offer a key to understand the deep significance and complexity of the path to follow to become parents and to face fears linked to the difficulty of procreation using the tools of observation and psychoanalytic listening. Reviewing several experiences of clinical work, the authors offer reflections on the personal experiences of women and couples and the difficulties which can be met when the desire for a child is disappointed. Infanticide in Tudor and Stuart England Josephine Billingham, 2025-10-01 Infanticide in Tudor and Stuart England explores one of society's darkest crimes using archival sources and discussing its representation in the drama, pamphlets and broadside ballads of the early modern period. It takes the reader on a journey through the streets and taverns where street literature was hawked to the playhouses where the crime was dramatized and the courts where it was tried and punished. Using a regional microstudy of coroners' inquests and churchwardens' presentments coupled with theories of liminality, marginality and rites of passage, it reveals complex and contradictory attitudes to infants, women and the crime. As well as considering unwed women, the most common perpetrators of infanticide, the study shows that married women, men and the local community were also culpable and the many reasons for this. Infanticide in Tudor and Stuart England is set in its European and historical contexts, revealing surprising continuities across time.
