Inhaltsangabe Einleitung Die derzeitige wirtschaftliche Situation ist recht instabil und die Entwicklung auf dem wirtschaftlichen und sozialen Sektor wird zunehmend unvorhersehbarer Es herrscht eine starke Dynamik auf den Märkten

vor Konjunkturelle Schwankungen treten in immer kürzeren Abständen auf und zwingen die Unternehmen zu immer schnelleren Reaktionen auf die eingetretenen Änderungen. Im Zuge der Globalisierung steigt die internationale Konkurrenz, aber auch die internationale Zusammenarbeit zwischen den Unternehmen, um eine globale Präsenz zu erreichen oder eine bereits bestehende Marktposition zu verstärken. Märkte definieren sich nicht länger durch nationale Grenzen, sondern durch die Fähigkeit eines Unternehmens, seine Zielgruppe global anzusprechen und die Nachfrage zu befriedigen. Der Wandel vom Verkäufermarkt zum Käufermarkt, besonders auf dem Konsumgüter- und Investitionsgütersektor, zwingt die Unternehmen zu einem hohen Maß an Flexibilität, einer optimalen eigenen Organisation und einer starken Reaktions- und Innovationsbereitschaft, wenn sie den Wünschen der Kunden nach neuen Produkten, steigenden Qualitätsansprüchen und sinkenden Preisen nachkommen wollen. Die Preissituation auf den Märkten verschärft sich und führt zu einem Kostendruck auf nahezu alle Unternehmensbereiche, dem die Unternehmen durch das Eingehen von Kollaboration entlang der Wertschöpfungskette entgegenwirken wollen. Der Trend geht immer mehr zu kundenindividuellen Produkten. Im Zeitalter des Internets versuchen die Unternehmen, die Kunden zielgenau mit ihren Produkten durch Werbung anzusprechen. Produkte und Dienstleistungen werden nicht mehr als Massengüter hergestellt, sondern werden auf die individuellen Kundenwünsche zugeschnitten. Wollen Unternehmen im globalen Wettbewerb bestehen, so sind sie gefordert, stets auf dem neuesten Stand der Technik zu sein und neue Innovationen bzw. innovative Produkte zu entwickeln, da sowohl die Innovationen als auch die Produktlebenszyklen immer kürzer werden. Die Fähigkeit zur Innovation ist zum kritischen Erfolgsfaktor der Unternehmen geworden. Auch gewinnt der Faktor Zeit zunehmend an Bedeutung. Neben der Qualität und dem Preis ist für die Kunden eine schnelle Verfügbarkeit der Produkte wichtig. Die Unternehmen sind gezwungen, die time to market und die time to customer so kurz wie möglich zu gestalten, um den Wünschen ihrer Kunden gerecht zu werden. Durch die abnehmende Wertschöpfungstiefe gewinnt die *Emerging Applications in Supply Chains for Sustainable Business Development* (Kumar, M. Vijaya, Putnik, Goran D., Jayakrishna, K., Pillai, V. Madhusudanan, Varela, Leonilde, 2018-09-07) The application of sustainability practices at the system level begins with the supply chain. In the business realm, incorporating such practices allows organizations to redesign their operations more effectively. *Emerging Applications in Supply Chains for Sustainable Business Development* is a pivotal reference source that provides vital research on the models, strategies and analyses that are essential for developing and managing a sustainable supply chain. While highlighting topics such as agile manufacturing and the world food crisis, this publication is ideally designed for business managers, academicians, business practitioners, researchers, academicians and students seeking current research on sustainable supply chain management. **Supply Chain Management and Advanced Planning** (Hartmut Stadtler, Christoph Kilger, 2007-10-25) With a wealth of updated material, rewritten chapters and additional case studies, this fourth edition of a hugely important work gives a broad and up-to-date overview of the concepts underlying APS. Special emphasis is given to modeling supply chains and implementing APS.

successfully in industrial contexts What s more readers understanding is enhanced by several case studies covering a wide range of industrial sectors What makes this book so crucial is that Supply Chain Management Enterprise Resources Planning ERP and Advanced Planning Systems APS are concepts that must be mastered in order to organize and optimize the flow of goods materials information and funds Here leading experts provide insights into the concepts underlying APS *Dynamic Supply Chain Alignment* John Gattorna,2009 In the 21st Century business environment where extended organizations rely on suppliers outsourced partners and alliances the supply chain IS the business Now in the follow up to his hugely successful Strategic Supply Chain Alignment called Dynamic Supply Chain Alignment John Gattorna explores how to create and sustain multiple supply chains with a level of flexibility and responsiveness that allow you to respond to opportunities and threats how to align your suppliers your partners AND your customers Collaborative Planning, Forecasting, and Replenishment (CPFR) Markus Diederichs,2009-07-20 Seminar paper from the year 2009 in the subject Business economics Miscellaneous grade A San Diego State University course Seminararbeit im MBA Studiengang language English abstract Today s business environment is facing more challenges than it has ever faced before Whether it be globalization shorter product life cycles industry wide consolidations or the rapid advancements that have been made in information technology all these factors have contributed to a steady increase in competitive pressure on domestic and foreign markets In an economy that is increasingly becoming more volatile organizations find it more difficult to achieve or maintain their competitive advantage A way of overcoming these challenges and establishing advantages has been through optimization of the supply chain Initially these improvement efforts were limited to areas within the organization such as inventory quality or the manufacturing process itself In the early nineties however when the American retail and consumer goods industry was experiencing stagnating revenues and at the same time rising costs an increase in productivity was hardly to be realized At that time aggressive pricing policies were seen as the only approach to gain market share but the consequences mainly a negative impact on margins and profits made it an unsustainable business practice Seifert 2003 This led the retail industry to recognize that real gains could only be realized through open cooperative partnerships between retailers and manufacturers As the supply chain improvement initiatives progressed they began to include collaboration between the manufacturer its suppliers and clients Although collaboration between trading partners was known as an efficient method for improving forecast accuracy increasing service and reducing costs it was not until then that supply chain partners systematically devised processes that would move the information to where it could add value and thereby facilitate supply chain coordination Since then collaboration has been referred to as the driving force behind effective supply chain management Horvath 2001 One of the latest trends in supply chain management CPFR is advertized by many authors consultants and software vendors as one of the most promising practices of collaboration so far Ireland Crum 2005 The purpose of this paper is to examine the validity of this statement In doing so it will analyze the success potential associated with CPFR and based on pilot results evaluate the

benefits and challenges that arise with its implementation
