Oxford Textbook of Spirituality in Healthcare Mark Cobb,Christina Puchalski,Bruce Rumbold,2012-08-09 The relationship between spirituality and healthcare is historical intellectual and practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource

Integrating Spirituality in Health and Social Care Wendy Greenstreet,2006 This practical guide considers spiritual care as an explicit component of health and social care and takes into account not only religious cultural and spiritual views but also the value of music art and other creative therapies

Healthcare and Spirituality Stephen Kliever,John W. Saultz,2006 Addresses the distance between patients and healthcare professionals by using a patient centred approach known as the

biopsychosocial model or contextual care Aimed at healthcare professionals including doctors nurses therapists and others this book provides a framework to improve communication with patients and their families Culture, Spirituality and Religious Literacy in Healthcare Daniel Enstedt,Lisen Dellenborg,2023-10-19 Elaborating with the concepts of culture and religious literacy this volume examines theoretical methodological and empirical aspects of the practice and study of religion and non religion culture spirituality and worldviews within healthcare In modern multi cultural and multi religious societies a host of new issues have arisen concerning culture religion and spirituality within healthcare especially when people face serious and life limiting illness Healthcare professionals are faced with challenges addressing and handling patients cultural expressions of religiosity spirituality and existential concerns The variety needs to be met without essentializing the concepts of culture and religion and with an ability to include the non religious as well as new types of spiritualities This collection reflects on the tension between cultural religious and spiritual dimensions of care in a secularized healthcare institution and describes implications of this tension for healthcare professionals and patients The book engages with an ongoing scholarly discussion about religious literacy in healthcare and contributes perspectives experiences and empirical examples from the Nordic countries especially Sweden It gives suggestions for practical application of research to healthcare practice highlighting challenges and ideas for how to integrate religious non religious and spiritual dimensions in care This is an important contribution to the literature on religious literacy and provides a vital reference for students scholars and healthcare professionals with an interest in the complex relationship between culture spirituality and religion in healthcare Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Emerging Values in Health Care Stephen Pattison,Roisin Pill,Huw Thomas,Ben Hannigan,2010-02-15 This volume explains how health care professions and their values have changed over the last forty years charting where they have come from where they are now and how they might develop in the future There is coverage of a wide range of professions within healthcare Chapters are followed by critical responses from senior practitioners *Spiritual Assessment in Healthcare Practice* Professor Wilfred McSherry,Dr Linda Ross,2010 There has been a groundswell of interest in and recognition of the importance the spiritual part of a person's life has to play in coping with recovery from illness as well as in the attainment and maintenance of health wellbeing and quality of life Addressing the spiritual part of life is now a key part of the health care professional's job but this raises the question of how this part of life can be assessed and catered for and how health care professionals might be equipped for this task Wilf McSherry and Linda Ross's new edited text tackles this very issue with contributors from different disciplines including nursing medicine theology and chaplaincy and countries UK USA Malta offering their own perspectives on this important part of care Each chapter therefore has its own unique style but is concerned with one outcome to see spiritual assessment and care as an integral part of holistic care whatever the setting Contents include Introduction Linda Ross

 to have had the opportunity to peruse the second edition of Palliative Care Nursing This book authored predominately by UK

 summary of key points with both classic and new relevant literature well integrated into the text I have also been particularly
 impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of
 palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing
 literature Carol Tishelman Karolinska Institutet Stockholm Sweden I find Palliative Care Nursing a very attractive book for
 nurses but also for other disciplines to learn about nursing and to learn about palliative care The book is voluminous
 informative and educationally well constructed Frameworks and models in this book will give nurses the opportunity to make
 up their own process to offer support and be a carer for the incurably ill person and his/her family as a skilled companion
 This book gives the possibility for nurses to spread one clear voice about palliative care nursing Congratulations to all the
 authors Martine De Vlieger Palliatieve Hulpverlening Antwerpen v z w University of Antwerp Belgium This book should be
 compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life
 It provides a comprehensive account of the major issues clinical professional sociological and political that confront
 contemporary palliative care while also offering strategies to move forward The real world of palliative care is described and
 critiqued and the rhetoric is dispensed with This book is a vital resource for nursing practice learning and teaching Associate
 Professor Peter Hudson RN PhD Director of the Centre for Palliative Care Research and Education St Vincent's Hospital and
 The University of Melbourne Australia This is an excellent book for anyone completing either an academic qualification or
 who wants to understand the who what and where of palliative care both in the UK and abroad Its detail is balanced with
 case studies and practical illustrations that bring the academic nature of its writing to life For reference purposes for anyone
 completing academic work it has to be an absolute must Nursing Times The second edition of this innovative textbook has
 been extensively revised and updated to reflect new global developments in palliative care This textbook reviews current
 research and examines the evidence base for palliative care policy and practice Over a third of the chapters are newly
 commissioned from leading international contributors Building on the widely acclaimed original edition the textbook focuses
 on palliative care for adults in a variety of care environments The first three sections use a novel framework the trajectory of

life limiting illness to cover key issues including What happens to people as they become ill How individuals cope as they near death and are dying How families and friends deal with bereavement and loss The final section addresses contemporary issues in nursing and inter professional working The book is written with helpful overviews and in an informative and reader friendly style There are numerous examples of clinical situations and research studies which are examined in depth to illustrate debates in palliative care The textbook spans the range of end of life contexts which are of relevance to practitioners educationalists and researchers Palliative Care Nursing is essential reading for post qualification nursing students and all nurses and health and social care professionals who provide care to people with advanced illness and those who are near the end of life This broad ranging critical text will be invaluable to students and practitioners working with people and their families near the end of life

Revealing the richness and depth of understanding that chaplaincy brings to direct work with patients these in depth case studies and critical responses from other chaplains and healthcare professionals give insight into spiritual carer patient work in a range of settings and the vital work of chaplains in the healthcare team

Spirituality and Social Work Margaret Holloway, Bernard Moss, 2010-05-07 Written by two leading authors in the field Social Work and Spirituality provides a critical engagement with the concept of spirituality and a much needed framework for the integration of spiritual care in mainstream practice It is fundamental reading for all students of social work theory ethics and practice

Chaplaincy and the Soul of Health and Social Care Ewan Kelly, John Swinton, 2019-12-19 Gathering together thoughts and visions of experienced practitioners academics educators and strategic leaders from around the world this edited volume sheds light on the nature of chaplaincy and its role and significance within ever changing contemporary healthcare systems A wide range of issues central to spiritual care delivery are covered including reflections on what it feels like to be cared for by a chaplain through illness the nature of chaplaincy as a profession and how chaplains can engage with healthcare institutions in ways that have integrity yet are also deeply spiritual The focus throughout is that chaplaincy should not only be guidance for people in distress as a form of crisis intervention but is rather about helping to promote wellbeing and enhance people's quality of life Where specialisms tend to fragment systems and individuals this book seeks to show that true health and wellbeing can only be found through a holistic approach and shows how chaplaincy can bring this to the table This book is for anyone who recognises the centrality of spirituality for wellbeing and wishes to see what that might look like in practice
