Super Carrier:

US Super Carrier Operations Manual Chris McNab, Patrick Bunce, 2020-05-12 The US Navy's fleet of aircraft carriers are at the heart of global American military force. With nuclear-powered oceanic range complements of nearly 5,000 crew and typically carrying more than 70 combat aircraft, US carriers can remain on station for months delivering aerial combat strikes on distant targets around the clock. The Haynes Super Carrier Operations Manual offers unrivaled insights into understanding how a modern US super carrier is operated. The US Navy has given Haynes author Chris McNab and photographer Patrick Bunce official clearance to spend time at sea on one of its Nimitz or Gerald R Ford class super carriers. During the visit, Chris conducted interviews with key personnel of all major departments including flight deck crew, aviators, ordnance officers, engineers, logisticians, operations crew, and the captain, while Patrick photographed life above and below decks with a special focus on the engineering side of carrier aviation, often not covered in other publications. **Nimitz Class Aircraft Carrier**, **Aircraft Carriers** Norman Polmar, 2008-01-31 In the post-1945 era, the aircraft carrier has remained a valued weapon despite the development of nuclear weapons, cruise and ballistic missiles, and highly capable submarines. At times, as in the early days of the Korean and Vietnam Wars and in the Falklands conflict, carriers alone could deploy high-performance aircraft to the battlefield. In other operations such as enforcing no-fly zones and the US invasions of Afghanistan and Iraq, only carriers could provide the bases needed for sustained combat and support operations. This second volume of Norman Polmar's landmark study details the role of carriers in the unification of the US armed forces and strategic deterrence, fiscally constrained Great Britain, the development of British Commonwealth and ex-colonial navies, and the efforts of France and the Netherlands to rebuild their fleets. The role of the modern carrier, nine nations currently possess them, is discussed, as are the issues confronting nations that might acquire them. Chapters on the Soviet Union's effort to produce carriers are included for the first time. The development of both carrier planes and the many oddball aircraft that have flown from carriers such as the U-2 spy plane are also examined. Appendixes include comprehensive data on all carriers built and converted through 2006. This volume is a valuable companion to the critically acclaimed Volume I which covers aircraft carrier development and operations from 1909 to 1945. **CVAN-70 Aircraft Carrier** United States Congress, Joint Senate-House Armed Services Subcommittee on CVAN-70 Aircraft Carrier, 1970 Joint hearing to study the need for the CVAN-70 attack aircraft carrier and the need to incorporate funds for the carrier into the FY71 budget to preserve lead time continuity. Witness panel includes John H. Chafee, Secretary of the Navy; Admiral Thomas H. Moorer, Chief of Naval Operations; Rear Admiral James L. Holloway III, Nuclear Propelled Attack Program Coordinator; Office of the Chief of Naval Operations; Senator Walter F. Mondale; Representative Williams S. Moorhead; Desmond P. Wilson Jr., Center for Naval Analyses; General Earle G. Wheeler, Chairman, Joint Chiefs of Staff; Vice Admiral Hyman G. Rickover, Director, Naval Reactors Division; Atomic Energy Commission; and William W. Kaufmann, Professor of Political Science, Massachusetts Institute of Technology.
