Davis,2018-07-18 This volume of essays offers direct comparisons of historic Western and Buddhist perspectives on ethics and metaphysics tracing parallels and contrasts all the way from Plato to the Stoics Spinoza to Hume and Schopenhauer through to contemporary ethicists such as Arne Naess Charles Taylor and Derek Parfit It compares and contrasts each Western philosopher with a particular strand in the Buddhist

tradition in some chapters represented by individual writers such as Nagarjuna Vasubandhu Santideva or Tsong Khapa It does so in light of both analytic concerns and themes from the existentialist and phenomenological traditions and often in an ecumenical spirit that bridges both analytic and continentalist approaches Some of the deepest questions in ethics dealing with the scope of agency value laden notions of personhood and the nature of value in general are intertwined with questions in metaphysics One set of questions addresses how varying conceptions of selfhood relate to moral values e g the concern of self or selves for the well being of others another set of questions addresses how a conception of oneself or one s selves should or should not affect how one thinks of happiness or eudaimonia or in classical Indian terms artha sukha or nirvana Western philosophy has featured discussion of both but some would argue that certain traditions of Asian philosophy have offered a more sustained and even treatment of both sets of questions The Buddhist tradition in particular has not only featured much discussion on both fronts but has attracted many contemporary philosophers to its distinctive spectrum of approaches and to what is from many Western points of view a seemingly subversive analysis of ego selfhood and personhood whether in metaphysical phenomenological or other incarnations

The Importance of Non-Christian Religions in the Philosophy of Pierre Bayle Marta García-Alonso, John Christian Laursen, 2025-01-22 This book offers a fresh perspective on early modern philosophy by highlighting Pierre Bayle s engagement with non Christian sources If our major political ethical and epistemic doctrines were solely rooted in Christian genealogies it would seem necessary to include Christianity in the European Constitution However this book reveals a different story The anthropological insights gained from encounters with other lands not only enriched the ethical and political discussions of philosophers historians and literati but also paralleled the incorporation of empirical data from these regions into fields like medicine botany or navigation These accounts became the building blocks for ethical and political thought a wellspring of new ideas thereby making the understanding of other cultures and religions pivotal in reflecting upon the specificities of Europe Pierre Bayle s work exemplifies this transformative influence
