It tackles the subject via an analysis of maps dating from circa 1434 to 1865 with an emphasis on the period before 1600. The book begins with an appraisal of the peculiar circumstances which led late medieval Europe to pursue long distance travel both overland and by sea, introduces cosmographic traditions inherited from classical times and investigates pre-Columbian excursions into the western ocean. Finally the great voyages and mappamundi of the early sixteenth century are described in depth. After 1600 the focus begins to narrow to North America and particularly to the colonization of the American Northeast. All maps discussed in detail are illustrated. 40 full page b/w plates, 25 full page color plates. Baker, Aaron Gove, Edwin C. Hewett, John Williston Cook, 1870 **Mapping Europe's Borderlands** Steven Seegel, 2012-05-14 The simplest purpose of a map is a rational one: to educate, to solve a problem, to point someone in the right direction. Maps shape and communicate information for the sake of improved orientation. But maps exist for states as well as individuals and they need to be interpreted as expressions of power and knowledge, as Steven Seegel makes clear in his impressive and important new book *Mapping Europe's Borderlands*. It takes the familiar problems of state and nation building in eastern Europe and presents them through an entirely new prism: that of cartography and cartographers. Drawing from sources in eleven languages including military, historical, pedagogical, and ethnographic maps as well as geographic texts and related cartographic literature, Seegel explores the role of maps and mapmakers in the East-Central European borderlands from the Enlightenment to the Treaty of Versailles. For example, Seegel explains how Russia used cartography in the aftermath of the Napoleonic Wars and later formed its geography society as a cover for gathering intelligence. He also explains the importance of maps to the formation of identities and institutions in Poland, Ukraine, and Lithuania as well as in Russia. Seegel concludes with a consideration of the impact of cartographers' regional and socioeconomic backgrounds, education, families, career options, and available language choices. *Catalog of Copyright Entries, Third Series* Library of Congress.
