The Historian Volume 56 Number 1 Autumn 1993:

Make it Work Jan Ellyn Goggans, 2019-04-17 Imagine a new critical theory that bases its literary value on fashion In this theory exists a community that explores and interrogates conventionality and in American literature of the 20th century it includes fashion and home decoration two paths to achieving white femininity a prized component of many novels written by and for women Drawing on cultural materialism and its connection to the cultural forms of objects including apparel Making it Work 20th Century American Fiction and Fashion provides readers a new understanding of the aims of American writers and the desires of their readers

Anti-Veiling Campaigns in the Muslim World Stephanie Cronin, 2014-04-24 In recent years bitter controversies have erupted across Europe and the Middle East about women s veiling and especially their wearing of the face veil or niqab Yet the deeper issues contained within these controversies secularism versus religious belief individual freedom versus social or family coercion identity versus integration are not new but are strikingly prefigured by earlier conflicts This book examines the state sponsored anti veiling campaigns which swept across wide swathes of the Muslim world in the interwar period especially in Turkey and the Balkans Iran Afghanistan and the Soviet republics of the Caucasus and Central Asia It shows how veiling was officially discouraged and ridiculed as backward and although it was rarely banned veiling was politicized and turned into a rallying point for a wider opposition Asking a number of questions about this earlier anti veiling discourse and the policies flowing from it and the reactions which it provoked the book illuminates and contextualizes contemporary debates about gender Islam and modernism

Terrorism, Instability, and Democracy in Asia and Africa Dan G. Cox, John Falconer, Brian Stackhouse, 2010-09-01 A chilling up to the minute look at the links between political instability and terrorism in Asia and Africa

The Flowering of the Landscape Garden Mark Laird, 1999-03-23 Mark Laird offers a wealth of visual and literary materials to revolutionize our understanding of the English landscape garden as a powerful cultural expression

The Rhetorical Rise and Demise of "Democracy" in Russian Political Discourse, Volume 2 David Cratis Williams, Marilyn J. Young, Michael K. Launer, 2022-05-17 Post Soviet Russia in the 1990s saw a surge in civic participation The traditional power structure officially relinquished control of political rhetoric and a nascent civil society had begun to emerge Free elections and political partisanship between reformist and conservative elements of Russian society spurred on by Russia s economic troubles gave a Wild West tenor to public rhetoric that was reflected in the election campaigns of 1993 1995 and 1996 In this volume the authors examine through a series of contemporaneously written essays the arc of government rhetoric during the height of media freedom the quest for a new national identity and the struggle for self government

The Rise and Fall of Modern Empires, Volume IV Martin Shipway, 2016-12-05 The collection of essays in this volume offers an overview of scholarly approaches to the ways in which diverse actors representing the colonised or the colonising nations or indeed the international community reacted to colonialism during the lifetime of the modern colonial empires or in their aftermath The coverage is broad in terms of

geographical scope and historical period with articles on the major colonial empires in Asia and Africa and the imperial centres of Paris London and Berlin from the conquests of the late nineteenth century to the period of decolonisation The selection also reflects recent academic trends by focusing on countries whose colonial past and experience of decolonisation have been studied and debated with particular intensity such as Algeria Kenya and India The volume draws on previously published articles and book chapters by leading international scholars writing in or translated into English and includes a critical introduction which situates each essay in relation to recent debates in this dynamic and expanding field of study

Eden and the Fall – the Fallacies of Radical Ecological History ,1999 Radical ecology claims to be a new movement at the cutting edge of social change offering a solution to current social and ecological problems through the rejection of reformist ecological politics in favour of a radical restructuring of industrial and especially Western society The claim to have discovered the historical cause of current ecological and social problems plays a key role in validating this radical approach Although numerous interpretations of the historical origins of existing social and ecological problems exist within radical ecology three main variants have been identified This thesis critically examines the three main variants of radical ecological history the belief in primal harmony the belief in the civilisation of the goddess and its destruction by a Kurgan invasion and the view that the rise of capitalism and the mechanistic world view was responsible for the ecological and social crises of today In so doing it also examines a number of key questions central to radical ecological history when did violence and hierarchy begin in human history is it possible to argue that today s ecological crisis has a religious cause and can the scientific technological and commercial revolutions be truly described as purely Western phenomena The main findings of this thesis are that each of these variants of radical ecological history is chronically flawed In addition to numerous empirical errors each of these historical interpretations is based on an extremely simplistic Eurocentric reading of the past based on the use of archetypal stereotypes of good and evil that have little or no historical foundation While these interpretations of history vary profoundly they are all based on the same underlying model of history whose origins lie in the Judeo Christian apocalyptic tradition and ultimately in Zoroastrianism While some of the flaws of radical ecological history are a result of poor scholarship it is argued that it is the use of t *For This Land Vine* Deloria, Jr.,2013-10-31 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *Futile Diplomacy, Volume 4* Neil Caplan,2015-05-15 This book first published in 1997 focuses on the Anglo American cooperation which began during the relatively uneventful years 1953 and 1954 and which led to a covert operation code named Alpha which aimed unsuccessfully at convincing Egyptian and Israeli leaders to consider a settlement through secret negotiations As with the other three volumes that make up *Futile Diplomacy* this volume comprises Dr Caplan s expert in depth analysis with a wealth of primary source documents making this a key reference source in the study of the Arab Israeli conflict *Air University Library Index to Military Periodicals* ,1994 A History of the Laws of War: Volume 1 Alexander Gillespie,2011-09-06 This unique new work of reference traces

the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself
