## **The Human Environment:**

**The Human Environment** Valentin Matcas,2017-04-20 You are born in this world believing everything to be accurate reliable and unique just as you learn in school and then as you grow up this world shows itself in its true meaning Parents have secrets at home and politicians lie and cheat throughout the media while these might be the first inconsistencies that you notice in your perfect world The rich become richer not exactly through their true abilities but through their lies and illegalities and this might be the first injustice that you ever notice in this world Authorities replace authorities endlessly only to do the same this harms you throughout life while authorities never admit it yet you can see it well everybody knows it and this is your true actual environment But can you pinpoint exactly what goes on in this world and what goes wrong in your environment Because lies inconsistencies and illegalities are everywhere and there is nothing significant enough offering you an accurate point of reference an accurate perspective defining this altering environment helping you understand this world as it is Because the knowledge found at the base of your understanding of this world is missing as it is erroneous or it is misleading on purpose since this is how authorities strive to offer it to you This alters your reasoning now and consequently it alters your inner outer and social behavior Coincidentally your entire behavior is altered in this manner determining you now to be part of these lies and illegalities yourself directly or implicitly determining you to create in this manner on your own this Consensual Matrix found all around affecting and harming everybody just as everybody's altered behavior creates the same Consensual Matrix affecting you and the entire world Because the rich and the politicians never force you in any manner but they only expect and accept your behavior to fall in this exact consensual pattern coincidentally having all favorable outcomes turn in their favor Because this enforced consensual environment that you create through your consensual behavior might be unfavorable and harmful to you and to those around but it is certainly profitable for those controlling this world Because you must consider all environments when you study this world as your natural consensual constructed social inner cognitive informational higher and spiritual human environments forming your actual world This defines your surroundings it patterns your behavior and it gives meanings to your existence it gives you a place and role in society and it challenges your existence it constrains you to act and develop to help and harm those around it is there when you are born and it always kills you in the end And if you fail understanding your real and consensual environments for what they truly are you end up missing a significant part of your existence of what life truly represents to you and to everyone around of what you should have always experienced and of what you should have always been Throughout this book we study the human environment in its entirety natural social cognitive spiritual and consensual since only through an accurate research of your entire environment you may find the accurate knowledge helping you structure and define your meaning and place in life and in this world

**The Human Environment** Draper L. Kauffman,1978      **Human-Environment Interactions** Mark R. Welford,Robert A. Yarbrough,2020-10-06 This textbook explores the growing area of human

environment interaction We live in the Anthropocene an era dominated by humans but also by the positive yet destructive environmental feedbacks that are poised to completely reset the relationships between nature and society Modern and historic political social and cultural processes and physical landscape responses determine the intensity of these impacts Yet different cultural groups political and economic entities view react to and impact these human environmental processes in spatially distinct and divergent ways Providing an accessible up to date approach to human environment interactions with balanced coverage of both social and natural science approaches to core environmental issues this textbook is an integrative multi disciplinary offering that discusses environmental issues and processes within the context of human societies The book begins by addressing the three most pressing issues of our time climate change threshold exceedance and the 6th mass extinction From there the authors identify within chapters on resources population agriculture and urbanization what precipitated and continues to sustain these three issues They end with a chapter outlining some practical solutions to our human environment crises The book will be a valuable resource for interdisciplinary environment related courses bridging the gap between the social and natural sciences human geographies and physical geographies
