**Plantation and Spices Crops** Chadwick Hillam, 2017-10 A plantation is a large scale farm that specializes in cash crops and cultivated on an extensive scale in a large contiguous area owned and managed by an individual or a company The crops include tea coffee rubber cocoa coconut arecanut oil palm palmyrah cashew cinchona etc These plantation crops are high value commercial crops of greater economic importance and play a vital role in a nation economy Probably the single most important factor a plantation has on the local environment is the site where the plantation is established If natural forest is cleared for a planted forest then a reduction in biodiversity and loss of habitat will likely result In some cases their establishment may involve draining wetlands to replace mixed hardwoods that formerly predominated with pine species If a plantation is established on abandoned agricultural land or highly degraded land it can result in an increase in both habitat and biodiversity A planted forest can be profitably established on lands that will not support agriculture or suffer from lack of natural regeneration However the prospects of spice crop production are bright because of its high market demand The most common type of spice crops grown are onion garlic ginger black pepper hot pepper celery shallots leek bay leaf and tanglad Among these crops however only onion garlic ginger black pepper and hot pepper are grown commercially because of their high market demand and usefulness Spices are primarily used as food seasoning In addition to their culinary uses spices are also utilized as flavoring agent in beverages active ingredient in syrubic medicines coloring agent of textiles and an important constituent in cosmetic and perfume products This Book Plantation and Spices Crops presents an overview of the

importance of plantation crops and spice plants as well as the current status of the cultivation of these crops. It covers plant production aspects such as climate and water requirements, planting, fertilizers, irrigation, weeding and hoeing, and harvesting, processing, and pest and disease management. This book is intended for advanced graduate students and practitioners of agriculture and horticulture and those who are involved in the production and promotion of plantation crops, spice plants, and essential oil and medicinal plants.

**Underexploited Spice Crops** Amit Baran Sharangi, Pemba H. Bhutia, Akkabathula Chandini Raj, Majjiga Sreenivas, 2018-10-03. Spices provide our food with nutraceutical value rather than actual nutrition. But apart from the popular and major spices, there are several other spices which, in spite of their enormous contribution to human health, remain underexploited or underutilized. This new volume, *Underexploited Spice Crops: Present Status, Agrotechnology, and Future Research Directions*, is a valuable compilation of agrotechniques coupled with background information, research works, and scientific discussions on these spices. It will include in-depth narration on underexploited spice crops as products influencing present-day global export markets and the renewed interest in these crops throughout the world. The volume deals with the scientific approach of growing underexploited spices with the intention of popularizing them. Separate chapters on the importance of each spice, methods of growing and harvesting, and recent research from around the world, along with future strategies, are covered.

**Diseases Of Spice Crops** L. Darwin Christdhas Henry, 2022-08-09. A spice is a seed, fruit, root, bark, or any other plant part. Spices give aroma, color, flavor, taste, and texture to food. Each spice has its unique specific compounds that impart these sensual qualities. Spices are often used in medicines, religious rituals, cosmetics, and perfume production. In this book, the diseases affecting 29 spice crops have been dealt with. Description about each crop and the produce, as well as the symptoms and possible control measures of the diseases attacking the crop, is described in detail. A number of color photographs of the crops and produce and symptoms manifested by the diseases have been given. Further general characters of different genera of fungi causing the diseases, along with figures depicting the life cycle of the fungal pathogens, have also been included.

**Spice Crops Production Technology** P.C. Das, 2014-07-01. Spices are very important as food and as medicine, and they bring out the unique natural taste of cuisines and could be used to change the look of the food to make it more attractive in colour. The book is written in simple and lucid language to provide basic information about cultivation of spice crops.

**Botany And Breeding Of Spice Crops** A.B. Sharangi, Md. Nasim Ali, Syandan Sinha Ray, 2021-10-09. The book throws insights on the concepts of origin and domestication of spice crops. There is an elaborate description regarding different modes of reproduction of plants along with crop-specific techniques regarding emasculation and pollination techniques. Conventional plant breeding methods have categorically been explained as these concepts would help spice breeders to choose the appropriate breeding tool. Detailed ideas from tissue culture to genomics-assisted breeding, especially the theory and applications of various omics viz. metabolomics, genomics, transcriptomics, proteomics, etc., have been elaborated. Finally, different spice breeding information has been comprehensively

documented in this book with some useful references to future directions of spice breeding throughout the world The book shall pave the way for new age researchers faculties plant breeders policy makers and amateur readers towards theoretical and empirical studies as well      **Breeding of Vegetable, Tuber and Spice Crops** Mr. Rohit Manglik,2024-04-04
