Technology in Retrospect Richard A. Diem, Michael J. Berson, 2010-06-01 January 2009 marked the 25th anniversary of one of the most famous three minutes of television history It was during half time of the 1984 Super Bowl that APPLE showcased its new Macintosh Computer in an avant guard commercial In the following three weeks sales of the new computer in

both the public and private sectors took off leading some to note this occasion as the true start of the information age At the same time schools joined this so called information revolution and began to use the new technology in various forms in a much more serious manner Given both the changing nature of technology as well as its classroom applications over the past quarter century this work s goal is to capture the historical trends of both use and application of information technology in the social studies during this era This is done by providing a retrospective view from 1984 through 2009 of where we ve been where we are and a view of new tools and strategies and possible studies that are emerging that can enhance our understanding of the effects that technology has and will have on the social studies **Social Studies** Christine A.

Woyshner, Association for Supervision and Curriculum Development, 2003 **Social Studies for Secondary Schools** Alan J. Singer, 2014-10-08 Now in its 4th edition this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula units lessons projects and activities A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society history and the purpose of social studies education Advocating an inquiry and activity based view of social studies teaching that respects the points of view of students and teachers and based in practice and experience it offers systematic support and open honest advice for new teachers Each chapter addresses a broad question about social studies education sub chapters begin with narrower questions that direct attention to specific educational issues Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards to work in inclusive settings and to promote literacy and the use of technology in social studies classrooms Chapters include highlighted Learning Activities Teaching Activities and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies and conclude with recommendations for further reading and links to on line essays about related social studies topics Activities are followed by four categories Think it over Add your voice to the discussion Try it yourself and It s your classroom All of these are supported with online teaching material Designed for undergraduate and graduate pre service social studies methods courses this text is also useful for in service training programs as a reference for new social studies teachers and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data driven standards based instruction especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on line material linked to the text **Internet Research** Ned L. Fielden, 2001-01-01 To many people the use of computers and the Internet as research tools is not a new concept To others though computers are a relatively recent if necessary addition to their research toolkit A lack of experience presents many difficulties for first time

users and others with limited computer know how This work a second edition to the acclaimed Internet Research Theory and Practice provides useful information for anyone who wants to broaden the range and scope of their research tools or anyone who wants to increase their knowledge about what is available electronically The author discusses the following basic methods of research using Internet protocols Internet history techniques for online searching research theory and suggestions for maximizing results mechanisms helpful in distinguishing good from bad or mediocre information and ways for individuals to improve their research skills Also included is an expanded discussion of Internet search engines and their operation issues in scholarly communication and other emerging matters and an enlarged and updated bibliography

Conference,2002 The Electronic Republic? Phillip J. VanFossen,Michael J. Berson,2008 In 1991 Lawrence Grossman wrote that a new political system is taking shape in the United States As we approach the twenty first century America is turning into an electronic republic a democratic system that is vastly increasing the people s day to day influence on decisions of state Grossman s forecast implied a sea change in the way citizens would interact with and participate in their representative government a revamping of the way Americans would do citizenship Harnessing the power of technology to promote the ideal of democracy that first pulsed through our nation over 230 years ago may be a feasible achievement in a technocratic age but whether technology can help achieve a revolution as seismic as the political one that our founding fathers initiated may be a practical impossibility Fusing the power of technology and democratic ideals opens opportunities for greater access to information and offers a medium for people to be heard and express their voice with dissemination to the masses through digital tools such as blogs podcasts and wikis Indeed the emergence of the Internet as a nearly ubiquitous element of American society has brought about new opportunities to enhance citizen engagement in democratic politics and to increase the level of civic engagement among American citizens Despite such rhetoric however research has indicated that Grossman s electronic republic has for the most part failed to come to fruition **Ethnopolitics in**

Cyberspace Robert A. Saunders,2011-01-01 Defying predictions that the Internet would eventually create a world where nations disappeared in favor of a unified global village the new millennium has instead seen a proliferation of nationalism on the Web Cyberspace a vast digital terrain built upon interwoven congeries of data and sustained through countless public private communication networks has even begun to alter the very fabric of national identity This is particularly true among stateless nations diasporic groups and national minorities which have fashioned the Internet into a shield against the assimilating efforts of their countries of residence As a deterritorialized medium that allows both selective consumption and inexpensive production of news and information the Internet has endowed a new generation of technology savvy elites with a level of influence that would have been impossible to obtain a decade ago Challenged nations from Assyrians to Zapotecs have used the Web to rewrite history engage in political activism and reinvigorate moribund languages This book explores the role of the Internet in shaping ethnopolitics and sustaining national identity among four different national groups Albanians outside of Albania Russians in the near abroad Roma Gypsies and European Muslims Accompanying these case studies are briefer discussions of dozens of other online national movements as well as the ramifications of Internet nationalism for offline domestic and global politics The author discusses how the Internet provides new tools for maintaining national identity and improves older techniques of nationalist resistance for minorities Bringing together research and methodologies from a range of fields Saunders fills a gap in the social science literature on the Internet s central role in influencing nationalism in the twenty first century By creating new spaces for political discourse alternative avenues for cultural production and novel means of social organization the Web is remaking what it means to be part of nation This
