Letter, 1948 **American Aircraft Development Second World War Legacy** William J. Norton, 2021-12-02 This volume focuses on the influence of America's Second World War aviation development and experience subsequent aviation technological advances and world events in shaping American choices in military aircraft and associated weapons development during the few years following the war. It shows how air warfare weapons from the last conflict were carried forward and altered how new systems evolved from these and how the choices fared in the next war Korea. The period was one of remarkable progress in a short span of time via a great many aircraft and weapons programs and associated technological progress. These systems were of immense importance influencing and growing the engineering production and operational capabilities to be exploited for the next generation of weapons that soon followed. Emphasized is the innovative features or new technology and how these contributed to advancing American military aviation influencing the evolution of follow on models or types. Included are military prototype experimental and research aircraft that are equally important in understanding the history of American aircraft development. Combat employment progress and equipment adaptation during the Korean Conflict is then highlighted. Tabulated characteristics are provided of those aircraft that entered production or represented significant technological advances influencing others that follow *The Supercarriers* Andrew Faltum, 2014-10-15 *The Supercarriers* is a comprehensive historical overview with extensive photos, maps, drawings and operational detail including all air wing deployments. The rear end paper displays similar views of the Constellation as part of the Kitty Hawk class **War, Strategy and Intelligence** Michael I. Handel, 2012-11-12 Investigating the logic, conduct and nature of war on the highest political and strategic levels, these essays put less emphasis on operational and tactical aspects. They look at the impact of technology on warfare, the political nature of war and the limits of rational analysis in studying war *Brassey's Naval Annual* Earl Thomas Allnutt Brassey, 1946 **American National Biography** John A. Garraty, Mark C. Carnes, 2005-05-12 *American National Biography* is the first new comprehensive biographical dictionary focused on American history to be published in seventy years. Produced under the auspices of the American Council of Learned Societies, the ANB contains over 17,500 profiles on historical figures written by an expert in the field and completed with a bibliography. The scope of the work is enormous, from the earliest recorded European explorations to the very recent past *Screening the Fleet* Jonathan Rayner, 2025-02-04 In *Screening the Fleet*, Prof. Jonathan Rayner explores the representation of the modern Royal Navy on British television over a fifty-year period from 1973 to 2023. Contextualising his subject with significant aspects of earlier naval representation in recruiting, documentary and public information films from the 1940s to the 1960s, Rayner then brings his focus forward to 1973-2023.

The 1970s were a significant decade for naval representation on television and saw the broadcast of two definitive series the BBC's drama series *Warship* and the acclaimed documentary series *Sailor*. These landmark series set the benchmark for naval representation in both realist and in fictional portrayals. They also set precedents for audience perceptions and these have affected the production and the reception of the series on the Royal Navy that have followed. Rayner's work investigates how advances in technology allow programme makers to use new techniques in the spheres of naval drama and documentary. More recent series also need to balance the required conventions for any portrayal of the navy on television with the revelatory or iconoclastic approaches now expected by modern audiences. In focussing on the changing portrayal of the Royal Navy on television however Rayner also surfaces how the Navy itself has evolved in the post World War II world. The series analysed in *Screening the Fleet* also evidence the changing nature and increasing diversity of the naval community as a reflection of changing notions of Britishness. Offering the first study of its type this volume highlights evolving and emerging trends in factual and fact based television programmes through their portrayal of a highly popular patriotic and persistent subject over a fifty year period. It debates developments in television and documentary approaches using the representation of the Royal Navy and its changing position in perceptions of British identity.
