Spot Gardens:

Spot Gardens Robert Atkinson, 1973-07 *The Urban Garden City* Sandrine Glatron, Laurence Granchamp, 2018-03-24

This book provides an interdisciplinary overview of the role of gardens in cities throughout different historical periods. It shows that thanks to various forms of spatial and social organisation, gardens are part of the material urban landscape, biodiversity, symbolic and social shape, and assets of our cities and are increasingly becoming valued as an order to follow. Gardens have long been part of the development of cities serving different purposes through the ages: shaping neighborhoods to promote health or hygiene, introducing aesthetic or biological elements, gathering the citizens around a social purpose, and providing food and diversity in times of crisis. Highlighting examples that can serve as the basis for comparisons, the chapters offer a brief panorama of experiences and models of gardens in the city in the European context and in various periods of history, while also discussing issues related to garden cities, urban agriculture, and community gardens. The contributors are university staff from various disciplines in the human and life sciences in discourse with other academics but also with practitioners who are interested in experiences with urban gardens and in promoting an awareness of their spatial, social, and philosophical goals throughout history. The book will appeal to urban geographers, sociologists, and historians but also to urban ecologists dealing with ecosystem services, biodiversity, and sustainable development in cities. From a more operational standpoint, landscape planners and architects are sure to find many of the projects enlightening and inspirational.

The theme of magic and enchantment will run throughout the book in Donni's engaging tone of writing and photography. [Spot Gardens](#) Robert E. Atkinson, 1973 **Sweet Spots** Teresa A. Toulouse, Barbara C. Ewell, 2018-05-17. Contributions by Carrie Bernhard, Scott Bernhard, Marilyn R. Brown, Richard Campanella, John P. Clark, Joel Dinerstein, Pableaux Johnson, John P. Klingman, Angel Adams Parham, Bruce Boyd Raeburn, Ruth Salvaggio, Christopher Schaberg, Teresa A. Toulouse, and Beth Willinger. Much has been

written about New Orleans's distinctive architecture and urban fabric as well as the city's art literature and music. There is however little discussion connecting these features. Sweet Spots, a title drawn from jazz musicians' name for the space in between performers and dancers where music best resonates, provides multiple connections between the city's spaces, its complex culture, and its future. Drawing on the late Tulane architect Malcolm Heard's ideas about interstitial spaces, this collection examines how a variety of literal and represented in-between spaces in New Orleans have addressed race, class, gender, community, and environment. As scholars of architecture, art, African American studies, English history, jazz philosophy, and sociology, the authors incorporate materials from architectural history and practice, literary texts, paintings, drawings, music, dance, and even statistical analyses. Interstitial space refers not only to functional elements inside and outside of many New Orleans houses, high ceilings, hidden staircases, galleries, and courtyards, but also to compelling spatial relations between the city's houses, streets, and neighborhoods. Rich with visual materials, Sweet Spots reveals the ways that diverse New Orleans spaces take on meanings and accrete stories that promote certain consequences both for those who live in them and for those who read such stories. The volume evokes, preserves, criticizes, and amends understanding of a powerful and often missed feature of New Orleans's elusive reality. *The Plant Disease Bulletin*, 1943

Consummate teachers, the Suttons use the same easy-to-understand style that has made both of their previous books in the How to Spot series bestsellers. Taking up where field guides leave off, they reveal which habitats are sure to hold large butterfly populations and which specific host plants attract butterflies. They address how to use binoculars and share the secrets of how to approach a
