

Sur les routes au Moyen Âge

Des voyages longs et difficiles

À cheval, les voyageurs les plus rapides parcourent 70 km par jour. Les charrettes tirées par des bœufs n'avancent que de 5 km par jour ! Il faut environ 1 mois pour rejoindre le sud de la France au départ de Paris.

Les pèlerins

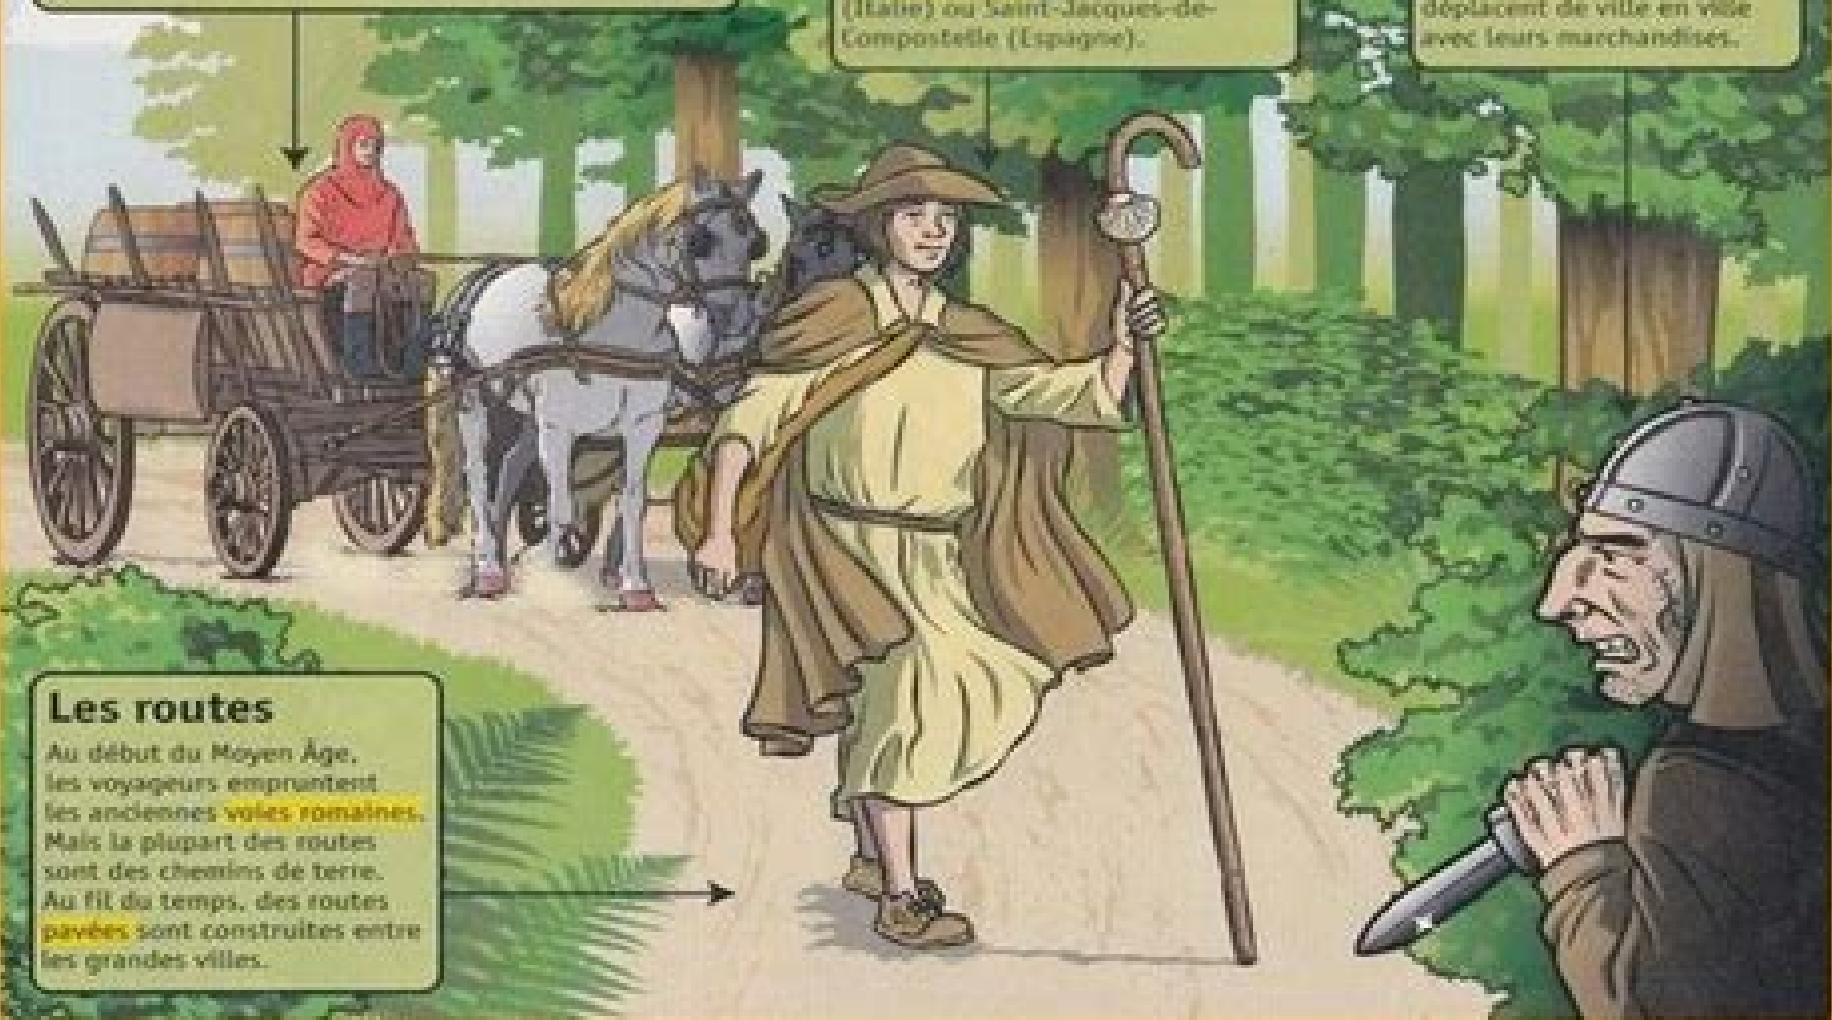

Pour prouver leur croyance en Dieu, de nombreuses personnes effectuent des pèlerinages. Ce sont de longs voyages à pied vers des **lieux saints**, comme Rome (Italie) ou Saint-Jacques-de-Compostelle (Espagne).

Les brigands

Dans certaines régions, des brigands attaquent les voyageurs pour les voler. Ils **détroussent** par exemple les commerçants qui se déplacent de ville en ville avec leurs marchandises.

Les routes

Au début du Moyen Âge, les voyageurs empruntent les anciennes **voies romaines**. Mais la plupart des routes sont des chemins de terre. Au fil du temps, des routes **pavées** sont construites entre les grandes villes.

The Medieval Peutinger Map Emily Albu, 2014-08-29 The Peutinger Map remains the sole medieval survivor of an imperial world mapping tradition It depicts most of the inhabited world as it was known to the ancients from Britain's southern coastline to the farthest reaches of Alexander's conquests in India showing rivers lakes islands and mountains while also naming regions and the peoples who once claimed the landscape Onto this panorama the mapmaker has plotted the ancient Roman road network with hundreds of images along the route and distances marked from point to point This book challenges the artifact's self presentation as a Roman map by examining its medieval contexts of crusade imperial ambitions and competition between the German Roman Empire and the papacy

Internal Colonization in Medieval Europe Felipe Fernandez-Armesto, James Muldoon, 2017-05-15 Around the year 1000 Rodulfus Glaber described France as being in the throes of a building boom He may have been the first writer to perceive the early medieval period as a Dark Age that was ending to be replaced by a better world In the articles gathered here distinguished medieval historians discuss the ways in which this transformation took place European society was becoming more stable the climate was improving and the population increasing so that it was necessary to increase food production These circumstances in turn led to the cutting down of forests the draining of wetlands and the creation of pastures on higher elevations from which the glaciers had retreated New towns were established to serve as economic and administrative centers These developments were witness to the processes of internal colonization that helped create medieval Europe

