ECAB **Pancreatic Cancer** Sun-Whe Kim, Hiroki Yamaue, 2017-05-04 This book provides state of the art knowledge on a broad range of clinical issues in pancreatic cancer covering topics from screening and pathophysiology to surgical treatments. In particular the focus is on current controversies and on evidence based surgical techniques. Further aspects considered include the management of precancerous lesions, diagnostic methods, perioperative care and nonsurgical treatment. The description of surgical methods is supported by many helpful illustrations and important technical issues are carefully addressed. Determination of resectability and extent of surgery is also discussed. Based on recent developments in surgical techniques, some surgeons are performing more and more radical operations. It is essential, however, that surgical strategy is based on the best available evidence and surgeons will find that this book offers valuable help in achieving this aim. In addition, it will be a great asset in clinical practice for all who are involved or interested in the management of pancreatic cancer.

Surgical Atlas of Pancreatic Cancer Ying-bin Liu, 2019-11-01 This book comprehensively discusses advanced surgical techniques for pancreatic cancers, including open, laparoscopic and robotic assisted surgery, as well as palliative surgery and total meso pancreas excision. It also features high resolution illustrations taken from selected clinical cases to enhance the descriptions of the surgical procedures. Providing details of technical issues and commenting on the outcome, it is a timely reference resource for pancreatic surgeons, pancreatic physicians and interns interested in pancreatic cancer surgery.
