Spiritual Cybernetics:

Spiritual Cybernetics Julian Comber, 1993-02-01 **The Cybernetic Brain** Andrew Pickering, 2010-04-15 Cybernetics is often thought of as a grim military or industrial science of control But as Andrew Pickering reveals in this beguiling book a much more lively and experimental strain of cybernetics can be traced from the 1940s to the present The Cybernetic Brain explores a largely forgotten group of British thinkers including Grey Walter Ross Ashby Gregory Bateson R D Laing Stafford Beer and Gordon Pask and their singular work in a dazzling array of fields Psychiatry engineering management politics music architecture education tantric yoga the Beats and the sixties counterculture all come into play as Pickering follows the history of cybernetics impact on the world from contemporary robotics and complexity theory to the Chilean economy under Salvador Allende What underpins this fascinating history Pickering contends is a shared but unconventional vision of the world as ultimately unknowable a place where genuine novelty is always emerging And thus Pickering avers the history of cybernetics provides us with an imaginative model of open ended experimentation in stark opposition to the modern urge to achieve domination over nature and each other **Mindset Mastery: Unlocking the Power of Self-Transformation**

Cybernetic Capitalism Jan Overwijk, 2025-01-07 This book offers a conceptual interrogation of how capital navigates its cybernetic environment Taking an immanent perspective the book develops a unique synthesis between Niklas Luhmann's systems theory and the critical theory tradition Overwijk shows how neoliberal capitalism's version of rationalization depends on the organization and management of society on the basis of cybernetic principles Overwijk seeks to update earlier critiques of cybernetic capitalism that stressed the system's colonization of its environment its making the entirety of social

life communicable Under today's cybernetic rationalization things are radically different Neoliberal political economy aims to incite the incalculability of the market platform capitalists venture to capitalize on the unpredictable efforts of their users and post Fordist management seeks to encourage the creativity of service workers As this book uniquely shows capital no longer aims at total communicability but instead seeks to provoke and exploit the incommunicability of its environment In this sense it offers an ecological theory of capitalism laying conceptual the groundwork for understanding the extractivist logic of the Anthropocene Cybernetic Capitalism shows how the cultural obsession with incommunicability that animates cybernetic rationalization has taken an irrationalist turn resurfacing in the mysticism of conspiracy theory and radical right politics The book offers a novel and compelling materialist interpretation of today's paradoxical connections between neoliberal rationalism and radical right irrationalism

Rise of the Machines: A Cybernetic History Thomas Rid, 2016-06-28 Dazzling Financial Times As lives offline and online merge even more it is easy to forget how we got here Rise of the Machines reclaims the spectacular story of cybernetics one of the twentieth century's pivotal ideas Springing from the mind of mathematician Norbert Wiener amid the devastation of World War II the cybernetic vision underpinned a host of seductive myths about the future of machines Cybernetics triggered blissful cults and military gizmos the Whole Earth Catalog and the air force's foray into virtual space as well as crypto anarchists fighting for internet freedom In Rise of the Machines Thomas Rid draws on unpublished sources including interviews with hippies anarchists sleuths and spies to offer an unparalleled perspective into our anxious embrace of technology

Neocybernetics and Narrative Bruce Clarke, 2014-09-15 Neocybernetics and Narrative opens a new

chapter in Bruce Clarke's project of rethinking narrative and media through systems theory. Reconceiving interrelations among subjects, media significations and the social, this study demonstrates second order systems theory's potential to provide fresh insights into the familiar topics of media studies and narrative theory. A pioneer of systems narratology, Clarke offers readers a synthesis of the neocybernetic theories of cognition formulated by biologists Humberto Maturana and Francisco Varela, incubated by cyberneticist Heinz von Foerster and cultivated in Niklas Luhmann's social systems theory. From this foundation, he interrogates media theory and narrative theory through a critique of information theory in favor of autopoietic conceptions of cognition. Clarke's purview includes examinations of novels *Mrs Dalloway* and *Mind of My Mind*, movies *Avatar*, *Memento* and *Eternal Sunshine of the Spotless Mind*, and even Aramis Bruno Latour's idiosyncratic meditation on a failed plan for an automated subway. Clarke declares the era of the cyborg to have ended, laid to rest as the ontology of technical objects is brought into differential coordination with operations of living, psychic and social systems. The second order discourse of cognition destabilizes the usual sense of cognition as conscious awareness, revealing the possibility of nonconscious and nonhuman forms of sentience.

