A Spirit Capable John Hogan, 1986 Edison to Enron Robert L. first permanent resident of Chicago The Power Makers Maury Klein, 2010-09-01 Maury Klein is one of America's most acclaimed historians of business and society. In *The Power Makers* he offers an epic narrative of his greatest subject yet: the power revolution that transformed American life in the course of the nineteenth century. The steam engine, the incandescent bulb, the electric motor, inventions such as these replaced backbreaking toil with machine labor and changed every aspect of daily life in the span of a few generations. The cast of characters includes inventors like James Watt, Elihu Thomson, and Nikola Tesla; entrepreneurs like George Westinghouse; savvy businessmen like J. P. Morgan, Samuel Insull, and Charles Coffin of General Electric. Striding among them like a colossus is the figure of Thomas Edison, who was creative genius and business visionary at once. With consummate skill, Klein recreates their discoveries, their stunning triumphs and frequent failures, and their unceasing bare-knuckled battles in the marketplace. In Klein's hands, their personalities and discoveries leap off the page. *The Power Makers* is a dazzling saga of inspired invention, dogged persistence, and business competition at its most naked and cutthroat: a biography of America in its most astonishing decades.

Planning as Persuasive Storytelling James A. Throgmorton, 1996-07 *Planning as Persuasive Storytelling* is a revealing look at the world of political conflict surrounding the Commonwealth Edison Company's ambitious nuclear power plant construction program in northern Illinois during the 1980s. Examining the clash between the utility, consumer groups, community-based groups, the Illinois Commerce Commission, and the City of Chicago, Throgmorton argues that planning can best be thought of as a form of persuasive storytelling. A planner's task is to write future-oriented texts that employ language and figures of speech designed to construct constituencies that the planner's vision is both desirable and feasible. Though seeking to persuade, the planner must also remain open to transformation through honest engagement with contending stories. Juxtaposing stories about efforts to construct Chicago's electric future, *Planning as Persuasive Storytelling* suggests a shift in how we think about planning. In order to account for the fragmented and conflicted nature of contemporary American life and politics, that shift would be away from science and the experts and toward persuasive storytelling by diverse authors. The Merchant of Power John F. Wasik, 2015-06-30 A brilliant account of an American mogul who inspired *Citizen Kane* brings Samuel Insull back to complicated life. Should revive interest in a forgotten giant. Chicago Sun Times. A timely rags-to-riches story. *The Merchant of Power* recounts how Sam Insull, right hand to Thomas Edison, went on to become one of the richest men in the world, pivotal in the birth of General Electric and instrumental in the creation of the modern metropolis with his invention of the power grid, which still fuels major cities today. John Wasik, awarded the National Press Club Award for Consumer Journalism, had unprecedented access to Sam Insull's archives, which include private correspondence with Thomas Edison. The extraordinary fall of a man extraordinary for his time is revealed in this cautionary tale about the excesses of corporate power. A focused look at one of the most interesting historical figures you've never heard of. Fascinating. Fortune. Does a fine job of telling the early story of utilities moguls and scandal. Chicago Tribune. I found the work of John Wasik not only personally enthralling but

an informal history of that traumatic time Studs Terkel Pulitzer Prize winning author of *The Good War* A bittersweet biography of one of the titans of American industry business and finance Highly readable Fort Worth Star Telegram A complex man whose life and times makes worthwhile reading Publishers Weekly Wasik has taken his cue from current corporate scandals such as Enron and WorldCom in deciding to pluck Insull from semiobscurity as many of Insull's contemporaries including FDR believed him to be guilty he was acquitted of orchestrating the first large scale corporate deception Library Journal

Planning Ethics Sue Hendler, 2018-04-17 Over the past fifty years professional understanding of planning has changed markedly In the past planning was primarily described as a technical activity involving data collection analysis and synthesis of physical plans and supporting policies Now planning is seen as a much broader set of human activities encompassing the physical world and also the realm of public and social services Not surprisingly planners discussions of ethics have evolved Professional ethics is regarded by many planners to be limited to a set of rules of behavior regarding interactions with the public sources of data government officials and one another This shift is symbolized by the evolution of the labels by which ethics is known from a circumscribed view of professional ethics to a broader concept of ethics in planning both of which are discussed in this book Sue Hendler argues that planners recognize that every act of planning pursues certain human values and is a series of statements about what we take to be right or wrong and what we take to represent the highest priorities of the society Planning Ethics explores planning within alternative moral theories including liberalism communitarianism environmentalism and feminism The contributors illustrate the application of these ethical principles in specific planning contexts encompassing community development land conversion waste management electric power planning and education planning This is the next generation of thinking on ethics and planning It will be a centerpiece of every planning curriculum
