The Human Family Stories:

The Human Family Lou Andreas-Salomä, 2005-01-01 The Human Family is the first complete translation of the cycle of ten novellas that Lou Andreas Salom 1861 1937 wrote between 1895 and 1898 This collection contributes to the rediscovery of Andreas Salom s significance as a thinker and writer above all with regard to her literary contribution to modern feminism and the principles of women s emancipation Born in St Petersburg to a German diplomat and his wife Andreas Salom has always been a figure of interest because of her close relationships to influential thinkers such as Friedrich Nietzsche Rainer Maria Rilke and Sigmund Freud Only since the mid 1980s however have her prose fiction and theoretical writings been reconsidered as important documents of emerging ideas and debates in twentieth century feminism The ten stories of The Human Family drive home her critical perspective on feminine stereotypes They depict a wide variety of young women as they relate to men representing different degrees of enlightenment and tolerance struggling to express a complete and independent feminine identity in the face of the confining but often seductive roles that convention and tradition impose on female potential The Human Family provides a subtle and nuanced perspective on European feminist writing from the turn of the last century by a woman writer who was intimately involved with the literary mainstream of her time and whose theoretical and literary works played a significant role in feminist debates of the period prefiguring present day feminist discourse on essentialism and constructivism

The Human Story Robin Dunbar, 2011-02-03 A fascinating account of the latest thinking on human evolution by one of the most respected evolutionary psychologists in Britain For scientists studying evolution the past decade has seen astonishing advances across many disciplines discoveries which have revolutionised scientific thinking and turned upside down our understanding of who we are The Human Story brings together these threads of research in genetics behaviour and psychology to provide an understanding of just what it is that makes us human Robin Dunbar looks in particular at how the human mind has evolved and draws on his own research during the last five years into the deep psychological and biological bases of music and religion

Human by Design Gregg Braden, 2017-10-10 Human by Design invites you on a journey beyond Darwin s theory of evolution beginning with the fact that we exist as we do even more empowered and more connected with ourselves and the world than scientists have believed possible In one of the great ironies of the modern world the science that was expected to solve life s mysteries has done just the opposite New discoveries have led to more unanswered questions created deeper mysteries and brought us to the brink of forbidden territory when it comes to explaining our origin and existence These discoveries reveal the following facts Fact 1 Our origin Modern humans appeared suddenly on earth approximately 200 000 years ago with the advanced brain nervous system and capabilities that set them apart from all other known forms of life already developed rather than having developed slowly and gradually over a long periods of time Fact 2 Missing physical evidence The relationships shown on the conventional tree of human evolution are speculative connections only While they are believed to exist a 150 year search has failed to produce the

physical evidence that confirms the relationships shown on the evolutionary family tree Fact 3 New DNA evidence The comparison of DNA between ancient Neanderthals previously thought to be our ancestors and early humans tells us that we did not descend from the Neanderthals Fact 4 A rare DNA fusion Advanced genome analysis reveals that the DNA that sets us apart from other primates including in our advanced brain and nervous system is the result of an ancient and precise fusion of genes occurring in a way that suggests something beyond evolution made our humanness possible Fact 5 Our extraordinary abilities We are born with the capacity to self heal to self regulate longevity to activate an enhanced immune response and to experience deep intuition sympathy empathy and ultimately compassion and to do each of these on demand In this book New York Times best selling author and 2017 Templeton Award nominee Gregg Braden crosses the traditional boundaries of science and spirituality to answer the timeless question at the core of our existence Who are we and to reveal science based techniques that awaken our uniquely human experiences of deep intuition precognition advanced states of self healing and much more Beyond any reasonable doubt Human by Design reveals that we re not what we ve been told and much more than we ve ever imagined

His Story Stuart Hacking,2014-08-18 We all love stories whether printed passed down orally from generation to generation or made into films We love stories whether they are fictional true mythical or legendary Stories are part of our human history and they help us understand being human But there is one story that underpins all other stories the story of why we exist All great human stories must interact with this story His Story explores this fundamental story by retelling the story of the Bible His Story tells the Biblical story of how God has opened up a doorway into our universe and how this impacts the metanarrative of all of our lives If you want to read the overarching story of the Bible in one short book then His Story is for you If you want to know the backstory of your life His Story is for you His Story is simply written but doesn t oversimplify It is a book for people who might call themselves Christians but also for all those who are curious about the ultimate story His Story the story of why we are here

The Story of Human Spiritual Evolution Richard Ferguson,2012-10 This book is one of a kind It traces the history of human awareness of God and belief back to its earliest roots long before the Bible the Koran the Upanishads and other writings It shows how the foundation for belief in God was contained within the instant of creation itself Scientists call this the big bang It shows that as the universe developed there came a point in human development where we had the capability to begin to be aware of an afterlife These ideas were primitive by our standards today but they served to create a solid foundation for increasing complex and more thorough understandings of who God is and our relationship with Him This book covers the well known axial age where there was a watershed or flood of prophets and holy men who advanced understandings of both philosophy and theology and science in the hundreds of years before the coming of Jesus Christ In a real sense they prepared the way for God s son and His gospel It is these men who changed the course of human understanding of God with new revolutionary ideas that advanced the self revelation of God to humankind The last part of the book looks at religion today and how we got here and

These contain recurrent references to the incomplete or impaired human form and are best read through a corporeal lens. The criticism illustrates her importance as a cultural commentator fascinated by the results of frustrated human desire and includes a synopsis of the published collections and the stories within them to give the reader a sense of the variety of the overarching themes and the persistent force of corporeality in the stories. Du Maurier is well known as a novelist but her short fiction is pivotal to understanding her position and influence as a writer. She rewrites fairytales and foregrounds female violence long before it became a cultural trend.

Value Education: Based On All The Religions Of The World (In Two Volumes) Sukh Lal Dhani, 2007

The book on Value Education based on all the religions of the world is an anthology. During Dr. Promilla Kapur's Travels, she was approached by many eminent scholars to compile a book based on the teachings of all the religions of the world. It was a Herculean task but the efforts were worth the trouble. In the month of January 2001, she started approaching the eminent scholars and religious heads to write chapters of the book. The most eminent scholars in Hinduism, Jainism, Arya Samaj, Islam, Christianity, Zoroastrianism, Sikhism, Bhai's faith, and so on, were contacted. Almost hundred reminders to each were sent. At one stage, it gave the feelings that it was an impossible task but the tenacity of Dr. Promilla Kapur kept her on the track. By January of 2004, the chapters started arriving. All the religious leaders and eminent scholars gave the word of wisdom on all the religions of the world. It was heartening to read that not a single chapter writer differed from the positive image of each religion. The preaching was almost identical. Love, affection, caring, and sharing, forgiveness, tolerance, and compassion for the entire human beings were the common theme revealed in all the papers. The book is the need of the hour and will earn its proper place in the human society all over the world.
