Brandon Plaster, 2015-03-15 Two centuries have passed since humans deemed the earth unfit for habitation Sealed away in dome covered cities floating miles above the surface the remaining population lives under the strict supervision of an elected Council and their masked leader Oxygen regulation has criminalized excess physical activity and in its absence art and cerebral pursuits have flourished but at a cost Now layers of paint coat the formerly translucent walls obscuring the views and memories of a planet once loved Twelve year old Lena wants to tear down these walls Her playful and rebellious nature brand her as an outcast and her only solace is in flashbacks of her now dead father who understood and nurtured her curiosity When Lena overhears the kindling of a revolution she journeys to join it and to show that she s not a helpless little girl But she must tread carefully for the art that she sees as a barrier others see as their freedom **Actively Unwoke**

Karlyn Borysenko, 2022-04-26 For the last several years we ve watched as woke political activists have staged destructive protests destroyed businesses hurled accusations of racism and white supremacy around as if those terms mean nothing and publicly bullied and canceled anyone who disagrees with them These authoritarians claim to represent social justice but they are about one thing power Their goal is nothing short of cultural revolution So what do we do about it Actively Unwoke explains what s going on and decodes the language the woke are using so that you can understand what we re up against To inspire you and explore actionable strategies you can take Karlyn Borysenko looks at ways real people have fought back in the real world This includes fighting back in the schools knowing how to act when the woke come to work taking a stand with your elected leaders and even a few subversive strategies just for fun This book also reveals how to survive cancelation yes it s possible and how to take care of yourself as you join a ragtag group of misfits to do battle with the greatest existential

threat of our time If you ever wondered what you would have done during the Civil Rights movement or in 1930s Germany the answer to that question lies in what you are doing now This fight isn't about left or right Democrat or Republican It's not about liberal values or conservative values It's about protecting American values This book will give you everything you need to join the unwoke army It's not enough to just be unwoke anymore it's time to be actively unwoke **Exit 38 Rock**

Climbing Guide Free Solo Publishing, Garth Bruce, 2006-06 **Driving Desired Futures** Michael Shamiyeh, 2014-01-23 Headed by the slogan Design Thinking a debate has unfolded over the last ten years about design methods which goes far beyond the specialist boundaries of design disciplines Executives and business owners today recognize the potential for economic innovation lying in the creative and analytical mindset of designers The extensive literature available on Design Thinking focuses on the methodology of the design process while the conditions necessary to spark innovation processes in the first place have long remained more or less unnoticed Driving Desired Futures starts here and asks how established innovations arise from a simple idea What criteria are mostly likely to be the basis from which the ideas of an individual can take hold in a social system What are conditions under which they can become incorporated into a diverse group of people What topics induce managers to choose and then to invest in a specific idea Questions such as these are pursued in international contributions by renowned experts using the first digital camera as a case study They identify the individual and social processes associated with the exchange and implementation of new ideas Life is Full of Disappointments and Happiness Melissa Edmunds, 2011-10-30 Poems about life and the things that happen to us on our journey through life Philosophy of Mind Edward Feser, 2006-10-27 In this lively and entertaining introduction to the philosophy of mind Edward Feser explores the questions central to the discipline such as do computers think and what is consciousness and gives an account of all the most important and significant attempts that have been made to answer them
