter authors

Response to Intervention RtI involves evaluating the degree that students a master academic material in response to effective instruction and b demonstrate appropriate prosocial behavior in response to effective classroom management When students are not progressing or responding academically or behaviorally to effective instructional conditions RtI includes a functional assessment problem solving process to determine the reason s for the lack of success and the implementation of strategic through intensive interventions to help those students progress and be successful At an operational level RtI is often described as working within a flexible three tiered system that is guided by students academic and behavioral outcomes The goal ultimately is to facilitate learning and mastery by ensuring effective instruction and classroom management for all students Tier 1 and by speeding early and effective interventions to those students who need more strategic interventions Tier 2 or more intensive interventions Tier 3 interventions see the diagram below Critically effective RtI processes focus on a interventions not diagnostic labels b individualized functional assessment not universal or standard assessment batteries tests or evaluation protocols and c student focused contextual decision making not rigid psychometric decision rules At the core of this process is a data based functional assessment problem solving process While there are many sound problem solving models and processes all of the effective ones have four primary components Problem Identification Problem Analysis Intervention and Evaluation While some utilize more steps or different semantic terms all of the research based models components can be distilled down to these four primary components From an RtI perspective it is critical to note that RtI is an evaluation step That is it is impossible to determine whether a student has responded to an intervention if the intervention has not already been implemented This Electronic Book E Book focuses on describing the critical components of effective RtI systems and approaches at the school district and state levels as well as the step by step the Data based Functional Assessment Problem Solving process that has been used nationally by Project ACHIEVE as the SPRINT School Prevention Review and Intervention Team process In doing this a Problem solving Consultation Intervention context is used throughout and effective instruction assessment progress monitoring intervention and evaluation processes from kindergarten through

high school are highlighted In addition the seven steps of the Data based Functional Assessment Problem Solving process are presented in detail and applied to case studies Readers will learn how to scientifically clarify and identify referred student problems how to generate hypotheses to explain why these problems exist how to test and validate in invalidate these hypotheses and then how to link confirmed hypotheses to evidence based interventions and to evaluate students responsiveness to them Numerous case studies are presented throughout the E Book to demonstrate the RtI process and to provide readers with examples of how to implement it at student school system and state levels Readers should finish the book with a working understanding of how to implement effective RtI processes at all of these levels and how to strategically plan and evaluate the implementation process
