Seascapes: Shaped by the Sea Mike Brown, Barbara Humberstone, 2016-04-01 Despite the fact that the sea covers 70 per cent of the Earth's surface and is integral to the workings of the world it has been largely neglected or perceived as marginal in modern consciousness This edited collection disrupts notions of the sea as other as foreign and featureless through specific situated accounts which highlight the centrality of the sea for the individuals concerned Bringing together academics who combine scholarly expertise with lived experiences on in and with the sea it examines humans relationships with the sea Through the use of auto ethnographic accounting the contributors reflect on how the sea has shaped their sense of identity belonging and connection They examine what it is to be engaged with the sea and narrate their lived sentient corporeal experiences The sea is a cultural seascape just as it is physical reality The sea shapes us and we in turn attempt to shape it as we construct various versions of it that reflect our on going and mutable relationship with it The use of embodied accounts as a way of conveying lived experiences and the integration of relevant theoretical frames for understanding the broader cultural implications provide new opportunities to understand seascapes

Caving, Canyoning, Coasteering.... Patrick Kinsella, 2023-07-05 You don't need to be ultra fit or highly experienced in the outdoors to enjoy outdoor guru Patrick Kinsella's selection of 30 activities across Britain. A sense of adventure and an explorer's heartbeat is all that's required, he says, and he should know, having spent two decades walking, running, riding, paddleboarding, swimming, canoeing, kayaking, and more besides in all corners of the country. Bradt's *Caving Canyoning Coasteering* is both an atlas of adventure and a book of secrets, enticing readers out of their comfort zone to explore the often unseen elements and quieter corners of Britain where the wild experiences live. Some of the activities described take place on the very edges of large urban centres, easily accessible for anyone, yet even many locals don't know about them. Others happen in far-flung corners of the country, places people may never have considered exploring. This title will take you on a highly adventurous tour of Britain's extraordinary cliffs, caves, canyons, coasts, forests, fells, beaches, Munros, moors, and tors via a range of outdoor pursuits, many of which were conceived and pioneered on this island, says Kinsella. It's all about wild time spent in wonderful places, from the mysterious depths of the labyrinthine limestone underworld beneath the Mendip Hills to the top of ice-clad arêtes and snow-dusted peaks of monstrous Munros in the Scottish Highlands, via seascapes and sub-aquatic environments in Devon and Cornwall, tumbling streams and ghylls in the Lake District, and cascade-concealed caverns in the waterfall-soaked world of the Bannau Brycheiniog. Brecon Beacons in Wales. It's not for the faint of heart, but there are escapades here to excite everyone. Whether you're an experienced outdoor type or someone who's new to the outdoors but seeking guidance on where to go and what to do, a wildlife and fresh air enthusiast or an armchair traveller, a lone adventurer or family with young children, *Caving Canyoning Coasteering* is brimful of ideas. And if the adrenaline gets too much, you'll even find advice on the sedate Japanese art of forest bathing.

Adventure Sport Physiology Nick Draper, Christopher Hodgson, 2008-11-20 the most comprehensive adventure sport physiology book I am aware of, therefore I recommend it wholeheartedly. *The Sport and Exercise Scientist* March 2009. This book provides students and professionals with a well-written, accessible introduction to the science underlying a variety of adventure sports. Written specifically for this increasingly popular field of study, the text has been divided into two parts: the first provides the foundations for adventure physiology; the second, the specific physiological and environmental demands of a range of adventure sports, including kayaking, canoeing, sailing, windsurfing, climbing, mountaineering, and skiing. Written by two adventure sports performers with extensive teaching and coaching experience, this book will prove invaluable to students taking courses in adventure and outdoor education and professional instructors involved in such activities. In addition, students of sport and exercise science and physical education will find this an excellent introduction to the physiological response to exercise. Clearly explains the basic physiological principles and applies them to a variety of land and water-based sports. In full colour throughout, the book includes numerous illustrations together with key points and chapter summaries to reinforce learning. Contains original pieces from elite and high-level athletes describing the physiological demands of their particular sport in a real-world context.
