Baetz, 1985      *The Human Exploration of Space* National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Commission on Physical Sciences, Mathematics, and Applications, Committee on Human Exploration, 1998-01-30 During 1988 the National Research Council s Space Science Board reorganized itself to more effectively address NASA s advisory needs The Board s scope was broadened it was renamed the Space Studies Board and among other new initiatives the Committee on Human Exploration was created The new committee was intended to focus on the scientific aspects of human exploration programs rather than engineering issues Their research led to three reports Scientific Prerequisites for the Human Exploration of Space published in 1993 Scientific Opportunities in the Human Exploration of Space published in 1994 and Science Management in the Human Exploration of Space published in 1997 These three reports are collected and reprinted in this

volume in their entirety as originally published      **The Human Imperative** Paul Nemitz, 2023-11-25 This important new book is about power in the age of Artificial Intelligence It looks at what the new technical powers that have accrued over the last decades mean for the freedom of people and for our democracies AI must not be considered in isolation but rather in a very specific context the concentration of economic and digital technological power that we see today Analysis of the effects of AI requires that we take a holistic view of the business models of digital technologies and of the power they exercise Technology economic power and political power are entering into ever closer symbiosis Digital technologies and their corporate masters now know more than people know about themselves or governments know about the world These technologies accumulate more and more decision making powers Taken together this leads to a massive asymmetry of knowledge and power in the relationship between man and machine The classical models of action and decision making in democratic societies are being gradually undermined by such developments In a new way the question of the control of technical power arises This is the first book to look in detail in a holistic way at the challenges of digital power and Artificial Intelligence to Democracy and Liberties and to set out what can and needs to be done about these challenges in terms of engineering ethics and democratic action of policy making and legislation Key audiences are scholars in media sciences political sciences computer sciences and engineering law and philosophy as well as policy makers corporate and civil society leaders and the educated public Adapted and updated from the original German language book *Prinzip Mensch Macht Freiheit und Demokratie im Zeitalter der Künstlichen Intelligenz* published 2020 by Verlag J H W Dietz Nachf GmbH

Freedom of the Human Person Zbigniew Josef Waleszczuk, 2017-01-16 Freedom is the key issue for both Karol Wojtyla and Immanuel Kant that connects the Polish with the German philosopher This analysis aims to show the importance of Kant's ethics in the work of Karol Wojtyla Kant's paradigm shift in the anthropological thought was revolutionary The categorical imperative obliges each person to act morally and thus elevates them It is the foundation of human dignity not only for Kant but also for Wojtyla Who is man Is man free Or is materialistic man determined and arrested in immanence What should man do Man is gifted with freedom He is a person because he has the capacity to act Wojtyla and Kant put special emphasis on a person's power of self-determination that reveals itself through the experience as a freely acting person The realisation of the personal norm the categorical imperative was defined by both thinkers as a fulfilment of freedom Freedom shall be fulfilled in the responsible act which reveals the person's power of love      Canadian Pentecostals, the Trinity, and Contemporary Worship Music Michael A. Tapper, 2017-05-08 This volume offers a landmark analysis of the trinitarian impulses in contemporary worship music used by the Pentecostal Assemblies of Canada PAOC It considers whether the lyrics from the most commonly used PAOC songs are consistent with this Evangelical group's trinitarian statement of faith Colin Gunton's trinitarian theology provides the theological rationale for eight original and qualitative content analyses of these songs Three major areas are considered the doctrine of God human personhood and cosmology Making use of Gunton's notions of

relationality particularity and perichoresis along with several key Pentecostal scholars this book serves as a helpful descriptive and prescriptive theological resource for the dynamic practice of a trinitarian faith **Encountering Cruelty:**

**The Fracture of the Human Heart** Michael R. Trice, 2011-04-21 Interest in recent years in reconciliation and conflict transformation has witnessed a great deal of attention to building a future through forgiveness and preventative measures in order to impede egregious wrongdoing This effort for a reconciled future is absent reflection on the nature of cruelty Cruelty has always been apparent in massive acts of wrongdoing and yet is repeatedly concealed in our assessment of the acts themselves This book is a theologically honest and deep structure exploration of cruelty in its personal communal and institutional encounters in human life Drawing on Nietzsche's challenge of cruelty to the western tradition the work offers a comprehensive study of how cruelty undermines care trust respect and justice all those elements of human reciprocity that mark our lives as interdependent beings The work concludes with a tightly written Epilogue on interpreting the theological meaning and accessibility of reconciliation today **Edward Bond: The Playwright Speaks** David Tuaillon, 2015-10-22

[A New Approach to Kant](#) Zehou Li, 2018-05-21 Originally written during the Cultural Revolution this book introduces and interprets Kant's critical philosophy through the lens of its author Li Zehou's own philosophical approach anthropological historical ontology Li argues that the process of human development begins with and is shaped by the practical material activities associated with making and using tools in primitive societies Over millions of years these ever evolving practices accumulate and become sedimented into archetypical forms that shape history social relationships and human psychology Li's views draw upon Marx's theory of practice and as those familiar with his work will recognize his reinterpretation of Confucian thought with its emphasis on material life and worldly existence Beginning with the assumption that the question at heart of Kant's philosophy is What is the human being Li offers a highly original answer by arguing that the root of Kant's transcendental knowledge universal forms moral autonomy and aesthetics can be found in the practical and social activities associated with tool making Li offers a new reading not only of Kant but of modern European philosophy including Hegel and Marx that forces us to rethink our understanding of the relation between individuals and communities and challenges us to ask ourselves how we can best achieve both harmony and freedom in our shared human future
