developed at the very beginning stages of reading instruction as the result of different and opposite kinds of teaching One kind of reader is taught to read by the sound of print and reads automatically and with great accuracy The other kind of reader is taught to read by the meaning of print as Chinese characters are read and not only reads inaccurately but is actually encouraged to do so by so called psycholinguistic guessing The Hidden Story explains why the teaching of psycholinguistic guessing to beginning readers although it manifestly results in a life long disability has been the experts instructional preference ever since 1870 although the term itself is a relatively recent invention
