Improving the Safety of Civilians Oxfam GB.,2009 This book is an innovative tool which strengthens the capacity of humanitarian field workers to improve civilian safety through humanitarian programmes The materials are designed for use by experienced facilitators who have some knowledge of protection issues to train emergency response teams   **Sphere Training Package** ,2004   The Good Project Monika Krause,2014-06-19 NGOs set out to save lives relieve suffering and service basic human needs They are committed to serving people across national borders and without regard to race ethnicity gender or religion and they offer crucial help during earthquakes tsunamis wars and pandemics But with so many ailing areas in need of assistance how do these organizations decide where to go and who gets the aid In The Good Project

Monika Krause dives into the intricacies of the decision making process at NGOs and uncovers a basic truth It may be the case that relief agencies try to help people but in practical terms the main focus of their work is to produce projects Agencies sell projects to key institutional donors and in the process the project and its beneficiaries become commodities In an effort to guarantee a successful project organizations are incentivized to help those who are easy to help while those who are hardest to help often receive no assistance at all The poorest of the world are made to compete against each other to become projects and in exchange they offer legitimacy to aid agencies and donor governments Sure to be controversial The Good Project offers a provocative new perspective on how NGOs succeed and fail on a local and global level **Global Governance on the Ground** Nele Kortendiek,2024-11-06 Global Governance on the Ground offers a new approach to how international organizations govern Through an in depth look at the case of migration and asylum the book argues that international organizations IOs not only govern global challenges through rules standards expertise and numbers but also through practice on the ground Much scholarship has been devoted to the question of how IOs become autonomous agents and exercise authority to shape governance outcomes Far less attention has been given to the way IOs use their field access to govern global issues on the ground without first going through formal policy channels or renegotiating their authority The book demonstrates that through field based practice IOs directly regulate global issues in the spaces where they become virulent in different locations across the globe The book draws on ethnographic fieldwork at the European external border comprising interviews at the headquarters of seven organizations including the United Nations High Commissioner for Refugees UNHCR the International Organization for Migration IOM and three humanitarian NGOs This combined with an extensive document analysis shows that field staff improvise to organize collective action on under regulated issues and that headquarter staff consolidate and diffuse their operational knowledge The book conceptualizes this governance mode that operates at a low institutional threshold but largely determines the de facto governance of contested or crisis ridden global problems   Human Rights and Forced Displacement Anne Fruma Bayefsky,Joan Fitzpatrick,2000-12-21 By Dr Francis Deng   Green Design, Materials and Manufacturing Processes Helena Bartolo,2013-06-06 Green Design Materials and Manufacturing Processes includes essential research in the field of sustainable intelligent manufacturing and related topics containing reviewed papers presented at the 2nd International Conference on Sustainable Intelligent Manufacturing 2013 Topics covered include Eco Design and Innovation Energy Efficiency Green and Smart Manufacturing Green Transportation Life Cycle Engineering Renewable Energy Technologies Reuse and Recycling Techniques Smart Design Smart Materials Sustainable Business Models and Sustainable Construction Intended for engineers architects designers economists and manufacturers dealing with key sustainability issues   **Research for Development** Sophie Laws,Caroline Harper,Nicola Jones,Rachel Marcus,2013-02-01 Research for Development offers a comprehensive guide to commissioning managing and undertaking research in development work It serves both as a practical reference manual and an indispensable learning tool
