

The background of the slide is a photograph of a sunset or sunrise over a body of water. The sun is low on the horizon, creating a bright, glowing reflection that stretches vertically down the center of the water. The sky is a mix of soft orange and pale yellow, while the water transitions from a dark, deep blue at the bottom to a lighter, shimmering orange near the horizon.

**Globalization of Communes** Yaacov Oved,2017-09-08 After World War II communes and cooperative communities became internationally oriented in their membership and networking began to develop Unlike earlier such enterprises these groups shared an openness to international relationships This was evident both in the groups social composition and in the extension of networks beyond their own country Such globalization opened up the possibility of comparative analysis which has become a trend in research since the 1950s The dynamism and speed with which voluntary communities have spread throughout the world is impressive In the 1950s there were only a few hundred such societies but by the end of the last century there were thousands These have taken a variety of forms There are religious and secular communes intentional communities ecological communities co housing projects various types of Christian communities communities of Eastern religions and spiritual communities inspired by New Age thought Yaacov Oved shows that such societies maintain a community based on cooperation and expand their influence through newspapers television and the Internet Their chief characteristic is their openness to the outside world and their search for a way to move beyond a world of individualism and competitiveness To accomplish this they embrace all the tools of the modern world Oved observes that those who predicted the failure of communes and intentional communities failed to appreciate the extent to which people in today s society aspire to communal life This book answers the doubters and does so with a sense of deep historical understanding
