Writers Directory NA NA, 2016-03-05 The Great Creation Debate Brad Freckleton, 2012-07 Why isn't the evolution of flight shown in the fossil record Bugs birds bats and dinosaurs flew and are shown fully formed in the fossil record but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals What is desperately wrong with the Grand Canyon if evolution is true Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time Why does massive erosion only show up at the top Animals with well developed eyes show up suddenly in the fossil record as do flying animals It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today The second law of thermodynamics is a law of science that says

everything left to its own will wear out run down It is a fundamental law of science So how did evolution accidentally go up How could a DNA molecule fumble together The cell needs DNA DNA needs the cell which came first Beneficial mutations also weaken in other areas and don't write evolutionary advancing DNA code Spiral galaxies which have the shape of a star fish that is spinning quickly throughout our universe like our Milky Way galaxy are supposed to be over 10 billion years old If they were over a billion years old they would lose their spiral arm shape The arms of our galaxy the Milky Way only show a maximum age of 0.3 billion years People want to know why they're here now and where they're going to go They want surety of truth also Read this book and see how well evolution holds up in all the sciences Read this book and see if life can have meaning direction and hope with surety For those who claim to be open minded put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems

First You Build a Cloud K. C. Cole, 2012-07-18 This

clearly written and compelling look at physics and physicists offers thousands of new ways to see our daily world more richly Douglas Hofstadter author of *Gödel Escher Bach* For many of us physics has always been a thing of mystery and complexity K. C. Cole an award winning science writer specializes in making its wonders accessible to the everyday reader This book uses lively prose metaphors and anecdotes to allow us to comprehend the nuances of physics gravity and light color and shape quarks and quasars particles and stars force and strength It also shows us how the physical world is so deeply intertwined with the ways we think about culture poetry and philosophy and explores the workings of such legendary scientific minds as Richard Feynman Victor Weisskopf brothers Frank Oppenheimer and J. Robert Oppenheimer Philip Morrison Vera Kistiakowsky and Stephen Jay Gould An exemplary science writer For readers without scientific background Cole gracefully introduces relativity quantum theory optics astrophysics and other significant disciplines never getting bogged down in unnecessary explanation Thus you may not learn all about thermodynamics from reading her chapter on it but you will learn enough to think seriously about the entropy in your own life Cole sprinkles her text with comments from famous scientists Space is blue and birds fly in it said Heisenberg and Faraday said Nothing is too wonderful to be true that are not only delightful in themselves but perfectly suited to her own text No review of Cole's book could be too wonderful to be true
