Sputnik Challenge:

The ^ASputnik Challenge Robert A. Divine, 1993-03-25 On October 4 1957 the Soviet Union launched a 184 pound metal ball called Sputnik into orbit around the Earth and America plummeted into a panic Nuclear weapon designer Edward Teller claimed that the United States had lost a battle more important and greater than Pearl Harbor and magazine articles appeared with such headlines as Are We Americans Going Soft In the White House President Eisenhower seemed to do nothing leading Kennedy in 1960 to proclaim a missile gap in the Soviet s favor Rarely has public perception been so dramatically at odds with reality In The Sputnik Challenge Robert Divine provides a fascinating look at Eisenhower s handling of the early space race a story of public uproar secret U 2 flights bungled missile tests the first spy satellite political maneuvering and scientific triumph He recreates the national hysteria over the first two Sputnik launches illustrating the anxious handwringing that the Democrats led by Senate Majority Leader Lyndon Johnson aggressively played for political gain Divine takes us to private White House meetings showing how Eisenhower worked closely with science adviser James Killian allowing him to take the lead in creating a civilian agency NASA which provided intelligent and forceful leadership for American space programs But the President also knew from priceless intelligence from U 2 flights over the U S S R that he had little to fear from the touted missile gap and he fought to limit the growth and multiplication of military missile programs Eisenhower s assurance however rested on classified information and he did little to instill his confidence in the public Nor could he boast of his early support for the secret spy satellite program which quickly replaced the U 2 plane after Gary Powers was shot down in 1960 So the public continued to worry feeding the national movement for educational reform as well as congressional maneuvering over funding for numerous strategic projects Eisenhower Divine writes possessed keen strategic vision and a sure sense of budgetary priorities but ultimately he flunked a crucial test of leadership when he failed to reassure the frightened public that their fears were groundless As a result he ultimately failed in his goal to limit military spending as well which led to a real missile gap in reverse Incisively written and deeply researched The Sputnik Challenge provides a briskly paced history of the origins of NASA the space race and the age of the ICBM **Counting the Public In** Douglas C. Foyle, 1999-07-06 The book examines the public s influence on foreign policy through case studies including the Formosa Straits crisis intervention at Dien Bien Phu the Sputnik launch the New Look defense strategy the Panama Canal Treaties the Soviet invasion of Afghanistan the Strategic Defense Initiative the Beirut Marine barracks bombing German reunification the Gulf War and intervention in Somalia and Bosnia Beyond Horizons David N. Spires, 1997 A Dictionary of the Space Age Paul Dickson, 2009-05-18 2009 Outstanding Academic Title Choice The launch of Sputnik 1 in 1957 ushered in an exciting era of scientific and technological advancement As television news anchors radio hosts and journalists reported the happenings of the American and the Soviet space programs to millions of captivated citizens words that belonged to the worlds of science aviation and science fiction suddenly became part of the colloquial language What s

more NASA used a litany of acronyms in much of its official correspondence in an effort to transmit as much information in as little time as possible To translate this peculiar vocabulary Paul Dickson has compiled the curious lingo and mystifying acronyms of NASA in an accessible dictionary of the names words and phrases of the Space Age Aviators fighter pilots and test pilots coined the phrases spam in a can how astronauts felt prelaunch as they sat in a tiny capsule atop a rocket booster tickety boo things are fine and the Eagle has landed Neil Armstrong s famous quote when Apollo 11 landed on the Moon This dictionary captures a broader foundation for language of the Space Age based on the historic principles employed by the Oxford English Dictionary and Webster s New Third International Dictionary Word histories for major terms are detailed in a conversational tone and technical terms are deciphered for the interested student and lay reader This is a must own reference for space history buffs

Higher Education for All Andrew Stone Higgins,2023-03-16 The 1960 California Master Plan for Higher Education remains to this day the largest and most ambitious attempt to provide free universal college education in the United States Yet the Master Plan the product of committed Cold War liberals unfortunately served to reinforce the very class based exclusions and de facto racism that plagued K 12 education in the nation s largest and most diverse state In doing so it inspired a wave of student and faculty organizing that not only forced administrators and politicians to live up to the original promise of the Master Plan quality higher education for all but changed the face of California itself Higher Education for All is the first and only comprehensive account of the California Master Plan Through deep archival work and sharp attention to a fascinating cast of historical characters Andrew Stone Higgins has excavated the forgotten history of the Master Plan from its origins in the 1957 Sputnik Crisis through Governor Ronald Reagan s financial starvation and his failed quest to introduce tuition to the student struggle to institute affirmative action in university admissions

The Province of All Mankind Stephen Bueno,2025-07-15 The Province of All Mankind is the story of a powerful idea about the cosmos Born in the science fiction literature of the nineteenth century and maturing in the Age of Apollo this idea held that outer space should be preserved as a sanctuary from human strife free from weapons warfare and political rivalry If humanity could somehow leave violence behind as it moved into space perhaps peace would finally reign Bucking a half century of space race scholarship Stephen Bueno argues that despite waging a totalizing Cold War the United States achieved stunning diplomatic successes that heralded the cosmos as a realm of peace and cooperation The early story of space politics is not primarily one of militarization but rather of political prescience and restraint The Province of All Mankind demonstrates that space became a unique domain of American foreign relations and international law and provides lessons for the Second Cold War unfolding over the horizon

In Sputnik's Shadow Zuoyue Wang,2009 In Sputnik s Shadow traces the rise and fall of the President s Science Advisory Committee from its ascendance under Eisenhower to its demise during the Nixon years Zuoyue Wang examines key turning points during the twentieth century including the beginning of the Cold War the debates over nuclear weapons the Sputnik crisis in 1957 the struggle over the Vietnam War

and the eventual end of the Cold War showing how the involvement of scientists in executive policymaking evolved over time and brings new insights to the intellectual social and cultural histories of the era **Days of Decision** Michael J.

