Striving for Excellence ,2000 Each vol a compilation of ERIC digests **Cutting through Complexity** Amy-Jane A. Gielen,2025-10-01 Programmes and interventions to counter violent extremism CVE have become widespread across Europe CVE is a relatively new and very complex phenomenon The term itself has become a contested catch phrase for a broad array of interventions targeting different populations at different stages in the radicalization process The complexity of CVE has resulted in a serious lack of evaluations in the field Those few evaluations that we can draw upon are very heterogeneous both in terms of evaluation method and the type of interventions that they address It is therefore impossible to make any grounded statements on the effectiveness of CVE Academia thus has little theoretical basis for adequately advising the policy and practitioner community on the best course of action We are thus in need of an evaluation method that can accommodate the complexity of CVE while providing an authoritative basis for new evaluations and at the same time exposing incorrect or too limited normative assumptions in CVE policy We also require a meta analysis method for synthesizing the variety of evaluations available to produce generic insights This study applies and further develops realistic evaluation and realist review to provide an evaluation and synthesis method for complex social programmes such as CVE The

end result is heuristic development of the realistic evaluation method which provides a basis for future CVE evaluation studies The dissertation also provides insights on relevant contexts and mechanisms in CVE which will help policymakers further develop their CVE programmes *Resources in Education* ,1998