Between Saint James and Erasmus: Studies in Late-Medieval Religious Life - Devotion and Pilgrimage in the Netherlands Jan van Herwaarden,2021-10-25

This volume is divided into four sections late medieval devotion in the Netherlands medieval Christian pilgrimage the medieval cult of St James the Great and Erasmiana Variety and coherence sound the keynote in the title and the contents of the book Religious concepts and expressions of religious faith such as pilgrimages and indulgences are representative of late medieval Christianity In this book they refer specifically to the medieval cult of St James the Great while for Erasmus they were an object of his critical consideration The whole book can be read in the light of the debate about the tension between an appreciation for outward signs of faith and the inward experience of religious belief which Erasmus considered an absolute necessity *Medieval Warfare 1000-1300* John France,2017-05-15 The study of medieval warfare has developed enormously in recent years The figure of the armoured mounted knight who was believed to have materialized in Carolingian times long dominated all discussion of the subject It is now understood that the knight emerged over a long period of time and that he was never alone on the field of conflict Infantry at all times played a substantial role in conflict and the notion that they were in some way invented only in the fourteenth century is no longer sustainable Moreover modern writers have examined campaigns which for long seemed pointless because they did not lead to spectacular events like battles As a result we now understand the pattern of medieval war which often did not depend on battle but on exerting pressure on the opponent by economic warfare This pattern was intensified by the existence of castles and careful study has revealed much about their development and the evolving means of attacking them Crusading warfare pitted westerners against a novel style of war and affords an opportunity to assess the military effectiveness of European methods New areas of study are now developing The logistics of medieval armies was always badly neglected while until very recently there was a silence on the victims of war Assembled in this volume are 31 papers which represent milestones in the development of the new ideas about medieval warfare set in context by an introductory essay *Viajes y viajeros en la Europa medieval* Joaquín M. Córdoba Zoilo,2007 **An**

In Search of the Unknown in Medieval Architecture John James, 2007-12-31 John James is an Australian architect and medieval historian Since 1969 he has been searching for the origins of the Gothic style beginning with a five year study of Chartres cathedral At that time there were no coherent techniques for analysing the detailed construction history of existing stone structures This he created He expanded his research to include all the early Gothic churches in the Paris region with a three year survey of over 3500 buildings His most important discovery has been that all churches of this period were constructed in many short campaigns by mobile building teams and that major innovation was more likely to occur in the smaller buildings than in the larger This volume makes available 42 of the author's studies on the development of Gothic architecture in France

The Art, Science, and Technology of Medieval Travel Robert Odell Bork, Andrea Kann, 2008 This sixth volume in the AVISTA series considers medieval travel from a variety of interdisciplinary perspectives placing the physical practice of transportation in the larger context of medieval thought about the world and its meaning The papers included cover vehicle design and logistical management the practicalities of how travellers oriented themselves and the symbolism of the landscapes and maps created in the Middle Ages

Urban Panegyric and the Transformation of the Medieval City, 1100-1300 Paul Oldfield, 2018-12-27 This study offers the first extensive analysis of the function and significance of urban panegyric in the Central Middle Ages a flexible literary genre which enjoyed a marked and renewed popularity in the period 1100 to 1300 In doing so it connects the production of urban panegyric to major underlying transformations in the medieval city and explores praise of cities primarily in England Flanders France Germany Iberia and Italy including the South and Sicily The volume demonstrates how laudatory ideas on the city appeared in extremely diverse textual formats which had the potential to interact with a wide audience via multiple textual and material sources When contextualized within the developments of the twelfth and thirteenth centuries these ideas could reflect more than formulaic rhetorical outputs for an educated elite they were instead integral to the process of urbanisation In *Urban Panegyric and the Transformation of the Medieval City 1100 1300* Paul Oldfield assesses the generation of ideas on the Holy City on counter narratives associated with the Evil City on the inter relationship between the City and abundance primarily through discourses on commercial productivity hinterlands and population size on landscapes and sites of power and on knowledge generation and the construction of urban histories Urban panegyric can enable us to comprehend more deeply material functional and ideological change associated with the city during a period of notable urbanization and importantly how this change might have been experienced by contemporaries This study therefore highlights the importance of urban panegyric as a product of and witness to a period of substantial urban change In examining the laudatory depiction of medieval cities in a thematic analysis it can contribute to a deeper understanding of civic identity and its important connection to urban transformation

