The Human Side Of Prayer The Psychology Of Praying:

The Human Side of Prayer Laurence Binet Brown, 1994-01-01 **The Psychology of Religion, Fourth Edition** Ralph W. Hood, Jr., Peter C. Hill, Bernard Spilka, 2009-07-15 Scholarly and comprehensive yet accessible this state of the science work is widely regarded as the definitive graduate level psychology of religion text The authors synthesize classic and contemporary empirical research on numerous different religious groups Coverage includes religious thought belief and behavior across the lifespan links between religion and biology the forms and meaning of religious experience the social psychology of religious organizations and connections to morality coping mental health and psychopathology Every chapter features thought provoking quotations and examples that bring key concepts to life New to This Edition Revised and updated with the latest theories methods and empirical findings Many new research examples Restructured with fewer chapters for better fit with a typical semester More attention to the differences between religion and spirituality Covers emerging topics genetics and neurobiology positive psychology atheism and more Psychological Perspectives on Prayer Leslie John Francis, Jeff Astley, 2001 This book brings together seminal articles concerned with the empirical and psychological study of prayer Topics discussed include the relationship between prayer and psychological development the place of prayer in the work of doctors caregivers and clergy and the effects of intercessory prayer **Psychology, Religion, and Spirituality** James M. Nelson, 2009-02-17 Over a century ago psychologists who were fascinated with religion began to study and write about it Theologians and religious practitioners have responded to this literature producing a fascinating dialogue that deals with our fundamental understandings about the human person and our place in the world This book provides an introduction to the important conversations that have developed out of these interchanges The dialogue between psychology and religion is difficult to study for a number of reasons First it requires knowledge of both psychology and religion People with a background in psychology often lack a solid understanding of the religious traditions they wish to study and theologians may not be up to date on the latest developments in psychology Second it requires conceptual tools to organize the material and understand the basic problems involved in any attempt to connect the science of psychology with religion These concepts can be found in many places for instance in the writings of philosophers of science but they are complex and often hard to follow for those without a proper theological and philosophical background Finally authors who write on the topic come to the study of psychology and religion from a variety of academic and personal backgrounds This makes for wonderful diversity in conversations but it makes understanding and mastery of the material quite difficult **Choosing Our Religion** Elizabeth Drescher, 2016-03-01 To the dismay of religious leaders study after study has shown a steady decline in affiliation and identification with traditional religions in America By 2014 more than twenty percent of adults identified as unaffiliated up more than seven percent just since 2007 Even more startling more than thirty percent of those under the age of thirty now identify as Nones answering none when queried about their religious affiliation Is America losing its religion Or as more and

more Americans choose different spiritual paths are they changing what it means to be religious in the United States today In Choosing Our Religion Elizabeth Drescher explores the diverse complex spiritual lives of Nones across generations and across categories of self identification such as Spiritual But Not Religious Atheist Agnostic Humanist just Spiritual and more Drawing on more than one hundred interviews conducted across the United States Drescher opens a window into the lives of a broad cross section of Nones diverse with respect to age gender race sexual orientation and prior religious background She allows Nones to speak eloquently for themselves illuminating the processes by which they became None the sources of information and inspiration that enrich their spiritual lives the practices they find spiritually meaningful how prayer functions in spiritual lives not centered on doctrinal belief how morals and values are shaped outside of institutional religions and how Nones approach the spiritual development of their own children These compelling stories are deeply revealing about how religion is changing in America both for Nones and for the religiously affiliated family friends and neighbors with whom their lives remain intertwined
