Spontaneous Psi, Depth Psychology, and Parapsychology Betty Shapin, 1992 Parapsychology in the Twenty-First Century Michael A. Thalbourne, Lance Storm, 2014-09-24 By now parapsychology should have become an accepted scientific field of research However there is great resistance to parapsychological research despite the strength of evidence in favor of conducting it This collection of essays focuses on the future of the psychical research field One essay speculates about a kind of future when psychic phenomena are studied in every university Another identifies 10 areas of potential difficulty facing parapsychology Other essays indicate areas where conclusions may need re examination and refinement and presents possibilities for innovative approaches to future study Some of the areas of study covered include altered states of consciousness ESP Meta Analysis the theory of psychopraxia and sociological and phenomenological issues Trickster and the Paranormal George P. Hansen, 2001-08-20 Paranormal and supernatural events have been reported for millennia They have fostered history s most important cultural transformations e g via the miracles of Moses Jesus Mohammed Paranormal phenomena are frequently portrayed in the world's greatest art and literature as well as in popular TV shows and movies Most adults in the U S believe in them Yet they have a marginal place in modern culture No university departments are devoted to studying psychic phenomena. In fact a panoply of scientists now aggressively denounces them These facts present a deeply puzzling situation But they become coherent after pondering the trickster figure an archaic being found worldwide in mythology and folklore The trickster governs paradox and the irrational but his messages are concealed This book draws upon theories of the trickster from anthropology folklore sociology semiotics and literary criticism It examines psychic phenomena and UFOs and explains why they are so problematical for science Parapsychology Etzel Cardeña, John Palmer, David Marcusson-Clavertz, 2015-08-14 Many people have experienced such unusual phenomena as dreams that later seem to correspond with unforeseeable events thinking of a long lost friend just before he or she unexpectedly calls or the ability to feel the presence of deceased loved ones What many do not realize is that these types of experiences have been researched for more than a century by eminent scientists including Nobel laureates Most of these researchers have concluded that some of these phenomena do occur although we are far from explaining them to everyone s satisfaction This book is the first in almost 40 years to provide a comprehensive scientific overview of research in the field of parapsychology explaining what we know and don't know about so called psi phenomena such as telepathy precognition or psychokinesis Contributors evaluate the evidence for these phenomena accounting for factors such as selective memory wish fulfillment and incorrect methods or analyses in some cases offering psychological physical and biological theories Instructors considering this book for use in a course may request an examination copy here The Gold Leaf Lady and Other Parapsychological Investigations Stephen E. Braude, 2008-11-15 For over thirty years Stephen Braude has studied the paranormal in everyday life from extrasensory perception and psychokinesis to mediumship and materialization The Gold

Leaf Lady and Other Parapsychological Investigations is a highly readable and often amusing account of his most memorable encounters with such phenomena Here Braude recounts in fascinating detail five particular cases some that challenge our most fundamental scientific beliefs and others that expose our own credulousness Braude begins with a south Florida woman who can make thin gold colored foil appear spontaneously on her skin He then travels to New York and California to test psychokinetic superstars and frauds like Joe Nuzum who claim to move objects using only their minds Along the way Braude also investigates the startling allegations of K R a policeman in Annapolis who believes he can transfer images from photographs onto other objects including his own body and Ted Serios a deceased Chicago elevator operator who could make a variety of different images appear on Polaroid film Ultimately Braude considers his wife s surprisingly fruitful experiments with astrology which she has used to guide professional soccer teams to the top of their leagues as well as his own personal experiences with synchronicity a phenomenon he argues that may need to be explained in terms of a refined extensive and dramatic form of psychokinesis Heady provocative and brimming with eye opening details and suggestions The Gold Leaf Lady and Other Parapsychological Investigations will intrigue both adherents and detractors of its controversial subject matter alike

Stokes, 2024-10-18 Western science teaches that our beings are governed by the laws of physics and our minds play no part There are however flaws in this thinking most prominently unexplained paranormal phenomena that defy explanation by modern theories of physics Collected by parapsychologists these data include extrasensory perception ESP poltergeist occurrences and psychokinesis Much of the current data in parapsychology and their implications for understanding the true nature of the self are examined here Beginning with a consideration of several instances of spontaneous psi the book examines the theoretical explanations of paranormal phenomena It covers the hypothesis and evidence that minds contain the so called hidden variables that determine the outcomes of the quantum process thus interweaving parapsychology with modern physics The reader is also forced to consider in detail the relationship between the conscious mind and the physical brain and the evidence that minds survive
