**Trading the Fruits of the Land** Tjalling Dijkstra,2018-12-20 First published in 1997 this volume contributes to the knowledge for the trade of vegetables fruits and tubers so called horticultural commodities As African policy makers try to keep pace with new developments in private food trade they require knowledge of the structures of private trade systems and the factors that govern their long term development The study analyses the structure and development of horticultural marketing channels in Kenya It is based primarily on surveys of some 500 farmers in four districts and 750 horticultural traders in 18 market places Commercial horticultural farmers domestic traders export traders agents facilitators marketing cooperatives and processors are all reviewed The study devotes special attention to the efficiency of collecting wholesalers and to the development of rural assembly markets It develops a model which can elucidate vertical differentiation processes in the Kenyan horticultural channels The analyses show that marketing channel theory can be of great relevance to the developing world The proposed

vertical differentiation model can aid in predicting future changes in horticultural marketing systems in Kenya as well as in other African countries

**SPSS Step by Step** Cole Davis, 2013-02-13 SPSS Step by Step Essentials for Social and Political Science is a concise text for beginners and intermediate statistical test users. Clearly written and with no mathematical formulae it features a chapter on qualitative data analysis, multiple regression, survival analysis, the time until events and a brief cogent introduction to factor analysis. A logically ordered guide to analysing everyday problems, SPSS Step by Step is distinctive in being both easy to grasp and readable. Tests throughout the book are accompanied by clear worked examples. These include Wilcoxon, Friedman, Mann-Whitney, Kruskal-Wallis, paired and unpaired T tests, ANOVA, binomial, McNemar, Chi-square, Pearson, Spearman, partial correlation, simple linear regression, multiple regression, factor analysis, Kaplan-Meier and life tables. Invaluable for undergraduate and postgraduate students and academics undertaking or teaching research, this unique book will also be of interest to professionals in social care, the criminal justice system, health and education.

Essential Statistics For Social Research Michael Malec, 2018-10-08 We need only scan a newspaper or magazine, turn on a news broadcast or open a sociology text or journal to see that we live in an age that is heavily dependent on statistical information. The extent of this dependency is such that it is rather difficult to be an educated person without having at least a passing acquaintance with basic statistics. More to the point, it is virtually impossible to be a capable social scientist without having a definite, if elementary, understanding of some basic statistics and statistical methods of analysis. But a casual acquaintance with a few simple statistics will not serve the social scientist who attempts to read competently the literature of the field. And if one wishes to do quantitative social research, and most research published today is quantitative, a more thorough knowledge of statistics is imperative. The aspiring sociologist need only examine the books and articles that are being published today for evidence of this claim. A very large portion of the articles published in the major sociology journals use some form of statistical analysis. Some of these articles and other works published by sociologists are incomprehensible without a statistics background; others will simply be read less intelligently or with a lessened sense of appreciation or criticism.

**Risk Factors in the Mexican Origin and Anglo Infant Mortality, 1964-1984** William Parker Frisbie, Douglas Forbes, 1992

**Applying Regression and Correlation** Jeremy Miles, Mark Shevlin, 2000-11-24 This book takes a fresh look at applying regression analysis in the behavioural sciences by introducing the reader to regression analysis through a simple model building approach. The authors start with the basics and begin by re-visiting the mean and the standard deviation with which most readers will already be familiar and show that they can be thought of as a least squares model. The book then shows that this least squares model is actually a special case of a regression analysis and can be extended to deal with first one and then more than one independent variable. Extending the model from the mean to a regression analysis provides a powerful but simple way of thinking about what students believe are the more complex aspects of regression analysis. The authors gradually extend the model to include aspects of regression analysis such as non-linear

regression logistic regression and moderator and mediator analysis These approaches are often presented in terms that are too mathematical for non statistically inclined students to deal with Throughout the book maintains a conceptual non mathematical focus Most equations are placed in an appendix where a detailed explanation is given to avoid disrupting the flow of the main text This book will be indispensable for anyone using regression and correlation from undergraduates doing projects to postgraduate and researchers

**IBM SPSS for Introductory Statistics** George A. Morgan, Nancy L. Leech, Gene W. Gloeckner, Karen C. Barrett, 2011-02-14 Designed to help students analyze and interpret research data using IBM SPSS this book describes the use of statistics in user friendly non technical language to show readers how to choose the appropriate statistic based on the design interpret output and write about the results The authors prepare readers for all of the steps in the research process from design and data collection to writing about the results Discussions of writing about outputs data entry and checking reliability assessment testing assumptions and computing descriptive and inferential parametric and nonparametric statistics are included SPSS syntax along with the output is provided for those who prefer this format Provided by publisher

*Bibliographie der Wirtschaftswissenschaften* ,1985 *Biomeasurement* Dawn Hawkins, 2019 A refreshing student focused introduction to the use of statistics in the study of the biosciences Emphasising why statistical techniques are essential tools for bioscientists Biomeasurement removes the stigma attached to statistics by giving students the confidence to use key techniques for themselves
