Cancer in Context James Brennan, Clare Moynihan, 2004 This book offers healthcare professionals academics and anyone affected by cancer a fresh and original approach to the supportive care of people with cancer It looks at the underlying reasons why cancer so often leads to high levels of distress and more importantly it suggests many practical ways distress can be minimised and prevented The actual experiences of cancer patients as recorded in their personal diaries are combined with theory research and practical clinical advice In each of its seven chapters *Cancer in Context* takes a different perspective towards supportive care in cancer It begins by considering how people in general manage and adjust to massive changes in their lives and in particular how they react to the threat of cancer It goes on to examine the lived experience of people with cancer as they negotiate the many changes and challenges that follow their diagnosis Of course cancer doesn't only affect the person who has the disease it also impacts on families partners and carers One chapter explores these and other issues such as sexual difficulties the needs of older people single people and gay and lesbian couples Chapter 4 shows that the social and cultural context of a person's life is critical to understanding their resources the way they are treated and the responses they make to serious illness However it is in the clinical context that professionals have an opportunity to minimise disruption to their patients quality of life as they endure the notorious demands of oncology treatments The book offers practical clinical advice

on psychosocial aspects of conventional cancer treatments common treatment difficulties cancer rehabilitation and palliative care Chapter 6 provides a summary of the burgeoning area of information and communication skills within healthcare and finally the book ends by considering how doctors nurses radiographers and other healthcare professionals can maintain their supportive care in light of such high levels of stress and burnout among these staff groups

Issues in Supportive Care of Cancer Patients Donald J. Higby, 2012-12-06

The UK Association of Supportive Care in Cancer Handbook of Supportive Oncology Richard Berman, Ben Heyworth, Ashique Ahamed, 2025-05-19

What does supportive oncology do that palliative care doesn't already do? Answering that question forms part of the rationale behind this text. Supportive oncology is delivered across the whole cancer experience from diagnosis through treatment to post treatment care and so necessitates the involvement of most clinical specialties and many non clinical services. Palliative care which focuses on advanced disease and end of life has a special and important role within this broader and longer term scope of supportive care in cancer. This handbook defines the new and emerging specialty of supportive oncology and equips the workforce with the appropriate skill sets. Providing personalized and targeted treatments consistent with the stage of disease. A focus on preservation and improvement in quality of life. Affecting survival and the quality of that survival. Permitting the use of the most effective anti cancer agents. Assisting in accurate diagnosis and management.

The Cancer Patient and Supportive Care Donald J. Higby, 2012-12-06

During the course of editing *Supportive Care in Cancer Therapy* Martinus Nijhoff Publishers 1983 it became apparent that several topics would have to await a second volume. Furthermore development of new information and evolution of ideas continues. This volume continues the intent of the first to present reviews of issues relating to supportive care and to identify areas where further definition and further research is needed. The physician reading this volume will find the contents thought provoking. In addition to reviews authored by physicians there are chapters authored by non physicians who present a different perspective and a different style of writing. Reverend Bigler writes from his long experience as a chaplain for cancer patients and tries to identify the changes that take place in the personality of the chaplain who works with dying patients. Ms Kilion and Ms Powell try to describe what an Oncology Nurse is rather than what one does. Attorneys Reese and Price present a very practical summation of issues which face the cancer patient and their chapter could easily be copied and offered to one's patients. Furthermore this chapter gives direction to the physician who is frequently called upon for advice regarding issues which lie entirely outside his/her formal training. Excellent reviews on more medical subjects are here. Cancer in the Elderly should provoke oncologists to re-examine their approach to the geriatric patient.

Orofacial Supportive Care in Cancer Raj Nair, 2022-01-31

This easy to use book equips clinicians and health care professionals with all the information that they will require in order to identify and manage orofacial complications of cancer therapy.
