**Physicalism and Mental Causation** Sven Walter, Heinz-Dieter Heckmann, 2015-11-04 Physicalism the thesis that everything there is in the world including our minds is constituted by basic physical entities has dominated the philosophy of mind during the last few decades But although the conceptual foundations of the physicalist agenda including a proper explication of notions such as causation determination realization or even physicalism itself must be settled before more specific problems e g the problems of mental causation and human agency can be satisfactorily addressed a comprehensive philosophical reflection on the relationships between the various key concepts of the debate on physicalism is yet missing This book presents a range of essays on the conceptual foundations of physicalism mental causation and human agency written by established and leading authors in the field

Qualia and Mental Causation in a Physical World Terence Horgan, Marcelo Sabates, David Sosa, 2015-03-05 How does mind fit into nature Philosophy has long been concerned with this question No contemporary philosopher has done more to clarify it than Jaegwon Kim a distinguished analytic philosopher specializing in metaphysics and philosophy of mind With new contributions from an outstanding line up of eminent scholars this volume focuses on issues raised in Kim's work The chapters cluster around two themes first exclusion supervenience and reduction with attention to the causal exclusion argument for which Kim is widely celebrated and second phenomenal consciousness and qualia with

attention to the prospects for a functionalist account of the mental This volume is sure to become a major focus of attention and research in the disciplines of metaphysics and philosophy of mind      **Philosophy of Mind** John Heil,2004-06-01

Philosophy of Mind A Contemporary Introduction is a comprehensive and accessible survey of main themes positions and debates in philosophy of mind John Heil introduces and discusses the major topics in succinct user friendly self contained chapters Cartesian dualism Descartes s legacy non Cartesian dualism behaviorism the identity theory functionalism the representational theory of mind qualia radical interpretation the intentional stance eliminativism property dualism mind and metaphysics the mind s place in nature This revised and updated edition includes expanded chapters on eliminativism qualia and the representational theory of mind and an entirely new chapter on property dualism There are annotated suggestions for further reading at the end of each chapter updated to include recent material and internet resources      The Bloomsbury

Companion to Philosophy of Mind James Garvey,2015-06-18 Featuring thirteen specially commissioned chapters on core subjects The Bloomsbury Companion to Philosophy of Mind is an essential tool for all those studying and working in the field purpose built for use on courses in this area of philosophy Beginning with How to Use this Book the Companion includes overviews of perennial problems and new directions in contemporary philosophy of mind an extended glossary of terms for quick reference a detailed chronology a guide to research for ongoing study and a comprehensive bibliography of key classic and contemporary publications in the philosophy of mind From new questions concerning qualia representation embodiment and cognition to fresh thinking about the long standing problems of physicalism dualism personal identity and mental causation this book is an authoritative survey of the latest research from experts in one of the most active areas of philosophical inquiry      **Physicalism and the Mind** Robert Francescotti,2014-09-18 This book addresses a tightly knit

cluster of questions in the philosophy of mind There is the question Are mental properties identical with physical properties An affirmative answer would seem to secure the truth of physicalism regarding the mind i e the belief that all mental phenomena obtain solely in virtue of physical phenomena If the answer is negative then the question arises Can this solely in virtue of relation be understood as some kind of dependence short of identity And answering this requires answering two further questions Exactly what sort of dependence on the physical does physicalism require and what is needed for a property or phenomenon to qualify as physical It is argued that multiple realizability still provides irresistible proof especially with the possibility of immaterial realizers that mental properties are not identical with any properties of physics chemistry or biology After refuting various attempts to formulate nonreductive physicalism with the notion of realization a new definition of physicalism is offered This definition shows how it could be that the mental depends solely on the physical even if mental properties are not identical with those of the natural sciences Yet it is also argued that the sort of psychophysical dependence described is robust enough that if it were to obtain then in a plausible and robust sense of physical mental properties would still qualify as physical properties      **Fundamental Causation** Christopher Gregory Weaver,2018-08-06

Fundamental Causation addresses issues in the metaphysics of deterministic singular causation the metaphysics of events property instances facts preventions and omissions as well as the debate between causal reductionists and causal anti reductionists The book also pays special attention to causation and causal structure in physics Weaver argues that causation is a multigrade obtaining relation that is transitive irreflexive and asymmetric When causation is singular deterministic and such that it relates purely contingent events the relation is also universal intrinsic and well founded He shows that proper causal relata are events understood as states of substances at ontological indices He then proves that causation cannot be reduced to some non causal base and that the best account of that relation should be unashamedly primitivist about the dependence relation that underwrites its very nature The book demonstrates a distinctive realist and anti reductionist account of causation by detailing precisely how the account outperforms reductionist and competing anti reductionist accounts in that it handles all of the difficult cases while overcoming all of the general objections to anti reductionism upon which other anti reductionist accounts falter This book offers an original and interesting view of causation and will appeal to scholars and advanced students in the areas of metaphysics philosophy of science and philosophy of physics

