A stylized landscape illustration. The top half features a light beige sky with a small black arrow pointing right in the upper right corner. Below the sky is a grey, textured area representing water, with horizontal lines. In the foreground, there are pink, jagged mountain peaks. The title 'SPLINTERED INNOCENCE' is written in large, white, bold, sans-serif capital letters across the middle of the image, partially overlapping the water and mountains.

Accounts of Innocence Joseph E. Davis,2005 Since a new sensitivity and orientation to victims of injustice arose in the 1960s categories of victimization have proliferated Large numbers of people are now characterized and characterize themselves as sufferers of psychological injury caused by the actions of others In contrast with the familiar critiques of victim culture Accounts of Innocence offers a new and empirically rich perspective on the question of why we now place such psychological significance on victimization in people s lives Focusing on the case of adult survivors of childhood sexual abuse Joseph E Davis shows how the idea of innocence shaped the emergence of trauma psychology and continues to inform accounts of the past and hopes for the future in therapy with survivor clients His findings shed new light on the ongoing debate over recovered memories of abuse They challenge the notion that victim accounts are an evasion of personal responsibility And they suggest important ways in which trauma psychology has had unintended and negative consequences for how victims see themselves and for how others relate to them An important intervention in the study of victimization in our culture Accounts of Innocence will interest scholars of clinical psychology social work and sociology as well as therapists and victim activists
