

THE INFORMATION & COMMUNICATIONS TECHNOLOGY (ICT) INDUSTRY

What is the ICT Industry?

The information and communications technology (ICT) industry relates to the creation and use of technological based systems within specific ICT related workplaces, as well as supporting the use and maintenance of technology across all other industries. The industry conducts research and generates tools and services which helps aid individuals who work across industries in relation to their workflow and communications.

ICT Specific Workplaces

Specific workplaces within the ICT industry may be related to:

- Research and developing into technology.
- Computer science.
- Software development.
- Project management in the development of new systems for specific workplaces.
- Help desk support and service for users of different technologies.
- Administration and maintenance for supporting technology in workplaces.
- Retail in the selling of ICT related products to customers.

Industries that Use ICT

As stated, ICT is not just an industry of itself, but a foundation industry that develops tools and services that aids all other industries. Some of these industries include:

- Education
- Health
- Business & Finance
- Hospitality
- Retail

These industries are supported by ICT tools which allow them to have an online presence on the internet, communicate with peers and client, share information and conduct business transactions through making online sales.

Supporting Information And Communications Technology:

EBOOK: Supporting ICT in the Early Years John Siraj-Blatchford, David Whitebread, 2003-10-16 This book is an excellent resource for gaining understanding about the fundamental principles of ICT in the Foundation Stage curriculum. The principles of good practice in this book will not be outdated by new products or trends. The book is a well balanced blend of theory and application. It has certainly helped to provoke and resolve ideas about the use of ICT in our settings. Nursery World. This book helps readers understand how very young children from birth to six develop an early awareness and subsequently develop their knowledge skills and understandings of information and communication technologies (ICTs). The rapid growth of ICT has prompted concerns among parents, educators and policy makers over the suitability of many educational applications and electronic toys for young children. However, evidence is presented to show that the use of ICT by young children is compatible with the principles of a developmentally appropriate curriculum (DAC). In fact, the authors argue that used imaginatively, many applications of ICT can make a significant and unique contribution to children's social and cognitive development. This is a significant book for students, parents, carers, teachers and other professionals who want to provide a rich learning environment in education and in teaching and supervising research in the early years. *Supporting Information and Communications Technology* Mike Farmer, Gina Farmer, 2013-12-19 First Published in 2001. This practical guide supports classroom assistants in the use of ICT. It provides support in the practical issues linked to using a computer and other ICT equipment in the classroom, use of early years software linked to National Curriculum and Early Learning Goals, outcomes, use of ICT in literacy, numeracy, science, art and design, and children with special educational needs, personal use of ICT linked to where it can contribute to classroom practice. It can be used as a stand alone guide or in conjunction with study on classroom assistant training programmes. **Supporting ICT in the Early Years** John Siraj-Blatchford, David Whitebread, 2003-10-01 The primary aim of this new volume in the Supporting Early Learning series is to help readers understand how very young children from birth to six develop an early awareness and subsequently develop their knowledge skills and understandings of information and communication technologies (ICTs). The rapid growth of ICT has prompted concerns among parents, educators and policy makers over the suitability of many educational applications and electronic toys for young children. However, evidence is presented to show that the use of ICT by young children is compatible with the principles of a developmentally appropriate curriculum (DAC). In fact, the authors argue that used imaginatively, many applications of ICT can make a significant and unique contribution to children's social and cognitive development. The authors show how parents and other carers, teachers and other professionals are already providing a rich learning environment in this area of experience.
