Keeping Faith with Nature Robert B. Keiter,2008-10-01 As the twenty first century dawns public land policy is entering a new era This timely book examines the historical scientific political legal and institutional developments that are changing management priorities and policies developments that compel us to view the public lands as an integrated ecological entity and a key biodiversity stronghold Once the background is set each chapter opens with a specific natural resource controversy ranging from the Pacific Northwest s spotted owl imbroglio to the struggle over southern Utah s Colorado Plateau country Robert Keiter uses these case histories to analyze the ideas forces and institutions that are both fomenting and retarding change Although Congress has the final say in how the public domain is managed the public land agencies federal courts and western communities are each playing important roles in the transformation to an ecological management regime At the same time a newly emergent and homegrown collaborative process movement has given the public land constituencies a greater role in administering these lands Arguing that we must integrate the new imperatives of ecosystem science with our devolutionary political tendencies Keiter outlines a coherent new approach to natural resources policy Reconciling Environment and Trade Edith Brown Weiss,John H. Jackson,Nathalie Bernasconi-Osterwalder,2008-09-30 The volume focuses on five cases all of which remain cornerstone trade environment cases of the WTO The subject matter of these cases reflects five basic issues in the clash between trade and the environment public health air pollution ozone depletion food safety destruction of endangered species and biosafety These five issues surface dramatically in international disputes over tobacco reformulated gasoline beef growth hormones commercial fishing methods and genetically modified organisms In the second edition of this book Nathalie Bernasconi Osterwalder joins the

original editors to update and contextualize the five case studies in new introductions to each section These introductions provide an overview of developments since the first edition including subsequent related cases The second edition also includes updated bibliographic materials In their penetrating analyses of these cases and their vast implications the authors take into account the entire disciplines of both trade law and environmental law noting especially the points of friction between the multilateral instruments in each field and the developing jurisprudence of the WTO Dispute Settlement with regard to the exceptions specified in Article XX of the GATT The articulated standpoints of all parties governments and NGOs on both sides of the controversy are probed for agendas whether stated or unstated No one involved in international trade or environmental activism can afford to ignore this vital publication The information it provides on WTO jurisprudence on current and pending environmental initiatives on the science behind the disputes no less than the fresh and convincing analysis it holds forth make it an essential tool for understanding some of the most crucial issues in international law today
