*Department of Housing and Urban Development, and Certain Independent Agencies Appropriations for Fiscal Year 1987: Nondepartmental witnesses* United States. Congress. Senate. Committee on Appropriations. Subcommittee on HUD-Independent Agencies, 1986      **Individual-Based Models and Approaches In Ecology** D. L. DeAngelis, 2018-01-18  
Until fairly recently populations were handled as homogenized averages which made modeling feasible but which ignored the essential fact that in any population there is a great variety of individuals of different ages sizes and degrees of fitness Recently because of the increased availability of affordable computer power approaches have been developed which are able to recognize individual differences Individual based models are of great use in the areas of aquatic ecology terrestrial ecology landscape or physiological ecology terrestrial ecology landscape or physiological ecology and agriculture This book discusses which biological problems individual based models can solve as well as the models inherent limitations It explores likely future directions of theoretical development in these models as well as currently feasible management applications and the best mathematical approaches and computer languages to use The book also details specific applications to theory and management      **H.R. 3131, the National High-Performance Computing Technology Act** United States. **Computational Atomic And Nuclear Physics - Proceedings Of The Summer School** C Bottcher, Michael Robert Strayer, Joseph Bennett Mcgrory, 1990-07-05 Computational power available to scientific researchers is increasing at such a rate in recent years that totally new numerical approaches to forefront problems are playing an increasingly important role in modern physics research At the Summer School current topics in atomic and nuclear physics where such computational approaches may be most fruitful were discussed by an internationally distinguished faculty Major topics discussed included Ultra relativistic Heavy Ion Collisions the importance of sub nucleon degrees of freedom to nuclear physics the importance of electromagnetic processes in collisions of high energy highly charged ions relativistic effects in atomic and nuclear structure current topics in quantum chemistry modern Monte Carlo techniques path integral methods and applications of static and time dependent Hartree Fock methods in atomic and nuclear physics National High-Performance Computer Technology Act of 1989 United States. Congress. Senate. Committee on Commerce, Science, and Transportation. Subcommittee on Science, Technology, and Space, 1989 *Department of Housing and Urban Development--independent agencies appropriations for 1987* United States. Congress. House. Committee on Appropriations. Subcommittee on HUD-Independent Agencies, 1986 Knowledge-creating Milieus in Europe Augusto Cusinato, Andreas Philippopoulos-Mihalopoulos, 2015-08-26 This book introduces a radically spatialised approach to knowledge creation and innovation Reflecting on an array of European urban and regional developments it offers an updated notion of milieu as the conceptual and material space of knowledge and innovation in line with the interpretative turn in social sciences and humanities In view of the unwillingness of mainstream economics to accommodate such a trend the authors pursue a broadly understood hermeneutic approach that expands on the triad of knowledge space innovation The book's main findings are that space is an essential intermediary in the connection between knowledge and innovation and that a renewed notion of milieu provides the knowledge space innovation triad with both an analytical basis and operational power It also offers fresh insights into the significance and potential of the knowledge economy A number of empirical European case studies on various scales organisations cities and territories support the findings and suggest new policy directions **Supercomputing**, 1990 *Mathematical Modeling and Supercomputer Technologies* Dmitry Balandin, Konstantin Barkalov, Iosif Meyerov, 2022-12-23 This book constitutes selected and revised papers from the 22nd International Conference on Mathematical Modeling and Supercomputer Technologies MMST 2022 held in Nizhny Novgorod Russia in November 2022 The 20 full papers and 5 short papers presented in the volume were thoroughly reviewed and selected from the 48 submissions They are organized in topical sections on computational methods for mathematical models analysis computation in optimization and optimal control supercomputer simulation *High-Performance Scientific Computing* Edoardo Di Napoli, Marc-André Hermanns, Hristo Iliev, Andreas Lintermann, Alexander Peyser, 2017-03-01 This book constitutes the thoroughly refereed post conference

proceedings of the First JARA High Performance Computing Symposium JARA HPC 2016 held in Aachen Germany in October 2016 The 21 full papers presented were carefully reviewed and selected from 26 submissions They cover many diverse topics such as coupling methods and strategies in Computational Fluid Dynamics CFD performance portability and applications in HPC as well as provenance tracking for large scale simulations

### **Information Sources in Information Technology**

David Haynes,2013-02-07 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources
