The Human In Command Peace Support Operations

Christian Drosten

The Human In Command Peace Support Operations:

The Human in Command Peter Essens, 2001 Peace support operations have unique characteristics. These operations require qualities of commanders and their teams that are in addition to the qualities that are normally needed to conduct successful combat operations. Materiel doctrine and training must be tailored to fulfill their functions but it is the quality of the human in command that leads to successful missions in ambiguous situations. What are these qualities and what are the ingredients for effective operations? *The Human in Command* Peace Support Operations combines personal experiences of commanders, empirical data on peace support issues and theoretical models. It provides the reader with insight into current issues such as leadership, mission characteristics, mission preparation and training, crisis management, operational conditions and processes, multinational cooperation and effectiveness of individual commanders, units and missions. Advances in Military Sociology Giuseppe Caforio, 2009-12-01 A selection of the papers presented at RC01's international conference in Seoul, July 2008. It offers an overview of the panorama of social studies on armed forces and conflict resolution in a context of fast moving change. It presents studies that move beyond the very concept of globalization. **Law Enforcement within the Framework of Peace Support Operations** Roberta Arnold, 2008-08-31 Since the end of the Cold War and the emergence of asymmetric threats like terrorism, the military has been increasingly entrusted with tasks traditionally belonging to the police. This development is visible through the new challenges posed to modern Peace Support Operations (PSO) intended as an umbrella definition covering different types of post conflict peace operations, be these mandated under Chapter VI or Chapter VII of the United Nations Charter with either peace keeping, peace enforcing or even peace building goals. The aim of this volume is primarily to provide guidance in the format of a handbook to those deployed in the field and who are confronted with legal issues. In order to achieve this goal, the handbook is structured as follows: after this introduction, Part II addresses the general question whether law enforcement shall be a PSO task. Law enforcement is perceived by some states as a matter of self defense. Part III then addresses the limits and possibilities of law enforcement by PSO. The discussion continues with Part IV which provides some practical tools for those deployed to the field. Part V focuses instead on law enforcement within PSO, illustrating problems related to the prosecution of members of PSO forces suspected of illegal activities and Part VI then draws the conclusions. **How Professionals Make Decisions** Henry Montgomery, Raanan Lipshitz, Berndt Brehmer, 2004-09-23 This volume is the fruit of the 5th conference on Naturalistic Decision Making which focused on the importance of studying people who have some degree of expertise in the domain in which they make decisions. The substantive concerns pertain to how individuals and groups make decisions in professional and organizational settings and to develop suit. **Social Sciences and the Military** Giuseppe Caforio, 2006-11-22 Examines the latest interdisciplinary and intradisciplinary global approaches to studying the military universe through a series of essays written by some of the most notable scholars in the field. *Decision Making in Complex Environments* Jan Noyes, Malcolm Cook, Yvonne

Masakowshi,2017-09-18 Many complex systems in civil and military operations are highly automated with the intention of supporting human performance in difficult cognitive tasks The complex systems can involve teams or individuals working on real time supervisory control command or information management tasks where a number of constraints must be satisfied Decision Making in Complex Environments addresses the role of the human the technology and the processes in complex socio technical and technological systems The aim of the book is to apply a multi disciplinary perspective to the examination of the human factors in complex decision making It contains more than 30 contributions on key subjects such as military human factors team decision making issues situation awareness and technology support In addition to the major application area of military human factors there are chapters on business medical governmental and aeronautical decision making The book provides a unique blend of expertise from psychology human factors industry commercial environments the military computer science organizational psychology and training that should be valuable to academics and practitioners alike

Frontex and Human Rights Melanie Fink,2018 This monograph analyses the allocation of legal responsibility for human rights violations which may occur in the context of border control or return operations coordinated by the European Border and Coast Guard Agency Frontex Handbook of the Sociology of the Military Giuseppe Caforio,Marina Nuciari,2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003 It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so called cyborg warriors new forms of leadership and changes in soldier s identity and organisational culture It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War *Peace Support Operations* Eli Stamnes,2020-09-29 Peace Support Operations Nordic Perspectives brings together Nordic academics working in the field of peace support operations broadly defined It contains a collection of articles that present different theoretical approaches to the study of peace support operations and contribute to enhance the knowledge of the Nordic countries participation in such operations Its case studies describe the development of peacekeeping forces from Norway Sweden Denmark and Finland in the face of evolving threats to world

security over the past sixty years and how each country's reaction has differed. The conflicts covered in this study include the Cold War, the Balkan conflict, the first Gulf War, and the Malawian ethnic conflict. Thus, it constitutes a contribution to the academic field in both a theoretical and an empirical sense. This book was previously published as a special issue of *International Peacekeeping*. *The Psychology of the Peacekeeper* Thomas W. Britt, Amy B. Adler, 2003-09-30. In this remarkable volume, a multinational team of scientists catalogs the stressors and benefits for combat-trained soldiers deployed on missions where they are told to hold their fire and assume the role of peacekeeper. Theory and direct research with peacekeepers is incorporated. Missions covered include but are not limited to peacekeeping operations in Haiti, Somalia, Bosnia, Kosovo, Iraq, and Lebanon. The terminology of peacekeeping and military operations is listed. The stressors, threats, dangers, frustrations, and benefits of the peacekeeper role are described in dramatic detail, with additional attention to the Peacekeeper Stress Syndrome. With the goal of increasing peacekeeper health and well-being, which in turn increases the likelihood of establishing a stable peace, this volume also addresses interventions and preventative measures. The extent of psychological distress and disorders following peacekeeping operations is documented. Interventions are recommended for various phases of deployment in order to minimize the likelihood of post-deployment psychological problems. Experts in social, industrial, organizational, health, clinical, and cross-cultural psychology contribute to a multi-dimensional perspective. Each chapter author reports psychological research with military personnel in peacekeeping operations. **The Protection of Civilians in Peacekeeping Operations** Tamer Morris, 2024-09-09. While the Security Council has been mandating peacekeepers to protect civilians since 1999, there is still contention on its legal meaning. Even though the concept of protection can seem self-evident, as the concept of protection is borrowed language, each body of law will perceive protection through a different lens. However, as the mandate creates a legal obligation on UN peace missions, a clear understanding of protection is fundamental to ensure performance and accountability. *Team Effectiveness In Complex Organizations* Eduardo Salas, Gerald F. Goodwin, C. Shawn Burke, 2008-11-20. Over the past 40 years, there has been a growing trend toward the utilization of teams for accomplishing work in organizations. Project teams, self-managed work teams, and top management teams, among others, have become a regular element in the corporation or military. This volume is intended to provide an overview of the current state of the art research on team effectiveness. *Made, Not Born* Bruce Newsome, 2007-09-30. Why do the combat capabilities of individual soldiers vary so much? This book seeks to provide an answer to this and other questions about variability in combat performance. Some soldiers flee quickly from the battlefield, while others endure all hardships until the bitter end. Some combat units can perform numerous types of missions, while others cannot keep themselves organized during peacetime. Some militaries, armed with obsolete weapons, have out-fought enemies with the latest weapons, just as some massively outnumbered armies have beaten back much larger opponents. In this first social scientific study of the effectiveness of combat troops, Newsome evaluates competing explanations for the varying combat

capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier's individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more

Accountability Of Peace Support Operations M. C. Zwanenburg, 2005-01-01 Quis custodiet ipsos custodies In other words who guards the guardians At a time when the mandate of many peace support operations includes halting violations of international humanitarian law by third parties there is still a lack of clarity concerning accountability of peace support operations themselves This book addresses that accountability focusing on peace support operations under the command and control of the United Nations and the North Atlantic Treaty Organization It is concerned with the accountability of international organizations as well as troops contributing and member states but not of individuals Drawing on existing and emerging doctrines of international law including the law of state responsibility the law of responsibility of international organizations international institutional law and international humanitarian law and on the basis of state practice this book makes a strong plea for improving mechanisms to implement the accountability of peace support operations under international humanitarian law The Paul Reuter Prize 2006 was awarded to Marten Zwanenburg for this book

Regulating the Use of Force by United Nations Peace Support Operations Charuka Ekanayake, 2021-05-30 This Book attempts to deduce regulatory standards that can close the gaps between the Promises made and the Outcomes secured by the United Nations in relation to its use of force It explores two broad questions in this regard why the contemporary legal framework relevant to the regulation of force during Armed Conflict cannot close the gaps between the said Promises and Outcomes and how the Unified Use of Force Rule formulated herein achieves this This is the first book to coherently analyse the moral as well as legal aspects relevant to UN use of force UN peace operations are rapidly changing Deployed peacekeepers are now required to use force in pursuance of numerous objectives such as self defence protecting civilians and carrying out targeted offensive operations As a result questions about when where and how to use force have now become central to peacekeeping While UN peace operations have managed to avoid catastrophes of the magnitude of Rwanda and Srebrenica for over two decades crucial gaps still exist between what the UN promises on the use of force front and what it achieves Current conflict zones such as the Central African Republic Eastern Congo and Mali stand testament to this This book searches for answers to these issues and identifies how an innovative mix of the relevant legal and moral rules can produce regulatory standards that can allow the UN to keep their promises The discussion covers analytical ground that must be traversed behind the scenes of UN deployment well before the first troops set foot on a battlefield The analysis ultimately produces a Unified Use of Force Rule that can either be completely or partially used as a model set of Rules of Engagement by UN forces This book will be immensely beneficial to law students researchers academics and practitioners in the fields of international relations international law peacekeeping and human rights