How We Teach Science John L. Rudolph,2019-06-01 Despite an enduring belief that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and determine how science is perceived by the public **Total Cold War** Kenneth Osgood,2006-02-23 When President Dwight Eisenhower spoke of waging total cold war he was proposing nothing less than a global all embracing battle for hearts and minds His wide ranging propaganda campaign challenged world communism at every turn and left a lasting mark on the American psyche Kenneth Osgood now chronicles the secret psychological warfare programs America developed at the height of the Cold War These programs which were often indistinguishable from CIA covert operations went well beyond campaigns to foment unrest behind the Iron Curtain The effort was global U S propaganda campaigns targeted virtually every country in the free world Total Cold War also shows that Eisenhower waged his propaganda war not just abroad but also at home U S psychological warfare programs blurred the lines between foreign and domestic propaganda with campaigns that both targeted the American people and enlisted them as active participants in global contest for public opinion Osgood focuses on major campaigns such as Atoms for Peace People to People and cultural exchange programs Drawing on recently declassified documents that record U S psychological operations in some three dozen countries he tells how U S propaganda agencies presented everyday life in America to the world its citizens living full happy lives in a classless society where economic bounty was shared by all Osgood further investigates the ways in which superpower disarmament negotiations were used as propaganda maneuvers in the battle for international public opinion He also reexamines the early years of the space race focusing especially on the challenge to American propagandists posed by the Soviet launch of Sputnik Perhaps most telling Osgood takes a new look at President Eisenhower s leadership Believing that psychological warfare was a potent weapon in America s arsenal Ike appears in these pages not as a disinterested figurehead as he s often been portrayed but as an activist president who left a profound mark on national security affairs Osgood s distinctive interpretation places Cold War propaganda campaigns in the context of an international arena drastically changed by the communications revolution and the age of mass politics and total war It provides a new perspective on the conduct of public diplomacy even as Americans today continue to grapple with the challenges of winning other hearts and minds in another global struggle *Operation Moonglow* Teasel Muir-Harmony,2020-11-24 The moon landing was an important moment in history but many forget what

was happening behind the scenes discover the groundbreaking political history of the Apollo program in this riveting exploration of America's space missions Since July 1969 Neil Armstrong's first step on the Moon has represented the pinnacle of American space exploration and a grand scientific achievement Yet as Smithsonian curator Teasel Muir Harmony argues in *Operation Moonglow* its primary purpose wasn't advancing science Rather it was part of a political strategy to build a global coalition Starting with President John F Kennedy's 1961 decision to send astronauts to the Moon to promote American freedom over Soviet tyranny Project Apollo was central to American foreign relations From that perspective the critical event did not just take place on the lunar surface it took place in homes public squares palaces and schools around the world as Apollo captured global attention like never before After the Moon landing the Apollo astronauts and President Richard Nixon traveled the world to amplify the sense of participation and global unity shared by billions of people who followed the flight Drawing on a rich array of untapped archives and firsthand interviews with Apollo astronauts *Operation Moonglow* paints a riveting picture of the intersection of spaceflight geopolitics propaganda and diplomacy during the Cold War

The Bomb and America's Missile Age Christopher Gainor, 2018-10-15 How nuclear weapons helped drive the United States into the missile age The intercontinental ballistic missile ICBM designed to quickly deliver thermonuclear weapons to distant targets was the central weapons system of the Cold War ICBMs also carried the first astronauts and cosmonauts into orbit More than a generation later we are still living with the political technological and scientific effects of the space race while nuclear armed ICBMs remain on alert and in the headlines around the world In *The Bomb and America's Missile Age* Christopher Gainor explores the US Air Force's USAF decision in March 1954 to build the Atlas America's first ICBM Beginning with the story of the guided missiles that were created before and during World War II Gainor describes how the early Soviet and American rocket programs evolved over the course of the following decade He argues that the USAF was wrongly criticized for unduly delaying the start of its ICBM program endangering national security and causing America embarrassment when a Soviet ICBM successfully put Sputnik into orbit ahead of any American satellite Shedding fresh light on the roots of America's space program and the development of US strategic forces *The Bomb and America's Missile Age* uses evidence uncovered in the past few decades to set the creation of the Atlas ICBM in its true context not only in the America of the postwar years but also in comparison with the real story of the Soviet missiles that propelled the space race and the Cold War Aimed at readers interested in the history of the Cold War and of space exploration the book makes a major contribution to the history of rocket development and the nuclear age

The First Space Race Matt Bille, Erika Lishock, 2004 Offers an account of the competitive technological and political race between the United States and the Soviet Union and their leaders to launch satellites
