Surfaces Of Sense:

Biological Series, 1921 List of contents in most volumes **Gilles Deleuze and Poetics** Ja-Sung Oh, 2014-07-15 This book introduces a revolutionary poetics based on the philosophy of Gilles Deleuze the most famous contemporary philosopher He overturns the traditional metaphysics and aesthetics This book develops Deleuze's deep insight and vision into the new world life literature and art He is very friendly to modern and contemporary literature and art which make the inaudible audible the invisible visible Transversing his major works this book presents unique poetics overturning all the traditional poetics including Aristotle's poetics Romanticism's poetics Formalism and Structuralism's poetics contents 1 Antilogos and poem 2 Sign and poem 3 Multiplicity and poem 4 Singularity and poem 5 Ritornello and poem *The Italian Renaissance Palace Façade* Charles Burroughs, 2002-06-17 The architectural facade a crucial and ubiquitous element of traditional cityscapes addresses and enhances the space of the city while displaying or dissembling interior arrangements Burroughs traces the development of the Italian Renaissance palace facade as a cultural architectural and spatial phenomenon and as a new way of setting a limit to and defining a private sphere He draws on literary evidence and analyses of significant Renaissance buildings noting the paucity of explicit discussion of the theme in an era of extensive architectural publishing

Aging, Duration, and the English Novel Jacob Jewusiak, 2020 Argues that novelists graft aging onto narrative duration and reveals the politics of senescence in nineteenth and early twentieth century plots **Iconoclastic Theology** F. LeRon Shults, 2015-02-12 F. LeRon Shults explores Deleuze's fascination with theological themes and shows how his entire corpus can be understood as a creative atheist machine that liberates thinking acting and feeling *Minimal Surfaces, Stratified Multivarifolds, and the Plateau Problem* A. T. Fomenko, 1991-02-21 Plateau's problem is a scientific trend in modern mathematics that unites several different problems connected with the study of minimal surfaces In its simplest version Plateau's problem is concerned with finding a surface of least area that spans a given fixed one dimensional contour in three dimensional space perhaps the best known example of such surfaces is provided by soap films From the mathematical point of view such films are described as solutions of a second order partial differential equation so their behavior is quite complicated and has still not been thoroughly studied Soap films or more generally interfaces between physical media in equilibrium arise in many applied problems in chemistry physics and also in nature In applications one finds not only two dimensional but also multidimensional minimal surfaces that span fixed closed contours in some multidimensional Riemannian space An exact mathematical statement of the problem of finding a surface of least area or volume requires the formulation of definitions of such fundamental concepts as a surface its boundary minimality of a surface and so on It turns out that there are several natural definitions of these concepts which permit the study of minimal surfaces by different and complementary methods In the framework of this comparatively small book it would be almost impossible to cover all aspects of the modern problem of Plateau to which a vast literature has been devoted However this book makes a unique contribution

to this literature for the authors guiding principle was to present the material with a maximum of clarity and a minimum of formalization Chapter 1 contains historical background on Plateau s problem referring to the period preceding the 1930s and a description of its connections with the natural sciences This part is intended for a very wide circle of readers and is accessible for example to first year graduate students The next part of the book comprising Chapters 2-5 gives a fairly complete survey of various modern trends in Plateau s problem This section is accessible to second and third year students specializing in physics and mathematics The remaining chapters present a detailed exposition of one of these trends the homotopic version of Plateau s problem in terms of stratified multivarifolds and the Plateau problem in homogeneous symplectic spaces This last part is intended for specialists interested in the modern theory of minimal surfaces and can be used for special courses a command of the concepts of functional analysis is assumed

Deleuze Beyond Badiou Clayton Crockett,2013-01-22 First published in 1997 Alain Badiou s Deleuze The Clamor of Being cast Gilles Deleuze as a secret philosopher of the One In this work Clayton Crockett rehabilitates Deleuze s position within contemporary political and philosophical thought advancing an original reading of the thinker s major works and a constructive conception of his philosophical ontology Through close readings of Deleuze s *Difference and Repetition* *Capitalism and Schizophrenia* with Felix Guattari and *Cinema 2* Crockett argues that Deleuze is anything but the austere quietistic and aristocratic intellectual Badiou had portrayed Instead Crockett underscores Deleuze s radical aesthetics and innovative scientific political and mathematical forms of thought He also refutes the notion Deleuze retreated from politics toward the end of his life Using Badiou s critique as a foil Crockett maintains the profound continuity of Deleuze s work and builds a general interpretation of his more obscure formulations

The Little Crystalline Seed Iddo Dickmann,2019-05-31 Mise en abyme is a term developed from literary theory denoting a work that doubles itself within itself a story placed within a story or a play within a play The term flourished in experimental fiction in midcentury France having not only a strong impact on contemporary literary theory but also on post structuralist philosophy The Little Crystalline Seed focuses on how thinkers invoke the concept of mise en abyme in order to establish ontologies that deviate from that of Heidegger Iddo Dickmann demonstrates how the concept served in modeling Jacques Derrida s logic of supplementarity Maurice Blanchot s mechanism of *d souvrement* Gilles Deleuze s philosophy of repetition Emmanuel Levinas s concept of proximity and in further circuit the philosophies of Bergson Kant Leibniz Heidegger himself and more Exploring the interpretative and generative potential of the mise en abyme for continental thought Dickmann reveals new points of resonance between various philosophical topics including aesthetics ethics time logic mirroring play and signification

Logic Christoph Sigwart,1895 Northrop Frye and the Phenomenology of Myth Glen Robert Gill,2006-12-15 In Northrop Frye and the Phenomenology of Myth Glen Robert Gill compares Frye s theories about myth to those of three other major twentieth century mythologists C G Jung Joseph Campbell and Mircea Eliade Gill explores the theories of these respective thinkers as they relate to Frye s discussions of the phenomenological nature of myth as well as its religious literary and psychological significance Gill substantiates Frye s work as both more radical and more tenable than that of his three contemporaries Eliade s writings are shown to have a metaphysical basis that abrogates an understanding of myth as truly phenomenological while Jung s theory of the collective unconscious emerges as similarly problematic Likewise Gill argues Campbell s work while incorporating some phenomenological progressions settles on a questionable metaphysical foundation Gill shows how in contrast to these other mythologists Frye s theory of myth first articulated in *Fearful Symmetry* 1947 and culminating in *Words with Power* 1990 is genuinely phenomenological With excursions into fields such as literary theory depth psychology theology and anthropology Northrop Frye and the Phenomenology of Myth is essential to the understanding of Frye s important mythological work *Oklahoma Reports* Oklahoma.