Spiritual and Religious Tourism Ruth Dowson, Jabar Yaqub, Razaq Raj, 2019-08-12 This book reviews tourist motivations for making religious or spiritual journeys and the management aspects related to them. It explores sacred journeys across both traditional religions such as Christianity and Islam and newer forms of pilgrimage, faith systems and quasi religious activities such as sport, music and food. Demonstrating to the reader the intrinsic elements and events that play a crucial role within the destination management process, it provides a timely re-assessment of the increasing interconnections between religion and spirituality as a motivation for travel. Providing researchers and students of tourism, religious studies, anthropology and related subjects with an important review of the topic, this book aims to bridge the ever widening gap between specialists within the religious tourism management and education sectors.

Designing Delivery Jeff Sussna, 2015-06-03 Now that we're moving from a product economy to a digital service economy, software is becoming critical for navigating our everyday lives. The quality of your service depends on how well it helps customers accomplish goals and satisfy needs. Service quality is not about designing capabilities but about making and keeping promises to customers. To help you improve customer satisfaction and create positive brand experiences, this pragmatic book introduces a transdisciplinary approach to digital service delivery. Designing a resilient service today requires a unified effort across front office and back office functions and technical and business perspectives. You'll learn how to make IT a full partner in the ongoing conversations you have with your customers. Take a unique customer centered approach to the entire service delivery lifecycle. Apply this perspective across development, operations, QA, design, project management and marketing. Implement a specific quality assurance methodology that unifies those disciplines. Use the methodology to achieve true resilience, not just stability.

My Kind of Sound Enrique Encabo, 2020-11-24 This volume explores the

importance and significance that music has in our lives The relationship between music and identity is based on conceptions about meanings and identification especially powerful when connected with youth and popular music We narrate ourselves in a musical way and we must study music as culture rather than music in culture The contributions to this book attend to emerging phenomena such as the rise of the Reggaeton music around the world the importance of music in anime media and music industry changes and uncertainties in the new millennium Music is art but it is also an industry and a business and the two are intertwined through the sale of tickets original formulas are obtained and in the same way products not just musical but multimedia are born from alternative culture eventually becoming mainstream In addition this book also takes into account iconic artists such as Nirvana David Bowie or Miley Cyrus and the important contribution of music to the narrative and success of popular TV series analysing cases such as Babylon Berlin and Vikings From Blade Runner 1982 to current television mainstream productions the music image alliance does not only satisfy and distract us but also challenges us and forces us to rethink our view of the world

Red Enlightenment Graham Jones, 2023-05-09 Why we need a materialist spirituality for the secular left and how to build one The left commonly rejects religion and spirituality as counter revolutionary forces citing Marx's famous dictum that religion is the opium of the people Yet forms of spirituality have motivated struggles throughout history ranging from medieval peasant uprisings and colonial slave revolts to South American liberation theology and the US civil rights movement And in a world where religion is growing and political movements are ridden with conflict burnout and failure what can the left learn from religion Red Enlightenment argues not only for a deepened understanding of religious matters but calls for the secular left to develop its own spiritual perspectives It proposes a materialist spirituality built from socialist and scientific sources finding points of contact with the global history of philosophy and religion From cybernetics to liberation theology from ancient Indian and Chinese philosophy to Marxist dialectical materialism from traditional religious practices to contemporary art music and film Red Enlightenment sets out a plausible secular spirituality a new socialist praxis and a utopian vision

One Origin of Digital Humanities Julianne Nyhan, Marco Passarotti, 2019-11-26 This book gathers and makes available in English with new introductions previously out of print or otherwise difficult to access articles by Fr Roberto Busa S J 1913-2011 Also included is a comprehensive bibliography of Busa an oral history interview with Busa's translator and a substantial new chapter that evaluates Busa's contributions and intellectual legacies The result is a groundbreaking book that is of interest to digital humanists and computational linguists as well as historians of science technology and the humanities As the application of computing to cultural heritage becomes ever more ubiquitous new possibilities for transmitting shaping understanding questioning and even imagining the human record are opening up Busa is considered by many to be among the pioneers in this field and his research on projects like the Index Thomisticus is one of the earliest known examples of a humanities project that incorporated automation it continues to be widely cited and used

today Busa published more than 350 academic articles and shorter pieces in numerous languages but despite the unquestionable importance of his early work for understanding the history and development of fields like humanities computing and computational linguistics a large part of his canon and thinking remained inaccessible or difficult to access until this book
