**Spin Span Spun** Bette Hochberg, 1979      **Weaving the Word** Kathryn Sullivan Kruger, 2001 Through an analysis of specific weaving stories the difference between a text and a textile becomes blurred Such stories portray women weavers transforming their domestic activity of making textiles into one of making texts by inscribing their cloth with both personal and political messages **BOOK JACKET**      Respect the Spindle Abby Franquemont, 2013-02-15 Enjoying a resurgence in popularity thanks to the current trend of DIY crafts the hand spindle remains one of the most productive versatile and convenient tools for creating stunning fiber arts from home as this beautifully illustrated guide from a veteran spinner and spindle aficionado demonstrates With step by step instructions this essential manual details the basic steps of spinning and then advances to the more complicated spinning wheel showing how to use the spindle to make specific types of yarn explaining traditional spindle spinning techniques and detailing five simple projects designed to instill confidence in creating a variety of yarns with this simple tool Combining fascinating historical narratives traditions and cultures from around the globe with vivid photography this all encompassing tour of the spindle also boasts easy to follow contemporary techniques and styles that affirm the tool s enduring legacy      Spin to Weave Sara Lamb, 2013-08-26 For spinners and weavers alike Get in depth information on fiber properties and color choices as well as beautifully photographed samples Spin to Weave is not simply a how to spin book but a how to spin exactly what you want book Weavers who spin their own yarns have the ability to choose fiber type method of twist insertion woolen worsted twist amount and or direction finishing methods and grist Author Sara Lamb focuses on the process of spinning for specific results providing detailed instructions a sampling of projects variations and a gallery of pieces by other spinners Sara takes the reader to the very source of woven fabric introducing the thought processes and concepts related to choosing fibers and how to spin them with finished fabric in mind

Fortune's Wheel Elizabeth A. Campbell, 2003 This volume explores the ways that Charles Dickens appropriated and made central to his novels the dominant symbol of his age The author argues that Dickens contribution to the iconographic and narrative traditions was to fuse the classical image of the wheel fortune with the industrial one      *Made from Scratch* Jean Zimmerman, 2012-11-13 A stunning celebration and reappraisal of the importance of women s work Made from Scratch addresses the tug that many Americans feel between our professional and private lives In this stunning celebration and reappraisal of the importance of women s work acclaimed journalist Jean Zimmerman poignantly addresses the tug that many Americans of the twenty first century feel between our professional and private lives With sharp wit and intelligence she offers evidence that in the current domestic vacuum we still long for a richer home life a paradox visible in the Martha Stewart phenomenon in the continuing popularity of women s service magazines such as Better Homes and Gardens Family Circle and Ladies Home Journal whose combined circulation of over 17 million is nearly twice the combined circulation of Time Newsweek and U S News World Report and the booming business of restorations where onlookers get a hands on view

of domestic life as it flourished in past centuries This book is about the ways home traditions passed from one generation to the next baking a birthday cake from scratch cherishing family heirlooms or discovering the satisfaction of piecing a quilt sustain our souls especially in our ever more processed synthetic world where we buy homemade goods and fail to see the irony in that Made from Scratch tells the story of the unsung heroines of the hearth investigating the history of female domesticity and charting its cultural changes over centuries Zimmerman traces the lives of her own family's homemakers from her tiny but indomitable grandmother who managed a farm strangled chickens with her bare hands and sewed all the family clothing to her mother who rejected her country upbringing yet kept a fastidious suburban home where the gender divide stayed firmly in place to her own experiences as a wife and mother weaned on the Women's Movement of the 1970s with its emphatic view that housework was a dirty word and that the domestic sphere was to be fled rather than cherished In this book Zimmerman questions the unexamined trade off we have made in a shockingly brief time span as we've progressed from home raised chickens to frozen TV dinners to McNuggets from the food court at the mall What is lost when we no longer engage as individuals and as a community in the ancient rituals of food craft and shelter Whisper of Stone Tess Dawson, 2009-07-16 Religion

**Prehistoric, Ancient Near Eastern & Aegean Textiles and Dress** Mary Harlow, Cécile Michel, Marie-Louise Nosch, 2014-09-30 Textile and dress production from raw materials to finished items has had a significant impact on society from its earliest history The essays in this volume offer a fresh insight into the emerging interdisciplinary research field of textile and dress studies by discussing archaeological iconographical and textual evidence within a broad geographical and chronological spectrum The thirteen chapters explore issues such as the analysis of textile tools especially spindle whorls and textile imprints for reconstructing textile production in contexts as different as Neolithic Transylvania the Early Bronze Age North Aegean and the Early Iron Age Eastern Mediterranean the importance of cuneiform clay tablets as a documentary source for both drawing a detailed picture of the administration of a textile industry and for addressing gender issues such as the construction of masculinity in the Sumerian kingdoms of the 3rd millennium BC and discussions of royal and priestly costumes and clothing ornaments in the Mesopotamian kingdom of Mari and in Mycenaean culture Textile terms testify to intensive exchanges between Semitic and Indo-European languages especially within the terminology of trade goods The production and consumption of textiles and garments are demonstrated in 2nd millennium Hittite Anatolia from 1st millennium BC Assyria a cross disciplinary approach combines texts realia and iconography to produce a systematic study of golden dress decorations and finally the important discussion of fibres flax and wool in written and archaeological sources is evidence for delineating the economy of linen and the strong symbolic value of fibre types in 1st millennium Babylonia and the Southern Levant The volume is part of a pair together with Greek and Roman Textiles and Dress An Interdisciplinary Anthology edited by Mary Harlow and Marie Louise Nosch **The Competition of Fibres** Wolfram Schier, Susan Pollock, 2020-04-30 The central issues discussed in this new collected work in the highly successful

