Spss For Introductory And Intermediate Statistics Second Edition:

SPSS for Introductory Statistics George Arthur Morgan, Nancy L. Leech, Gene W. Gloeckner, Karen C. Barrett, 2004-07 This book distinguishes itself from other SPSS resources through its unique integration of the research process including design and the use and interpretation of the statistics. Designed to help students analyze and interpret research data, the authors demonstrate how to choose the appropriate statistic based on the research design, interpret SPSS output, and write about the output in a research paper. The authors describe the use and interpretation of these statistics in user-friendly, non-technical language. The book prepares students for all of the steps in the research process from design and data collection to writing about the results. The new edition features SPSS 14.0 for Windows but can also be used with older and newer versions. There are also new problems, expanded discussions of effect sizes, and an expanded appendix on getting started with SPSS. The book features discussions of writing about outputs, data entry, and checking reliability, assessment, testing assumptions, and descriptive, inferential, and nonparametric statistics. Several related statistics are included in each chapter. SPSS syntax along with the output is included for those who prefer this format. Two realistic data sets are available on the book's CD and are used to solve the end-of-chapter problems. *SPSS for Introductory Statistics Third Edition* provides these helpful teaching tools. All of the key SPSS windows needed to perform the analyses. Complete outputs with call-out boxes to highlight key points. Interpretation sections and questions to help students better understand the output. Lab assignments organized the way students proceed when they conduct a research project. Extra SPSS problems for practice in running and interpreting SPSS. Helpful appendices on how to get started with SPSS, write research questions, and create tables and figures. This book is an ideal supplement for courses in either statistics or research methods taught in departments of psychology, education, and other social and health sciences. The Instructor's Resource CD features PowerPoint slides and answers to and additional information on the questions and problems.

Pelham, 2012-08-20 Intermediate Statistics A Conceptual Course is a student friendly text for advanced undergraduate and graduate courses It begins with an introductory chapter that reviews descriptive and inferential statistics in plain language avoiding extensive emphasis on complex formulas The remainder of the text covers 13 different statistical topics ranging from descriptive statistics to advanced multiple regression analysis and path analysis Each chapter contains a description of the logic of each set of statistical tests or procedures and then introduces students to a series of data sets using SPSS with screen captures and detailed step by step instructions Students acquire an appreciation of the logic of descriptive and inferential statistics and an understanding of which techniques are best suited to which kinds of data or research questions

Advancing Self-Directed Learning in Higher Education

Mncube, Dumsani Wilfred, Maphalala, Mncedisi Christian, 2023-05-01 Self directed learning SDL is considered a core concept in problem based learning PBL and student centered learning More importantly the current face to face model of curriculum

implementation faces many challenges that seem to question its dominance over other models. The violent nature of the COVID 19 pandemic has again vindicated SDL practitioners and research enthusiasts to continue seeking solutions that will enhance skills to cope in a rapidly changing technological globalized world. However, the higher education sector is challenged when promoting SDL due to a slow pace of digital integration since the education system is not fully transformed. This has necessitated an urgent need for global discourse on how universities globally are implementing SDL strategies to enhance the quality of curriculum delivery. *Advancing Self Directed Learning in Higher Education* provides insight into various strategic approaches that could be adopted for the successful implementation of SDL in higher education. It is written for professionals who want to improve their understanding of how to improve student teaching and learning and the quality of curriculum implementation in higher education. In this realm, this book provides ideas to its readers about the approaches pertaining to strategy and innovative measures, practical implementations, and tools in the field of curriculum and SDL. Covering topics such as educational technology, intentional education practice theory, and student experience, this premier reference source is an essential resource for teachers, policymakers, lecturers, research scholars, students of higher education, administrators, librarians, academicians, and researchers.

Intermediate Statistics Keenan A. Pituch, Tiffany A.

Whittaker, James P. Stevens, 2013-05-13 James Stevens' best-selling text *Intermediate Statistics* is written for those who use rather than develop statistical techniques. Dr. Stevens focuses on a conceptual understanding of the material rather than on proving the results. SAS and SPSS are an integral part of each chapter. Definitional formulas are used on small data sets to provide conceptual insight into what is being measured. The assumptions underlying each analysis are emphasized, and the reader is shown how to test the critical assumptions using SPSS or SAS. Printouts with annotations from SAS or SPSS show how to process the data for each analysis. The annotations highlight what the numbers mean and how to interpret the results. Numerical, conceptual, and computer exercises enhance understanding. Answers are provided for half of the exercises. The book offers comprehensive coverage of one-way power and factorial analysis of variance, repeated measures analysis, simple and multiple regression analysis of covariance, and HLM. Power analysis is an integral part of the book. A computer example of real data integrates many of the concepts. Highlights of the Third Edition include a new chapter on hierarchical linear modeling using HLM6, a CD containing all of the book's data sets, new coverage of how to cross-validate multiple regression results with SPSS, and a new section on model selection. Chapter 6: More exercises in each chapter. Intended for intermediate statistics or statistics II courses taught in departments of psychology, education, business, and other social and behavioral sciences, a prerequisite of introductory statistics is required. An Instructor's Resource is available upon adoption. See www.researchmethodsarena.com
