Interdisciplinary Research in Technology and Management Satyajit Chakrabarti,Rintu Nath,Pradipta Kumar Banerji,Sujit Datta,Sanghamitra Poddar,Malay Gangopadhyaya,2021-09-14 The conference on Interdisciplinary Research in Technology and Management was a bold experiment in deviating from the traditional approach of conferences which focus on a specific topic or theme By attempting to bring diverse inter related topics on a common platform the conference has sought to answer a long felt need and give a fillip to interdisciplinary research not only within the technology domain but across

domains in the management field as well. The spectrum of topics covered in the research papers is too wide to be singled out for specific mention but it is noteworthy that these papers addressed many important and relevant concerns of the day.

The Credibility of Sovereignty - The Political Fiction of a Concept Elia R.G. Pusterla, 2015-12-19. The book deeply analyses the bilateral relations between Switzerland and the European Union and their effect on the former's sovereignty in the context of Europeanisation. This touches on philosophical debates on the complexity of sovereignty. What sovereignty is at stake when talking about Swiss EU relations. This issue not only faces the elusiveness of sovereignty as a concept but also the proliferation of hypocrisy on its presence within states. The book encounters the deconstructionist hypothesis stating that there is nothing to worry about but the belief there is something to worry about. Derrida's deconstruction of sovereignty allows indeed one to grasp the fictional essence of sovereignty based on the metaphysics of presence. The presence of self-positing sovereign ipseity is fictional since absent in the present but spectrally present in the belief of its presence to come. Sovereignty is a matter of credibility or the credible promise of a normative statement to come. Hence the book challenges the realist/neorealist argument stating that states are credibly sovereign until proven otherwise and explains that the debate on state sovereignty calls for the unveiling of this hypocritical epistemology cunningly disguised as an objective presence. Swiss EU relations thus become the cornerstone to not only theorise but also test sovereignty and deconstruct the two ontological and epistemological sides of the same coin or the modern hypocrisy of sovereignty. This deconstruction constitutes the very *problématique* of any attempt to understand whether and how a state can be sovereign and solve the problem as to how to neutralise the difference and identify the difference between credible and incredible claims of sovereignty. This *problématique* connects the theory and practice of sovereignty innovatively providing positivist evidence on the arguable credibility of the Swiss claim of sovereignty and confirming the presence of a theological dimension within politics.