ancient textiles series are the relationships between fiber resources and availability on the one hand and the ways those resources were exploited to produce textiles on the other. Technological and economic practices, for example the strategies by which raw materials were acquired and prepared in the production of textiles, play a major role in the papers collected here. Contributions investigate the beginnings of wool use in western Asia and southeastern Europe. The importance of wool in considerations of early textiles is due to at least two factors. First, both wild as well as some domesticated sheep are characterized by a hairy rather than a woolly coat. This raises the question of when and where woolly sheep emerged, a question that has not up to now been resolvable by genetic or other biological analyses. Second, wool as a fiber has played a major role both economically and socially in both western Asian and European societies from as early as the 3rd millennium BCE in Mesopotamia and it continues to do so in different ways up to the modern day. Despite the importance of wool as a fiber resource, contributors demonstrate clearly that its development and use can only be properly addressed in the context of a consideration of other fibers, both plant and animal. Only within a framework that takes into account historically and regionally variable strategies of procurement, processing, and the products of different types of fibers is it possible to gain real insights into the changing roles played by fibers and textiles in the lives of people in different places and times in the past. With relatively rare, albeit sometimes spectacular exceptions, archaeological contexts offer only poor conditions of preservation for textiles. As a result, archaeologists are dependent on indirect or proxy indicators such as textile tools, e.g., loom weights, spindle whorls, and the analysis of faunal remains, to explore a range of such proxies and methods by which they may be analyzed and evaluated in order to contribute to an understanding of fiber and textile production and use in the past.

**Prehistoric Textiles** E. J.W. Barber, 2021-11-09. This pioneering work revises our notions of the origins and early development of textiles in Europe and the Near East. Using innovative linguistic techniques along with methods from palaeobiology and other fields, it shows that spinning and pattern weaving began far earlier than has been supposed. *Prehistoric Textiles* made an unsurpassed leap in the social and cultural understanding of textiles in humankind's early history. Cloth making was an industry that consumed more time and effort and was more culturally significant to prehistoric cultures than anyone assumed before the book's publication. The textile industry is in fact older than pottery and perhaps even older than agriculture and stockbreeding. It probably consumed far more hours of labor per year in temperate climates than did pottery and food production put together. And this work was done primarily by women. Up until the Industrial Revolution and into this century, in many peasant societies, women spent every available moment spinning, weaving, and sewing. The author, Elizabeth Wayland Barber, demonstrates command of an almost unbelievably disparate array of disciplines, from historical linguistics to archaeology and paleobiology, from art history to the practical art of weaving. Her passionate interest in the subject matter leaps out on every page. Barber, a professor of linguistics and archaeology, developed expert sewing and weaving skills as a small girl under her mother's tutelage. One could say she had been born and raised to write.

this book Because modern textiles are almost entirely made by machines we have difficulty appreciating how time consuming and important the premodern textile industry was This book opens our eyes to this crucial area of prehistoric human culture

Factory Girls Paul Chrystal,2022-12-01 Ever since there have been factories women and children have more often than not worked in those factories What is perhaps less well known is that women also worked underground in coal mines and overground scaling the inside of chimneys Young children were also put to work in factories and coalmines they were deployed inside chimneys often half starved so that they could shin up ever narrower flues This book charts the unhappy but aspirational story of women and children at work through the Industrial Revolution to the beginning of the 20th century Without women there would have been no pre industrial cottage industries without women the Industrial Revolution would not have been nearly as industrial and nowhere near as revolutionary Many women and children were obliged to take up work in the mills and factories long hours dangerous often toxic conditions monotony bullying abuse and miserly pay were the usual hallmarks of a day s work before they headed homeward to their other job keeping home and family together This long overdue and much needed book also covers the social reformers the role of feminism and activism and the various Factory Acts and trade unionism We examine how women and children suffered chronic occupational diseases and disabling industrial injuries life changing and life shortening and often a one way ticket to the workhouse The book concludes with a survey of the art literature and the music which formed the soundtrack for the factory girl and the climbing boys

**Women's Work: The First 20,000 Years Women, Cloth, and Society in Early Times** Elizabeth Wayland Barber,1995-09-17 A fascinating history of a craft that preceded and made possible civilization itself New York Times Book Review New discoveries about the textile arts reveal women s unexpectedly influential role in ancient societies Twenty thousand years ago women were making and wearing the first clothing created from spun fibers In fact right up to the Industrial Revolution the fiber arts were an enormous economic force belonging primarily to women Despite the great toil required in making cloth and clothing most books on ancient history and economics have no information on them Much of this gap results from the extreme perishability of what women produced but it seems clear that until now descriptions of prehistoric and early historic cultures have omitted virtually half the picture Elizabeth Wayland Barber has drawn from data gathered by the most sophisticated new archaeological methods methods she herself helped to fashion In a brilliantly original book Katha Pollitt Washington Post Book World she argues that women were a powerful economic force in the ancient world with their own industry fabric Spin Off ,1989 *Womens Work* E. J. W.
