Among the various kinds of occultism popular during the Russian Silver Age 1890-1914 modern Theosophy was by far the most intellectually significant This contemporary gnostic gospel was invented and disseminated by Helena Blavatsky an expatriate Russian with an enthusiasm for Buddhist thought and a genius for self promotion What distinguished Theosophy from the other kinds of mysticism the spiritualism table turning fortune telling and magic that fascinated the Russian intelligentsia of the period In answering this question Maria Carlson offers the first scholarly study of a controversial but important movement in its Russian context Carlson's is the only work on this topic written by an intellectual historian not ideologically committed to Theosophy Placing Mme Blavatsky and her secret doctrine in a Russian setting the book also discusses independent Russian Theosophical circles and the impact of the Theosophical Anthroposophical schism in Russia It surveys the vigorous polemics of the Theosophists and their critics demonstrates Theosophy's role in the philosophical dialogues of the Russian creative intelligentsia and chronicles the demise of the movement after 1917 By exploring this long neglected aspect of the Silver Age Carlson greatly enriches our knowledge of fin de siècle Russian culture Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Russia Between East and West Dmitry Shlapentokh, 2007

Throughout most of Russian history two views of who the Russians are have dominated the minds of Russian intellectuals Westerners assumed that Russia was part of the West whilst Slavophiles saw Russia as part of a Slavic civilization At present it is Eurasianism that has emerged as the paradigm that has made attempts to place Russia in a broad civilizational context and it has recently become the only viable doctrine that is able to provide the very ideological justification for Russia's existence as a multiethnic state Eurasians assert that Russia is a civilization in its own right a unique blend of Slavic and non Slavic mostly Turkic people While it is one of the important ideological trends in present day Russia Eurasianism with its origins among Russian emigrants in the 1920s has a long history Placing Eurasianism in a broad context this book covers the origins of Eurasianism

dwells on Eurasianism's major philosophical paradigms and places Eurasianism in the context of the development of Polish and Turkish thought The final part deals with the modern modification of Eurasianism The book is of great relevance to those who are interested in Russian European and Asian history area studies *Theosophy and the Woman's Movement* Charlotte Despard,1913 The president of London's Women's Freedom League describes the women's movement as part of an overall social movement to affect political economic and social change **Gurdjieff and Orage** Paul Beekman Taylor,2001-03-01 This title provides a glimpse into the nature of the thought of two influential men and the origins of the spiritual path they taught Known as esoteric teachers Gurdjieff especially is well known in the West to those who follow the occult tradition