Pour une histoire des Alpes, Moyen Age et Temps Modernes Jean-François Bergier, 2024-10-28 The

Alps as Professor Bergier shows in this selection of his work should not be considered an impassable barrier nor an isolated region but rather as an integral part of the history of Europe The lowlanders typical view of the mountains as fearful heights to be crossed and the image of those who lived there as existing in a delicate balance with nature are part only of the story These articles are particularly concerned with transalpine traffic and the different routes it took in response to changing circumstances in the lands to south and north and with the exploitation and use of mountain resources A number aim also to identify the particularities of the mountain way of life and its social and political organisation

Espaces et Réseaux du Haut Moyen âge Maurice Lombard, 1973

Eclecticism in Late Medieval Visual Culture at the Crossroads of the Latin, Greek, and Slavic Traditions Maria Alessia Rossi, Alice Isabella Sullivan, 2021-11-22 This volume builds upon the new worldwide interest in the global Middle Ages It investigates the prismatic heritage and eclectic artistic production of Eastern Europe between the fourteenth and seventeenth centuries while challenging the temporal and geographical parameters of the study of medieval Byzantine post Byzantine and early modern art Contact and interchange between primarily the Latin Greek and Slavic cultural spheres resulted in local assimilations of select elements that reshaped the artistic landscapes of regions of the Balkan Peninsula the Carpathian Mountains and further north The specificities of each region and in modern times politics and nationalistic approaches have reinforced the tendency to treat them separately preventing scholars from questioning whether the visual output could be considered as an expression of a shared history The comparative and interdisciplinary framework of this volume provides a holistic view of the visual culture of these regions by addressing issues of transmission and appropriation as well as notions of cross cultural contact while putting on the global map of art history the eclectic artistic production of Eastern Europe

The New Cambridge Medieval History: Volume 5, C.1198-c.1300 Rosamond McKitterick, David Abulafia, 1995 Sample Text

Thinking Medieval Romance Katherine C. Little, Nicola McDonald, 2018-10-17 Medieval romances with their magic fountains brave knights and beautiful maidens have come to stand for the Middle Ages more generally This close connection between the medieval and the romance has had consequences for popular conceptions of the Middle Ages an idealized fantasy of chivalry and hierarchy and also for our understanding of romances as always already archaic part of a half forgotten past And yet romances were one of the most influential and long lasting innovations of the medieval period To emphasize their novelty is to see the resources medieval people had for thinking about their contemporary concern and controversies whether social order Jewish Christian relations the Crusades the connectivity of the Mediterranean women s roles as mothers and how to write a national past This volume takes up the challenge to think romance investigating the various ways that romances imagine reflect and describe the challenges of the medieval world

The Spiritual Expansion of Medieval Latin Christendom: The Asian Missions James D. Ryan, 2017-03-02 During the thirteenth and fourteenth centuries religious zeal nourished by the mendicants sense of purpose motivated Dominican and Franciscan friars to venture far beyond Europe s cultural frontiers to spread their

Christian faith into the farthest reaches of Asia Their incredible journeys were reminiscent of heroic missionary ventures in earlier eras and far more exotic than evangelization during the tenth through twelfth centuries when the western church Christianized Eastern Europe and Scandinavia This new mission effort was stimulated by a variety of factors and facilitated by the establishment of the Mongol Empire and as the fourteenth century dawned missionaries entertained fervent but vain hopes of success within khanates in China Central Asia Persia and Kipchak The reports these missionaries sent back to Europe have fascinated successive generations of historians who analyzed their travels and struggled to understand their motives and aspirations The essays selected for this volume drawn from a range of twentieth century historians and contextualized in the introduction provide a comprehensive overview of missionary efforts in Asia and of the developments in the secular world that both made them possible and encouraged the missionaries hopes for success Three of the studies have been translated from French specially for publication in this volume
