motel architecture in Myrtle Beach Florida's early tourist towers and the commercial development of Tennessee caves as tourist attractions Covering a landscape that includes Tennessee Georgia North Carolina Florida Mississippi Indiana Virginia Arkansas Ohio Kentucky Alabama and Illinois the anthology shows that there was and still is a distinctive southern culture and how roads have influenced that culture As lively as they are diverse the articles provide a solid background for understanding roadside ephemera that have disappeared or are quickly disappearing Ranging from the serious to the light hearted and including descriptions of American road and roadside icons to kitsch the book will appeal to anyone with an interest in road history and roadside architecture

The Atlanta Campaign, 1864: Sherman's Campaign to the Outskirts of Atlanta David A. Powell, 2025-08-05 A fully illustrated narrative of the Atlanta campaign complete with maps illustrations and diagrams The campaign for Atlanta was pivotal to the outcome of the American Civil War Roughly 190 000 men waged war across northern Georgia in a struggle that lasted 133 days Today a national park at Kennesaw commemorates this titanic fight and there are a surprising number of physical reminders still extant across the state The struggle for Atlanta divides naturally into two stages The first half of the campaign from May to mid July can be defined as a war of maneuver called by one historian the Red Clay Minuet Under Joseph E Johnston the Confederate Army of Tennessee repeatedly invited battle from strong defensive positions Under William T Sherman the combined Federal armies of the Cumberland the Tennessee and the Ohio repeatedly avoided attacking those positions Sherman preferring to outflank them instead Though there were a number of sharp bloody engagements during this phase of the campaign the combats were limited Only the battles of Resaca and Kennesaw Mountain could be considered general engagements Johnston's repeated retreats and the commensurate loss of terrain finally forced Confederate President Jefferson Davis to replace him with a more aggressive commander John B Hood This work will portray the first half of the Atlanta Campaign in text and images using both historic sketches and photographs as well as post war and modern images Extant trenches rifle pits redoubts shoupadés and other works as well as the battlefields will be covered as well as surviving historic structures and the monuments and cemeteries that commemorate the campaign

Scenic Georgia Sketchbook, A: Landmarks and Wonders from the Back Roads Ronald R. Huffman, 2021 More than eighty historic buildings and roadside landmarks across Georgia have found sanctuary in this stark but powerful collection of sketch work From obscure treasures like a Cobb County covered bridge to the instantly recognizable Forsyth Park in Savannah landscape architect Ronald Huffman puts pencil to pad to safeguard moments of state history Each piece is accompanied by anecdotes and related backstories that preserve the context of these icons before progress irrevocably alters the landscape Explore the back roads of Georgia with a guide attuned to the unexpected splendors that mark the way

Northeast Georgia Gordon Sawyer, 2001 In the late eighteenth century waves of intrepid settlers made their way down the Great Wagon Road into the virgin wilderness of Northeast Georgia to find new homes and opportunity for land and wealth Against a dramatic mountainous backdrop these pioneers carved out farms and small communities in perilous

isolation and created an American experience vastly different from that of the plantation style society established along Georgia's coast. Battling Creek and Cherokee warriors, government intervention, natural disasters, and a landscape not easily tamed year after year, these men and women of Northeast Georgia stamped their self-reliance, their perseverance, and their industriousness upon generations to follow and upon the very geography they called home. In Northeast Georgia: A History, readers travel across several centuries of change from the early American Indian tribes that once made this territory their hunting grounds to the present day, a time of unprecedented growth and expansion in both industry and population. Truly a world unto itself, Northeast Georgia has served as a haven and destination for all classes over the past two centuries: the bold gold miners of 1829, the stalwart sustenance farmers, the social elite enjoying fresh mountain air at the many summer resorts, a multitude of businessmen seeking opportunity in railroading, cotton, lumber, and poultry farming, and bootleggers finding the landscape convenient for clandestine whiskey making and distribution. These stories and more provide insight into understanding a people and place unique in Georgia.

North Georgia's Dixie Highway Amy Gillis Lowry, Abbie Tucker Parks, 2007. Traces the development of this early twentieth-century tourism route that connected the South to the urban North, the growth of businesses serving the route's visitors, and the evolution of the handmade chenille coverlets sold along the route that laid the groundwork for the modern carpet industry.

Original Interpreting the Civil War at Museums and Historic Sites Kevin M. Levin, 2017-09-14. Public historians working at museums and historic sites focused on the Civil War era are tasked with interpreting a period of history that remains deeply controversial. Many visitors have strong connections to historic sites such as battlefields and artifacts, as well as harbor strong convictions about the cause of the war, its consequences, and the importance of slavery. *Interpreting the Civil War at Museums and Historic Sites* surveys how museums and historic sites approached these challenges and others during the Civil War sesquicentennial 2011-2015. In doing so, this book offers museums and history professionals strategies to help shape conversations with local communities, develop exhibits, and train interpreters. With the ongoing controversy surrounding the display of the Confederate battle flag and monuments, there has never been a more opportune moment to look critically at how the Civil War has been interpreted and why it continues to matter to so many Americans. Each chapter is written by a professional public historian currently working at a museum or historic site. They cover topics such as Building relations with the public, How specific museums interpreted the war and overcame challenges of location, audience, funding, How the National Park Service and Georgia Historical Society approached commemorating important anniversaries.

Capitals of the Confederacy Michael C. Hardy, 2015-04-20. The Confederate States of America boasted five capital cities in four years. The center of the Confederate government moved from one Southern city to another, including Montgomery, Richmond, Danville, Greensboro, and Charlotte. From the heady early days of the new country to the dismal last hours of a transient government, each city played a role in the Confederate story. While some of these sites are commemorated with impressive monuments and museums, others offer

scant evidence of their importance in Civil War history Join award winning historian Michael C Hardy as he recounts the harrowing history of the capitals of the Confederacy Governor's Houses and State Houses of British Colonial America, 1607-1783 Hoke P. Kimball, Bruce Henson, 2017-05-11 This comprehensive survey of British colonial governors houses and buildings used as state houses or capitols in the North American colonies begins with the founding of the Virginia Colony and ends with American independence In addition to the 13 colonies that became the United States in 1783 the study includes three colonies in present day Florida and Canada East Florida West Florida and the Province of Quebec obtained by Great Britain after the French and Indian War Earthfast, the Dawn of a New World Richard Thornton, 2014-05-17 Earthfast is the culmination of a lifetime of architectural practice and seven years of concentrated research The journey began when archeologists at the American Museum of Natural History asked Richard to prepare architectural drawings of the Mission Santa Catalina de Guale on St Catherines Island GA One discovery led to another A big black hole in American history was filled by reading dozens of obscure 16th and 17th century books plus visiting many archaeological sites Being Creek Indian Richard was able to discern evidence from passages on Native Americans that were missed by earlier scholars This is the first book to comprehensively examine the architecture and planning practices of the early French Spanish and English colonies It is unique Richard Thornton is a professional Architect City Planner with degrees from Georgia Tech and Georgia State University He is the national Architecture columnist for the Examiner and appeared on the premier of the History Channel s America Unearthed
