Introduction to Dinosaurs Facts about Dinosaurs Dinosaur Extinction Dinosaur Fossils Dinosaur Eggs Dinosaur Names
Dinosaur Diet Feathered Dinosaurs Plant Eating Dinosaurs The Weirdest Dinosaurs The Deadliest Dinosaurs Flying
Dinosaurs Kinds of Dinosaurs The Biggest Dinosaurs The Smallest Dinosaurs Author Bio Publisher Introduction Greetings
young reader Today we are going to take a step back in time and enter the age of the dinosaurs The dinosaurs are an extinct
species of animal that began to live on the Earth over 200 million years ago Extinct means that they no longer exist The
dinosaurs are some of the most intriguing and awe inspiring animals that have existed on our planet The dinosaurs colossal
size strange characteristics and mysterious disappearance make them inherently worthy of study and interest Even more
than these reasons the study of dinosaurs itself is an incredible adventure which requires thought and imagination The study
of dinosaurs helps you to appreciate just how mysterious and amazing nature really is Our planet supports not only us and
the animals that live today but it even supported creatures as gigantic and strange as the dinosaurs just think how cool that
is I hope that you bring a spirit of openness and wonder to your study of the dinosaurs and that you come to appreciate the
mystery and value of the dinosaurs Today we are going to learn about the Allosaurus The Allosaurus is one of the most
famous dinosaurs in the scientific community because it is one of the most well known dinosaurs There is so much known
about the Allosaurus because so many almost complete Allosaurus skeletons have been discovered We are going to learn
about what this particular dinosaur looked like how it behaved and how it interacted with other dinosaurs in its environment
We know what we know about the dinosaurs from a variety of sources including fossils biology and other scientific disciplines
Fossils are the ancient remains of the dinosaurs the most familiar being their bones Biological science is the study of life in
general but many scientists compare the dinosaurs to modern day animals to support their theories Before a talk about
dinosaurs can take place it is important that we discuss the theory of evolution Evolutionary theory supposes that all the
animals we know and see today are the direct descendants of animals that existed millions of years ago The dinosaurs and
other creatures that existed millions of years ago either died out or gradually changed into different animals For instance
birds are considered to be surviving dinosaurs because their dinosaur ancestors survived the dinosaur extinction event we
will discuss this later Remember that any time you see an *x* next to the name of a dinosaur it means that a book has been
written about this dinosaur in the Dinosaur Books for Young Readers series Any word written in bold is an important
scientific term which is defined in text Italics are used to denote the first time a dinosaur's name is mentioned in the book
