Reading and Writing the Electronic Book Catherine Marshall,2022-06-01 Developments over the last twenty years have fueled considerable speculation about the future of the book and of reading itself This book begins with a gloss over the history of electronic books including the social and technical forces that have shaped their development The focus then shifts to reading and how we interact with what we read basic issues such as legibility annotation and navigation are examined as aspects of reading that ebooks inherit from their print legacy Because reading is fundamentally communicative I also take a closer look at the sociality of reading how we read in a group and how we share what we read Studies of reading and ebook use are integrated throughout the book but Chapter 5 goes meta to explore how a researcher might go about designing his or her own reading related studies No book about ebooks is complete without an explicit discussion of content preparation i e how the electronic book is written Hence Chapter 6 delves into the underlying representation of ebooks and efforts to create and apply markup standards to them This chapter also examines how print genres have made the journey to digital and how some emerging digital genres might be realized as ebooks Finally Chapter 7 discusses some beyond the book functionality how can ebook platforms be transformed into portable personal libraries In the end my hope is that by the time the reader reaches the end of this book he or she will feel equipped to perform the next set of studies write the next set of articles invent new ebook functionality or simply engage in a heated argument with the stranger in seat 17C about the future of reading Table of Contents Preface Figure Credits Introduction Reading Interaction Reading as a Social Activity Studying Reading Beyond the Book References

Warren Company, 1920 **Arabesque without End** Anne Leonard, 2021-10-05 Featuring multidisciplinary research by an international team of leading scholars this volume addresses the contested aspects of arabesque while exploring its penchant for crossing artistic and cultural boundaries to create new forms Enthusiastically imported from its Near Eastern sources by European artists the freely flowing line known as arabesque is a recognizable motif across the arts of painting music dance and literature From the German Romantics to the Art Nouveau artists and from Debussy s compositions to the serpentine choreographies of Lo e Fuller the chapters in this volume bring together cross disciplinary perspectives to understand the arabesque across both art historical and musicological discourses *Noble Numbers, Subtle Words* Barbara Milberg Fisher, 1997 This study approaches the use of mathematics in fiction in an entirely new way as a potent instrument of language Following Wittgenstein s description of

mathematical constructs as a component of ordinary language Fisher shows how number geometric figuration algebraic coding and transcendent abstractions have been made to function as practical narrative tools Far from rehearsing the various paradigms of numerology whether Pythagorean Elizabethan or Cabalistic this book explores the tactical deployment of mathematical objects as shaping and framing agents It reveals how mathematical objects may be subordinated to the storyteller s art
