Routledge Handbook of Highland Asia Jelle J.P. Wouters,Michael T. Heneise,2022-08-09 The Routledge Handbook of

Highland Asia is the first comprehensive and critical overview of the ethnographic and anthropological work in Highland Asia over the past half a century. Opening up a grand new space for critical engagement, the handbook presents Highland Asia as a world region that cuts across the traditional divides inherited from colonial and Cold War area divisions: the Indian Subcontinent, South Asia, Southeast Asia, China, East Asia, and Central Asia. Thirty-two chapters assess the history of research, identify ethnographic trends, and evaluate a range of analytical themes that developed in particular settings of Highland Asia. They cover varied landscapes and communities from Kyrgyzstan to India, from Bhutan to Vietnam, and bring local voices and narratives relating trade and tribute, ritual and resistance, pilgrimage and prophecy, modernity and marginalization, capital and cosmos to the fore. The handbook shows that for millennia Highland Asians have connected far-flung regions through movements of peoples, goods, and ideas, and at all times have been the enactors, repositories, and mediators of world historical processes. Taken together, the contributors and chapters subvert dominant lowland narratives by privileging primarily highland vantages that reveal Highland Asia as an ecumene and prism that refracts and generates global history, social theory, and human imagination. In the currently unfolding Asian Century, this compels us to reorient and re-envision Highland Asia in ethnography, in theory, and in the connections between this world region, made of hills, highlands, and mountains, and a planetary context. The handbook reveals both regional commonalities and diversities, generalities and specificities, and a broad orientation to key themes in the region. An indispensable reference work, this handbook fills a significant gap in the literature and will be of interest to academics, researchers, and students interested in Highland Asia.

Volume 12: Buddhism Beyond the Monastery*, 2009-09-30. Monasteries have been the locus classicus of the academic investigation of Tibetan religions. This volume seeks to balance this emphasis with an exploration of the diverse religious specialists who operate outside of the monastery in Tibet and along the Himalayan belt. The articles collected here depict Tantric professionals, visionaries, village lamas, spirit mediums, and female religious leaders whose loyalties reside in the noncelibate sphere but whose activities have had a significant impact on Tibetan religion. Using methodologies drawn from anthropological and textual scholarship, these seven essays bolster our understanding of religious practices and their performers beyond the monasteries of Central and Eastern Tibet, Bhutan, and India from historical times to the present day.