*Talking About Nothing* Jody Azzouni,2010-09-30 This book reconfigures metaphysics and the role of metaphysics in semantics in radical ways that allow the accommodation of our ordinary ways of speaking of what does not exist while retaining the absolutely crucial presupposition that such objects exist in no way at all have no properties and so are not the truth makers for the truths and falsities that are about them

**Faith, Reason, and Culture** George Karuvelil,2020-07-24 In this book George Karuvelil seeks to establish the rationality of religion and theology in the contemporary world Theology has always required some philosophical basis Moreover Christian theology has had a dynamic character that enabled it to adapt to more than one philosophy depending on the need of the time For instance it shifted in accordance with the change from Neo Platonism to Aristotelianism in the thirteen century However this dynamism has been absent since the dawn of modernity when reason

became identified with modern science to disastrous results While the advent of postmodernism has brought the limits of modernism to light it has done nothing to establish the rationality of religion other than to treat religion as a cultural phenomenon along with science This book conceives fundamental theology as a discipline that seeks religious truth in the midst of diverse perspectives ranging from militant atheism to violent religious fanaticism *Metaphysics of Mind: Oxford Bibliographies Online Research Guide* Oxford University Press,2010-06-01 This ebook is a selective guide designed to help scholars and students of social work find reliable sources of information by directing them to the best available scholarly materials in whatever form or format they appear from books chapters and journal articles to online archives electronic data sets and blogs Written by a leading international authority on the subject the ebook provides bibliographic information supported by direct recommendations about which sources to consult and editorial commentary to make it clear how the cited sources are interrelated related This ebook is a static version of an article from Oxford Bibliographies Online

**The Structure of Objects**  
Kathrin Koslicki,2008-04-17 The objects we encounter in ordinary life and scientific practice cars trees people houses molecules galaxies and the like have long been a fruitful source of perplexity for metaphysicians The Structure of Objects gives an original analysis of those material objects to which we take ourselves to be committed in our ordinary scientifically informed discourse Koslicki focuses on material objects in particular or as metaphysicians like to call them concrete particulars i e objects which occupy a single region of space time at each time at which they exist and which have a certain range of properties that go along with space occupancy such as weight shape color texture and temperature The Structure of Objects focuses in particular on the question of how the parts of such objects assuming that they have parts are related to the wholes which they compose [Towards a New Scientific Realism](#) Jan Voosholz,2025-08-30 This book presents an argument for a new type of scientific realism beyond naturalism correlationism and what the author terms objective realism To achieve this positive philosophical proposal Jan Voosholz develops a thorough critique of current debates surrounding realism and antirealism in philosophy of science as well as those concerning new and speculative realism Moreover in order to provide a new outlook for the philosophy of the natural sciences this book advances and introduces decisive arguments to that debate from speculative and new realist discussions in ontology and epistemology Consequently it develops a unique starting point for a pluralistic philosophy of nature Any proponent or adversary of new speculative perspectival or pragmatic realism ontic or epistemic structural realism scientific pluralism feminist or structural empiricism selective scepticism non reductive or reductive naturalism with an interest in general philosophy of science should take the careful reconstruction of the debates and the novel arguments presented in this book into account Readers interested in philosophy and the sciences

with an interest in these areas of theoretical philosophy will find in this book an informative and comprehensive outline of the state of the art in the epistemology and ontology of the natural sciences      **The Philosophy of Mind** Dale

Guta,2018-07-20 This book aims to show the centrality of a proper ontology of properties in thinking about consciousness Philosophers have long grappled with what is now known as the hard problem of consciousness i e how can subjective or

qualitative features of our experience such as how a strawberry tastes arise from brain states More recently philosophers have incorporated what seems like promising empirical research from neuroscience and cognitive psychology in an attempt to bridge the gap between measurable mental states on the one hand and phenomenal qualities on the other In *Consciousness and the Ontology of Properties* many of the leading philosophers working on this issue as well as a few emerging scholars have written 14 new essays on this problem The essays address topics as diverse as substance dualism mental causation the metaphysics of artificial intelligence the logic of conceivability constitution extended minds the emergence of consciousness and neuroscience and the unity and neural correlates of consciousness but are nonetheless unified in a collective objective the need for a proper ontology of properties to understand the hard problem of consciousness both on non empirical and empirical grounds
